Globalization

# PANIC

In economics panic is acute financial disturbance, such as widespread bank failures, feverish stock speculation followed by a market crash, or a climate of fear caused by economic crisis or the anticipation of such crisis.

Also, a financial panic has quite often been a prelude to a crisis that extended beyond commercial activities into sector of consumption and capital goods.

# DEPRESSION

In economics depression is a long period of decline in the business cycle that is characterized by sharply reduced industrial production, widespread unemployment, serious declines or cessations of growth in construction activity, and great reductions in international trade and capital movements.

# RECESSION

In economics recession is a downward trend in the business cycle characterized by a decline in production and employment, which in turn causes the income, their expectations about future become less certain during a recession and cause them to delay making large purchases or investments.

# GLOBALIZATION

A solid pink rectangular bar is positioned in the top right corner of the slide.

Globalization is a phenomenon involving the integration of economies, cultures, governmental policies, and political movements around the world.
