Protected Areas Governance

Day 1. Theory

Aleksandr Nikolayevich Rudyk,
Senior lecturer of Taurida National
V.I. Vernadsky University,
Simferopol, Ukraine

Kharkiv - 2013

Questions for discussion

- Environmental Governance: definitions,
- Difference between “Governance”, “Policy” and “management”,
- Are there principles of good governance?
- Targets, objects and subjects, mechanisms of Environmental Governance,
- Levels of governance: global, national, regional and local, ...
- Three sectors of community (governmental, commercial, public): the role of actors, tasks and specific instruments of governance.

Environmental + Policy

- Environmental not= Ecological
- Policy not= Politics
- **Environmental policy** is any [course of] action deliberately taken [or not taken] to manage human activities with a view to prevent, reduce, or mitigate harmful effects on nature and natural resources, and ensuring that man-made changes to the environment do not have harmful effects on humans.

SUSTAINABLE HUMAN WELLBEING

Management

- **Management** in all business and organizational activities is the act of getting people together to accomplish desired goals and objectives using available resources efficiently and effectively.
- **Management comprises** planning, organizing, staffing, leading or directing, and controlling an organization (a group of one or more people or entities) or effort for the purpose of accomplishing a goal. Resourcing encompasses the deployment and manipulation of human resources, financial resources, technological resources and natural resources.
- **Environmental resource management** tries to identify the factors that have a stake in the conflicts that may rise between meeting the needs and protecting the resources.

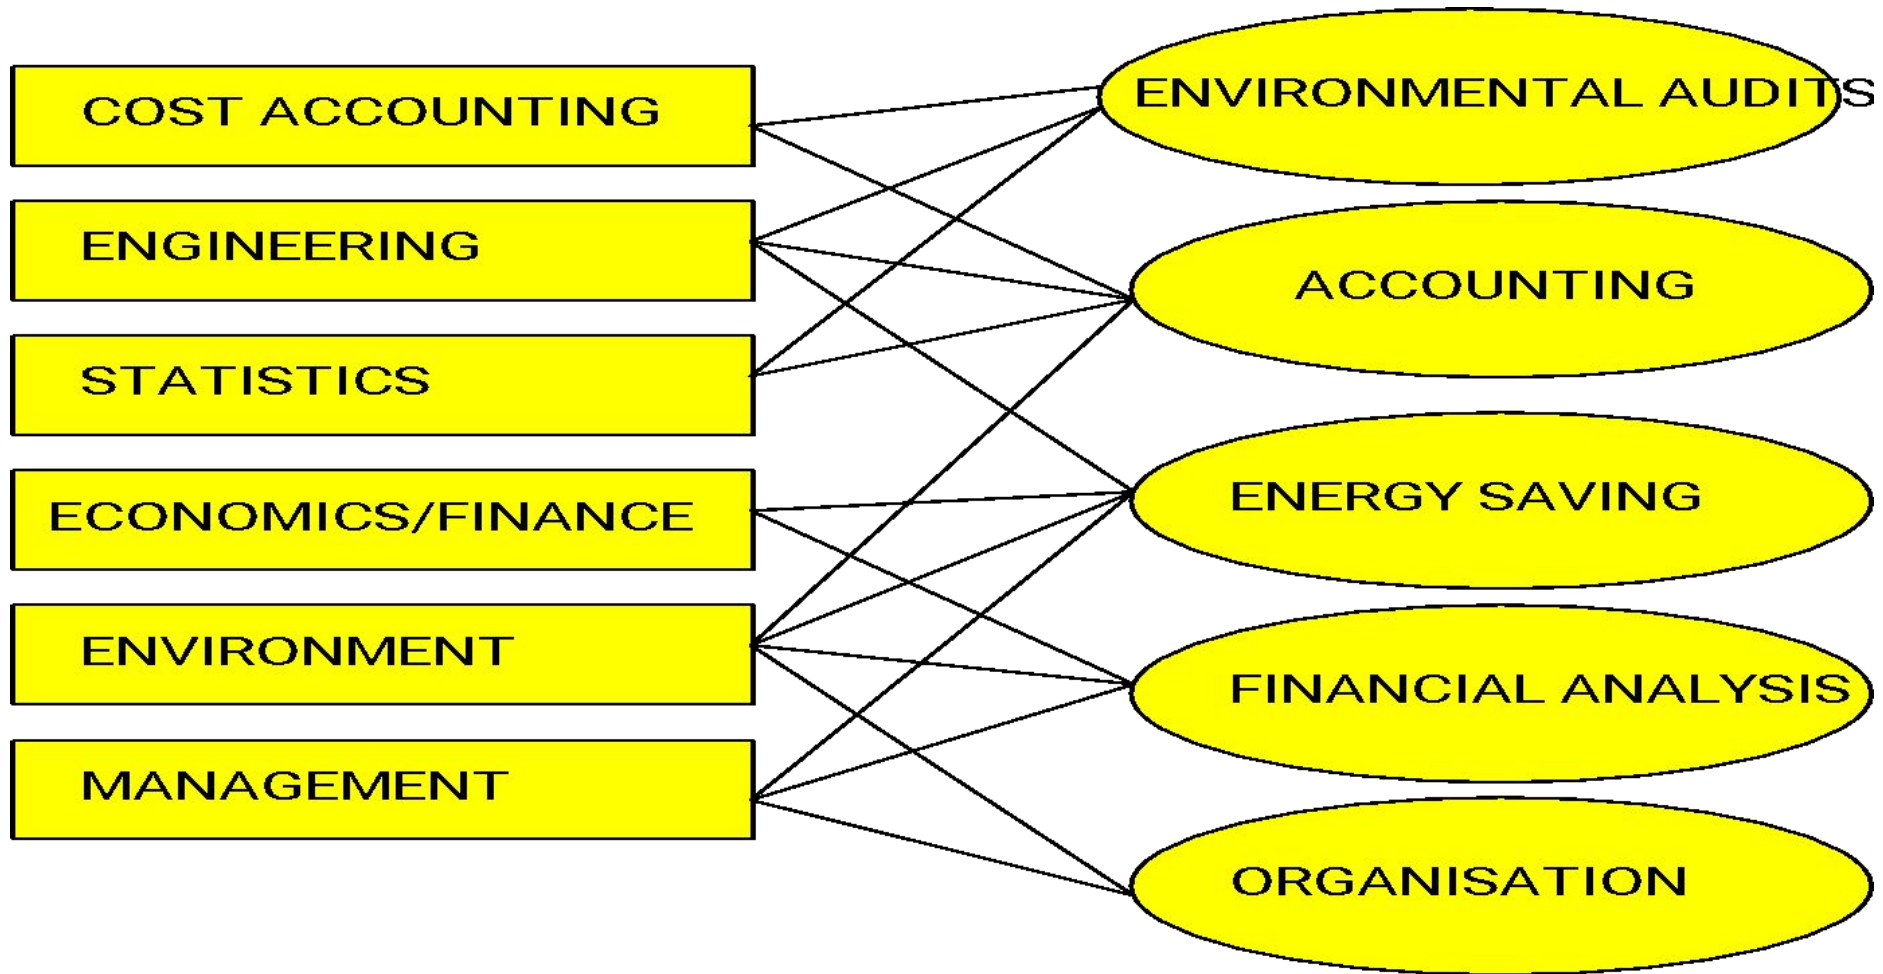

Менеджмент

- от англ. **to manage** - «владеть», «управлять». Означает руководство любой организацией (предприятием, общественной организацией, партией), а также совокупностью людей, выполняющих эти функции
- На практике понятие «менеджмент» чаще всего используется в значении «управление», «манипулирование» (менеджмент продаж, менеджмент качества). Часто понятие «менеджмент» ориентировано на технологические аспекты

Менеджмент

- **В традиционном понимании:**
 - совокупность принимаемых в организации решений, направленных на формирование отношений между организацией и заинтересованными сторонами, прямо или косвенно затронутыми в результате деятельности организации.
- **В современном понимании:**
 - совокупность всех видов деятельности организации, прямо или косвенно связанных с охраной окружающей природной среды.
- **Экологический менеджмент на предприятии:**
 - планирование, осуществление и контроль стратегических и оперативных мероприятий по предотвращению, уменьшению и устранению ущерба, наносимого окружающей среде и использование открывающихся при этом рыночных

Interdisciplinary Field of Environmental Management

Protected Areas Governance

Governance

Governance is not a synonym of 'government'; it is more than a set of official bodies, or people working as government staff.

- government ≠ governance

institution

process

Governance is the interactions among institutions, processes and traditions that determine **how** power is exercised, **how** decisions are taken on issues of public and often private concern, and **how** citizens or other stakeholders have their say.

What is the difference between management and governance of protected areas?

Management

...is
about...

what is done in pursuit of conservation objectives **the means and actions** to achieve such objectives

Governance

...is
about...

who decides what to do
how those **decisions** are taken
who holds **power, authority and responsibility**
who is (or should be) held **accountable**

Governance

- Fundamentally, governance is about power, relationships and accountability: who has influence, who decides, and how decision-makers are held accountable.
- Governance occurs wherever people organize themselves – formally and informally – to develop rules and relationships with each other in pursuing their objectives and goals.

Earth System Governance

- ...the interrelated and increasingly integrated system of formal and informal rules, rule-making systems, and actor-networks at all levels of human society (from local to global) that are set up to steer societies towards preventing, mitigating, and adapting to global and local environmental change and, in particular, earth system transformation, within the normative context of sustainable development. (*Earth System Governance Science Plan, 2009*)

- ***Environmental governance*** – термин, описывающий совокупность социально-политических подходов к управлению и рациональному использованию природных ресурсов. Его можно определить как «...образование, изменение функций и преобразование институтов (норм, правил, традиций) для разрешения конфликтов, связанных с использованием природных ресурсов» (Paavola, 2007)

Задача «*Environmental governance*» - определить каким образом современные либо действующие ранее социально политические механизмы сформировали существующий режим использования данного ресурса, какие актеры вовлечены в регулирование ресурсопользованием, что является движущей силой, определяющей характер функционирования режима ресурсопользования, какие инструменты (законодательство, технические регламенты, формальные либо неформальные институты и т.д.) вовлечены в данный процесс и какова их сравнительная эффективность, а также как сложившаяся система ресурсопользования может быть

ENVIRONMENTAL PROTECTION PRINCIPLES

- 1. THE SUSTAINABILITY PRINCIPLE**
- 2. THE POLLUTER PAYS PRINCIPLE**
- 3. THE PRECAUTIONARY PRINCIPLE**
- 4. THE EQUITY PRINCIPLE**
- 5. HUMAN RIGHTS PRINCIPLES**
- 6. THE PARTICIPATION PRINCIPLE**

Governance Principles

<i>The Five Principles</i>	<i>UNDP Principles on which they are based</i>
Legitimacy & Voice	<ul style="list-style-type: none">- Participation- Consensus Orientation
Accountability	<ul style="list-style-type: none">- Accountability- Transparency
Performance	<ul style="list-style-type: none">- Responsiveness- Effectiveness, Efficiency
Fairness	<ul style="list-style-type: none">- Equity- Rule of Law
Direction	<ul style="list-style-type: none">- Strategic Vision

Methodological approaches:

- ecosystem (i.e. water basin) management;
- ecosystem services assessment;
- ecological networks;
- integrated (interdisciplinary) multi-scale governance;
- public participation procedures;
- alternative variants of decision-making;
- conflict management and scenarios development;
- transparency and accountability.

Governing instruments

Those responsible for creating and maintaining supportive conditions for governance, use a variety of governing instruments to achieve this task, including:

- laws;
- policies and rules (e.g. for establishing roles, responsibilities and accountability);
- regulations (e.g. for timing the use of a resource, opening or closing access to an area, allowing or disallowing a particular technology

Governing instruments

- financial investments (in programmes, infrastructure, etc.) ;
- spreading of information through several avenues;
- provision of occasions to meet, discuss and negotiate over specific issues (forums and platforms, including on-going events);
- provision of material or administrative support;
- research and training programmes;
- various forms of incentives and disincentives, from fees and taxes to recognition of social merit and boosting of social standing.

Scales of Governance

- Spatial scales

- Global assessment
- National policies
- Programs of municipalities
- Rationale for individuals

- Temporal scales

- Immediate impacts
- Long term impacts
- Life cycle assessment

Biogeographical scales

Governance levels

Jurisdictional levels

Scale and Governance

Natural variability and role of scale

Integrated Global Economic and Environment Models

ISI Search identified 94 models with the terms Economic/Environment
 Individual reviews resulted in 36 models with actual economic and environmental links (number of citations per year)

Governance actors

The **types of actors** involved can be many and varied, including government agencies and ministries at various levels, local elected and traditional authorities, local communities, NGOs, businesses and corporations, international bodies, labour unions, professional organizations, religious and educational organizations, military authorities, political officials and parties, etc.

Governance Actors

Actors = Stakeholders = Players = Agents

Stakeholders – заинтересованные лица

***!NB* Interests vs Position**

**3 main groups (or sectors of Ukrainian society)
of actors and their roles:**

- 1. Governmental**
- 2. Commercial (corporative)**
- 3. Non-governmental (NGOs + active population)**

Actors of Environmental Governance

Protected Area (PA)

- IUCN defines a **protected area** as a:
“...clearly defined geographical space, recognised, dedicated and managed, through legal or other effective means, to achieve the long-term conservation of nature with associated ecosystem services and cultural values” (Dudley, 2008).

Кумулятивный рост числа и площади охраняемых территорий в мире

(Примечание: для 38 427 ООПТ общей площадью около 4 млн. км² не известна дата образования и поэтому они не были включены в данную схему)

Закон України “Про природно-заповідний фонд” (1992)

- **Природно-заповідний фонд** – ділянки суші й водного простору, природні ландшафти і об'єкти, які мають особливу природоохоронну, наукову, естетичну, рекреаційну та іншу цінність й виділені з метою збереження природної різноманітності ландшафтів, генофонду рослинного й тваринного світу, підтримання загальноекологічного балансу й забезпечення моніторингу довкілля

IUCN protected area management categories

Ia - Strict Nature Reserve

Ib – Wilderness areas

**II – National Park (ecosystem protection;
protection of cultural values)**

III – Natural Monument

IV – Habitat/ Species Management

V – Protected Landscape/ Seascape

VI – Managed Resource

Category II – National Park

- Large natural or near natural areas set aside to protect large-scale ecological processes, along with the complement of species and ecosystems characteristic of the area, which also provide a foundation for environmentally and culturally compatible spiritual, scientific, educational, recreational and visitor opportunities.

Ценности дикой природы (В.Е. Борейко)

- ЭКОЛОГИЧЕСКАЯ (ПРИРОДООХРАННАЯ, СРЕДООБРАЗУЮЩАЯ, ПРИРОДОПОДДЕРЖИВАЮЩАЯ, ВЫЖИВАТЕЛЬНАЯ) ЦЕННОСТЬ
- НАУЧНАЯ ЦЕННОСТЬ
- ИСТОРИЧЕСКАЯ ЦЕННОСТЬ
- ПАТРИОТИЧЕСКАЯ ЦЕННОСТЬ
- РЕЛИГИОЗНАЯ ЦЕННОСТЬ
- ЭСТЕТИЧЕСКАЯ ЦЕННОСТЬ
- СИМВОЛИЧЕСКАЯ ЦЕННОСТЬ
- ДУХОВНАЯ ЦЕННОСТЬ
- ЭТАЛОННАЯ ЦЕННОСТЬ
- ЦЕННОСТЬ СВОБОДЫ
- МУЗЕЙНАЯ ЦЕННОСТЬ
- ВОСПИТАТЕЛЬНАЯ ЦЕННОСТЬ
- ОБРАЗОВАТЕЛЬНАЯ ЦЕННОСТЬ
- ЦЕННОСТЬ ВДОХНОВЕНИЯ
- ЦЕННОСТЬ ЗАЩИТЫ ОТ НОВЫХ БОЛЕЗНЕЙ
- ЦЕННОСТЬ СУЩЕСТВОВАНИЯ
- НЕОСОЗНАННЫЕ (НЕИЗВЕСТНЫЕ И НЕРАЗРАБОТАННЫЕ)

PA Goals and Powers

(задачи и полномочия)

- **Goals of PAs** (balance varies by IUCN PA category)
 - nature conservation
 - science
 - visitor opportunities
 - local and indigenous needs
- **Powers of PAs**
 - planning
 - regulation
 - spending
 - revenue-generating
 - power to enter into agreements

Legitimacy and Voice Criteria

- Supportive democratic and human rights context
- Decentralization in decision-making
- Collaborative management
- Citizen participation at all levels of decision-making
- Civil society groups and an independent media
- High levels of trust

Direction Criteria

- Consistency with international direction
- Legislative direction (formal or traditional law)
- System-wide PA plans
- Management plans for individual PAs
- Demonstration of effective and visionary leadership

Performance Criteria

- Cost Effectiveness
- Capacity
- Co-ordination
- Performance Information to the Public
- Responsiveness
- Monitoring and Evaluation
- Adaptive Management
- Risk Management

Accountability Criteria

- Clarity
- Coherence and breadth
- Role of politicians
- Public Institutions of Accountability
- Civil Society and the Media
- Transparency – public access to information

Fairness Criteria

- Supportive judicial context
- Fair and impartial enforcement
- Fairness in the process for establishing new PAs
- Fairness in the management of PAs

Good governance of PA

Effective governance system for protected area means finding a good working balance between multiple levels of powers encompassing history, culture and innovation, locating avenues and instruments for those powers to be positively exercised, and remaining flexible, adaptable and capable of responding to the ever-changing needs of in situ conservation.

PA governance types

Defined on the basis of “who holds management authority and responsibility and can be held accountable”, 4 main PA Governance types can be identified:

- A. Government managed protected areas;**
- B. Co-managed (Multi-stakeholder) PA;**
- C. Private protected areas;**
- D. Community conserved areas.**

Levels of Protected area governance:

- *International*
- *Regional*
- *Bilateral*
- *National*
- *Protected area system*
- *Protected area*

Governance instruments and powers

- *National and international legislation, policies and rules*

Порівняльна характеристика території і об'єктів природно-заповідного фонду України

Категорії заповідних об'єктів України	Статус (заг-держ., місц.)	Відповідність категорії МСОП	Природні/штучні	Форма власності (держ., приватна)	Наявність адм-ції (+/-)	Наявність зонування (+/-)	Наявність Проектів в орг-ції (+/-)
