

# *Rock Community*

For people in our community music is a huge part of life. It not only changes our mood and cheers us up, it also helps to overcome difficulties in life. For us, it is like a breath of air in everyday-routine. No matter how you feel, rock music will always make you feel better.

We are passionate about everything we do and rock music is an inducement. For us it is vital always to do something that we love-sing, dance, risk, explore! Our life is full of joy and events, and all this is because of our music that gives us energy.

In rock community people are really united. All what we admire, our thinking and lifestyle are the same. If someone from our community needs help or support, we will immediately provide it. It doesn't matter, if we don't know each other- at the first moment when we hear that a person loves rock, understanding and support is guaranteed.

We are always ready to defend our community. We are brave enough to say out loud what we think. If we really love something we'll never allow someone to criticize it. Our music, clothes, company, symbols are our pride and if someone will insult them, they'll be punished.

We, people in rock community, are proud, of who we are. Belonging to this community is our life, without rock music, memorable concerts, adrenalin and people that will always understand and support us, we'll die. Rock influences our lives a lot and I can't even imagine life without it.
