The Flag of the USA

The thirteen-star, thirteen-stripe national flag of the United States of America was adopted on June 14, 1777. There was one star and one stripe for every state in the new country. Gradually, as new states were added to the Union, a new star was added to the national flag. There are now fifty stars on the American flag, one for each state. The thirteen stripes represent the original thirteen states.

National Anthem:

"The Star-Spangled Banner"

The national anthem of the USA was written during the war of 1812. In 1814 Francis Scott Key, an American lawyer wrote a poem titled "Defence of Fort McHenry" which could be sung to the tune of one popular song of that time. On September 20, 1814 the poem was published in the Baltimore newspaper. The song was caught on and everyone was singing it. In 1916 President Woodrow Wilson ordered that "The Star-Spangled Banner" would be played at all state occasions. In 1931 the Congress of the USA declared it the National Anthem.

The Star-Spangled Banner

Oh, say! Can you see, by the dawn's early light,

What so proudly we hailed at the twilight's last gleaming,

Whose broad stripes and bright stars, through the perilous fight,

O'er the ramparts we watched were so gallantly streaming?

And the rockets' red glare, the bombs bursting in air, Gave proof through the night that our flag was still there.

Oh, say, does that Star-Spangled Banner yet wave?
O'er the land of the free and home of the brave?

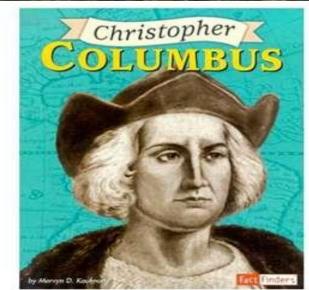

"America, the Beautiful!"

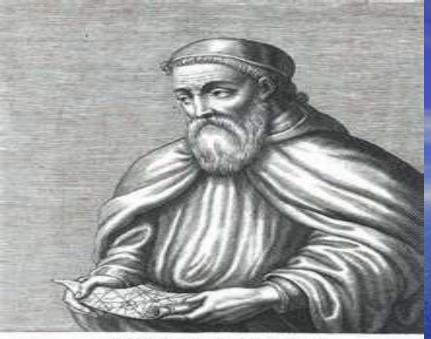

Many people wanted to make "America, the Beautiful" the national anthem instead of "The Star-Spangled Banner", because it was not written as a result of a war. The tune is easier to sing, and the whole country is praised, not only the flag. "America, the Beautiful" was written by Katherine Lee Bates. She chose the music of a hymn by Samuel Ward. The words and music travelled around the world, and today Mexico, Canada and Australia sing it with their own countries' names instead of "America".

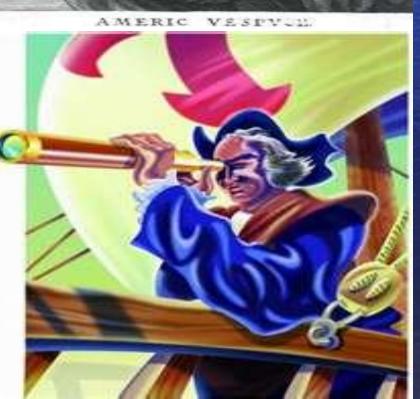

The origin of the word "America"

For a while after the first voyage of Columbus in 1492, America was called the "New World". Later, it was decided map-makers in Europe to name the New World after a man named Amerigo Vespucci.

Amerigo Vespucci was an Italian merchant and adventurer who made three trips to the New World. Columbus became the first explorer to reach the mainland of South America in 1498, but Amerigo Vespucci soon wrote a book in which he claimed to have gone there in 1497. This was not true, but people did not know for many years that Amerigo Vespucci was lying.

GEOGRAPHY OF THE USA

The country is situated mostly in central North America, where its forty-eight contiguous states and Washington, D.C., the capital district, lie between the Pacific and Atlantic Oceans, bordered by Canada to the north and Mexico to the south. The state of Alaska is in the northwest of the continent, with Canada to the east and Russia to the west across the Bering Strait. The state of Hawaii is an archipelago in the mid-Pacific. The country also possesses several territories in the Pacific and Caribbean.

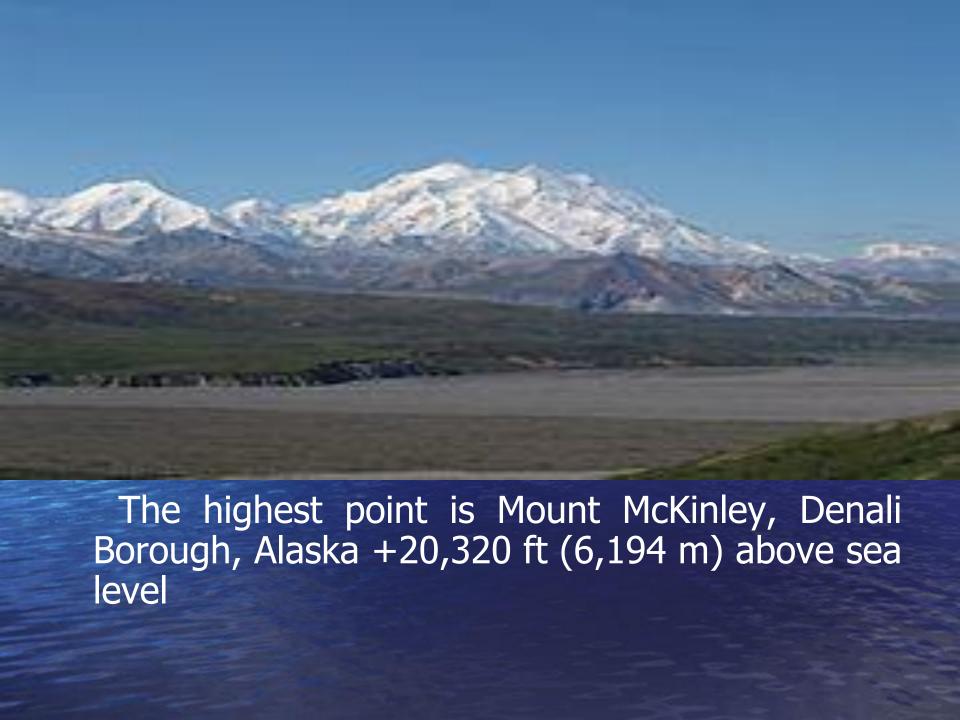

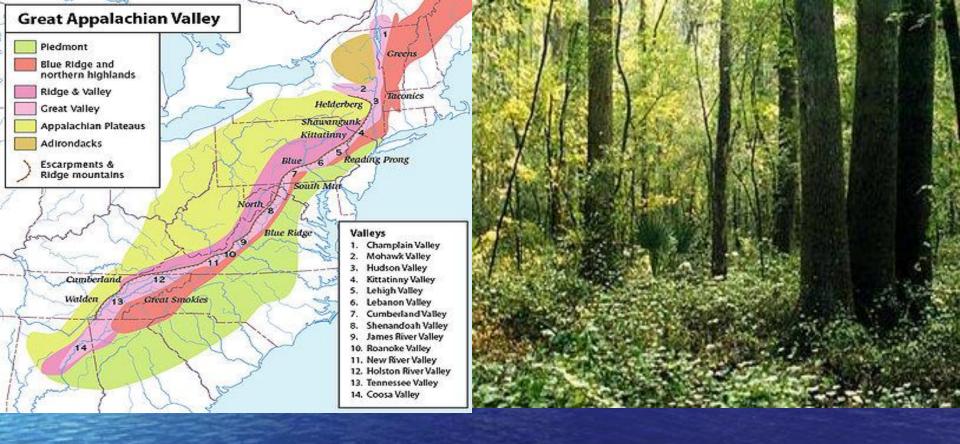

The USA is divided into three areas: Eastern area – a highland, where the Appalachian Mountains are situated, Central area – a plain, and Western area which is mountainous and includes the Cordilleras and the Rocky Mountains.

The highest peak in the Appalachian Mountains is 2, 037 metres high. The highest peak of the Cordilleras in the USA is 4, 418 metres high. The Appalachian Mountains are very old. The Rocky Mountains are considered to be young.

Between the Appalachian and Cordilleran there are vast valleys known by the general name of the Great Valley. Another large valley is the Mississippi Lowland.

The north-eastern part of the USA is the region of the five Great Lakes (Lake Superior, Huron, Michigan, Erie and Ontario) which are connected by channels cut by rapids. The greatest of these rapids is the Niagara Falls. The St. Lawrence River joins the water of the five lakes to the Atlantic Ocean. In the west of the USA there is another lake called the Great Salt Lake.

The main rivers of the USA

The main rivers of the USA are **the**Mississippi (it is the second largest river in the world after the Nile; it is the largest river in the USA); the Missouri, the Yukon, the Colorado, the Columbia, the St. Lawrence and the Hudson.

CLIMATE

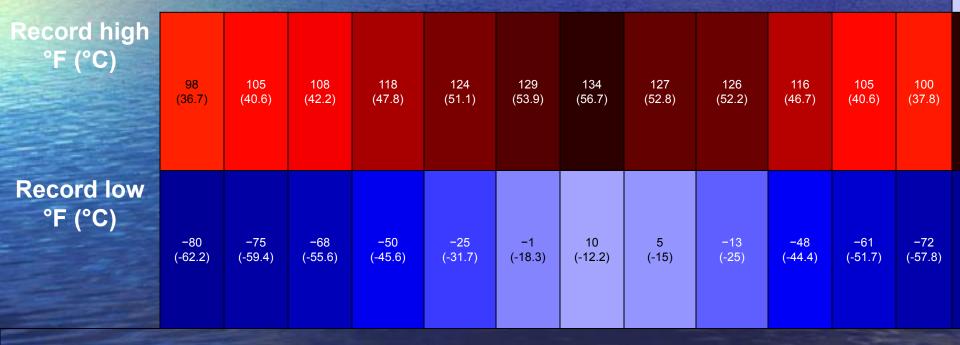

The USA have several climatic regions: from continental climate in New England to subtropical in Texas, Louisiana, Alabama and Florida. The weather ranges from the warm, wet conditions of the Appalachian Highland to the desert conditions of some of the western states. Average summer and winter temperatures are different in every climatic region.

The Political System of the USA

The United States is a federal constitutional republic, in which the President of the United States (the head of state and head of government), Congress, and judiciary share powers reserved to the national government, and the federal government shares sovereignty with the state governments.

Organiasation of Command:

'The constitution has divided the powers of government into three branches, Legislative, Executive and Judiciary, lodging each with a distinct magistracy. The Legislative it has given completely to the Senate and House of Representatives. It has declared that the Executive powers shall be vested in the President, submitting special articles of it to a negative by the Senate, and it has vested the Judiciary power in the courts of justice, with certain exceptions also in favor of the Senate."

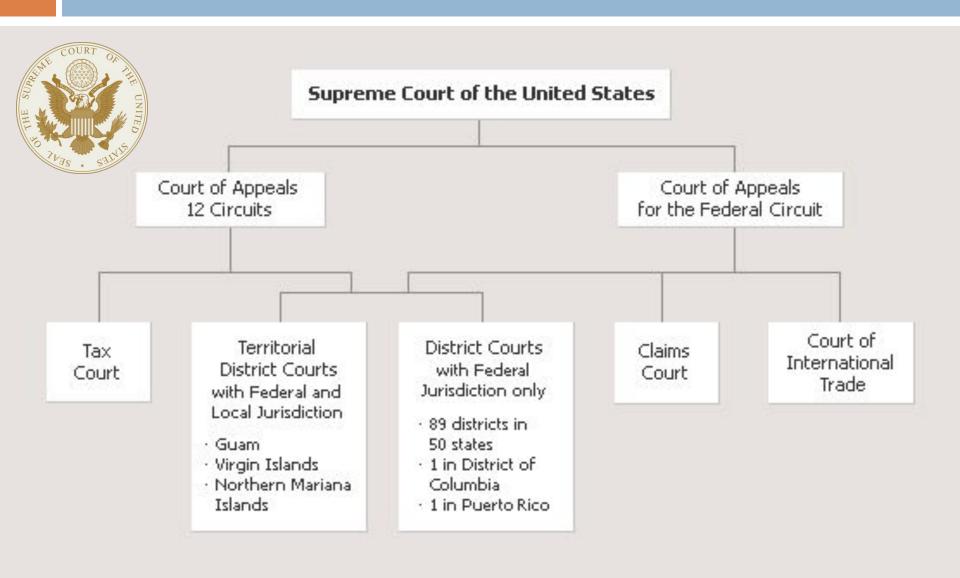

~Thomas Jefferson: Opinion on Executive Appointments, 1790. ME 3:15

- The executive branch is headed by the President and is independent of the legislature.
- Legislative power is vested in the two chambers of Congress, the Senate and the House of Representatives.
- **The judicial branch** (or judiciary), composed of the Supreme Court and lower federal courts, exercises judicial power (or judiciary). The judiciary's function is to interpret the United States Constitution and federal laws and regulations. This includes resolving disputes between the executive and legislative branches. The federal government's layout is explained in the Constitution.

The executive branch:

	President	Head of StateCommander-in-ChiefElected by electoral college
	Vice President	 First in succession line to President in case of death, resignation or removal President of the Senate
	Cabinet	 Members nominated by President, confirmed by Senate Head 15 major federal departments
	Federal Departments & Agencies	 60+ departments and agencies in total Responsible for day-to-day enforcement & administration of federal laws

Uncle Sam

- Congress adopted Uncle Sam as an official symbol in 1961.
- He is best known for his army recruiting posters, which said...

Uncle Sam

Uncle Sam

- The exact origins of Uncle Sam as a symbol for the United States are unknown.
- · But the most widely accepted theory is that Uncle Sam was named after **Samuel Wilson**.
- ·Samuel Wilson was a businessman from Troy, NY.
- He supplied the U.S. Army with beef in barrels.
- ·The barrels were labeled "U.S."
- ·When asked what the initials stood for, one of Wilson's workers said it stood for

"Uncle Sam Wilson."

- The suggestion that the meat shipments came from "Uncle Sam" led to the idea that <u>Uncle Sam symbolized the Federal Government</u> and the association stuck.
- •In 1961, Congress passed a resolution that recognized Samuel Wilson as the inspiration for the symbol Uncle Sam.
- ·Thomas Nast, a political cartoonist drew the first "Uncle Sam".
- •The most famous picture of Uncle Sam appeared on an Army recruiting poster. The poster was designed in World War I, and was used again in World War II. The caption reads

"I Want You for U.S. Army."

·James Montgomery Flagg drew this picture, and served as the model too!
