

The life in this country in 50 years time.

Stolyarova Ann

I think in the future people will live in such houses.

Here you can see a plan of a future house with some furniture.

I think that in the future robots will do the work about the house. They will look like people.

The robots will wash the dishes, cook tasty meal, repair instruments, clean the house. They can do everything!

Thank you for attention!
THE END!!!
