

*To be the good teacher,
it is necessary to love that you teach,
and to love those to whom you teach.*
Vasily Klyuchevsky

The most perspective profession "Teacher"

The presentation is prepared: Karaeva Arina

General characteristic of a profession

The teacher — is a unique profession, out of time, fashion and geography.

Being one of the most ancient professions, it remains necessary and demanded to this day.

As well as all on light, over time it undergoes changes.

According to Ojegov's dictionary, the teacher — is the person who trains someone in something.

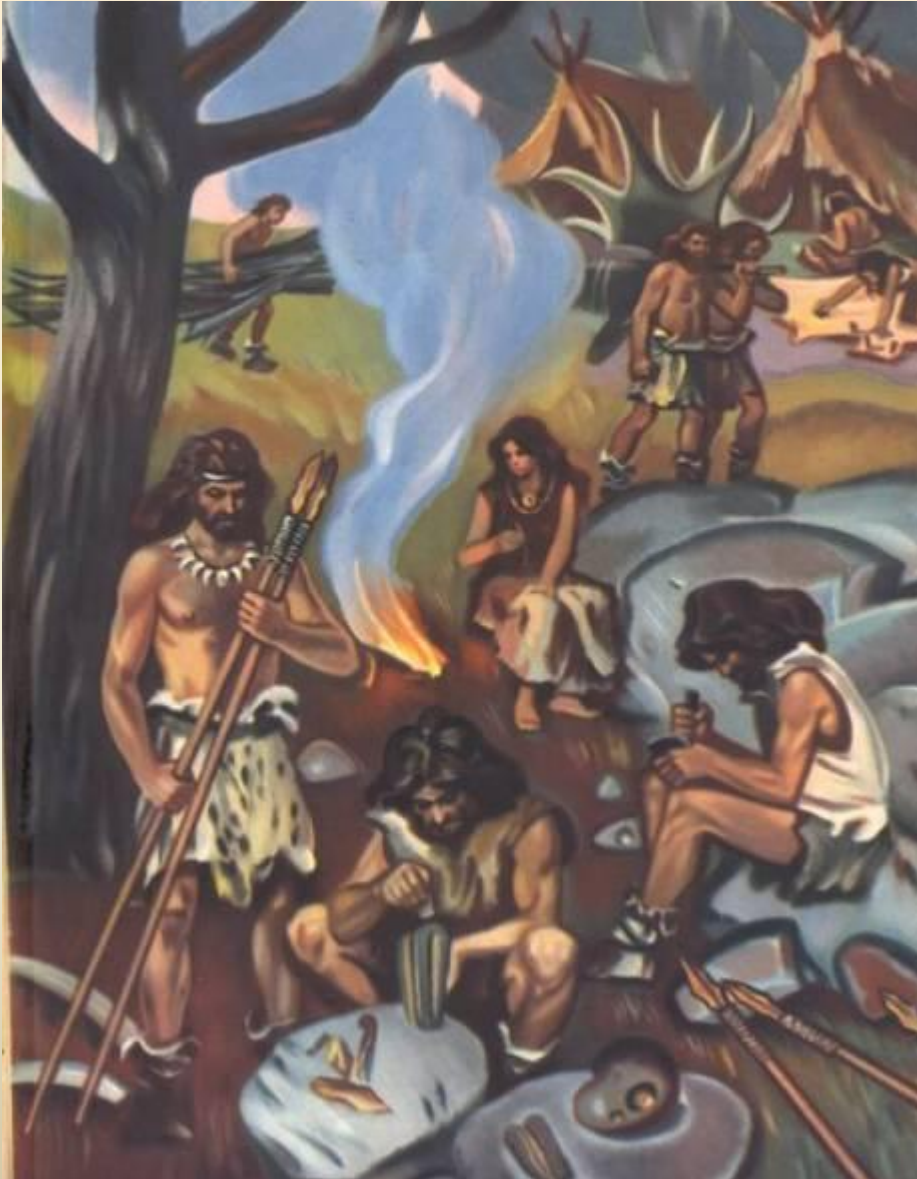

Teachers work not only at school, they impart knowledge in colleges and institutes and other educational institutions.

Profession history

Once long ago, when division of labor didn't exist, all seniors became teachers, the most skilled representatives of a tribe/community.

Profession history

Then, the people owning this or that craft and giving these or those skill/knowledge became teachers.

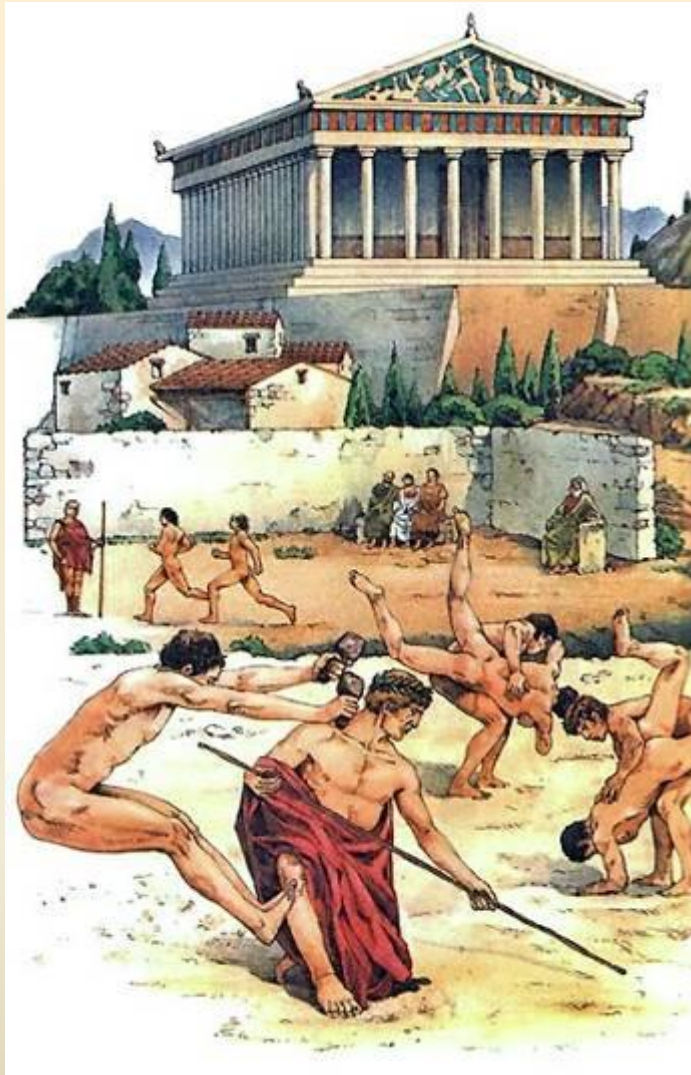

- The pedagogics, in a translation from Greek means "detovozhdeniye", that is education of children, their preparation for life in society.
- As the developed science pedagogics is engaged in disclosure of regularities of education, defines the content of education and a training technique.
- The beginning of development of pedagogics belongs to ancient centuries. The pedagogics in the form of rules and manuals for adults on care of children and supervision over their behavior arose. The pedagogical traditions which have begun development of pedagogics as sciences, appeared in Ancient Greece in the V-IV centuries B.C. The particular interest is caused by the Athenian and Spartan educational systems.

- **The Athenian educational system assumed the training beginning from 7 years when the teacher (so called the black slave) conducted the child in school where at first it passed reading and the account, then there came turn of literary and esthetic education. The big part was assigned also to physical training (to run, jumps, swimming, javelin throw and a disk).**
- **The Spartan educational system paid the main attention to education of strength of mind, physical endurance, a character hardening.**

Athenian educational system

Spiritual education

Spartan educational system

Physical training

Formation of an era of the Middle Ages had generally religious character

And only in 18 — 19 eyelids, teaching as officially recognized profession became the mass phenomenon in Europe and around the world

Social importance, importance and profession demand

- In 21 centuries when than knowledge becomes more increasing, the profession of the teacher gains new value for development of society, the science world.
- Teachers accompany us during all life, from kindergarten age.
- The trainer at sports school hides from us chocolate and forces to run some more kilometers on a racetrack.
