The United States of America is the fourth largest country in the world (after Russia, Canada and China).

It is situated in the central part of the North American Continent. It also includes Alaska and Hawaii. The USA borders on Canada in the north and on Mexico on the south. The total area of the country is more than nine million square kilometers.

It is washed by the Pacific Ocean in the west and the Atlantic Ocean and the Gulf of Mexico in the east.

It is a very large country, so the climate is different from state to state. It is mostly temperate but tropical in Hawaii and Florida, and arctic in Alaska.

The most important rivers in the USA are the Mississippi, the Colorado, the Ohio and the Hudson River. The main mountain chains are the Cordillera in the west and the Appalachian Mountains in the east. The Great Lakes on the border with Canada are the largest and the deepest in the USA.

**One of the famous
symbols of the USA is
the Statue of Liberty.**

The Statue of Liberty was put up in New York Harbor in 1886. It was designed by Bartholdi, a French sculptor, who worked ten years at it. Then the statue was taken to pieces and shipped across the Atlantic as a gift from the French government to the United States.

The statue of Liberty is a woman who holds a torch up high. She symbolizes a welcome to a land of freedom.

Here is the Mount Rushmore Memorial.

The construction of this memorial began in 1925. Gutzon Borglum, a famous American sculptor, carved on the face of Mount Rushmore the heads of Washington, Jefferson, Lincoln and Roosevelt.

This tremendous work, which took fourteen years to complete, was finished in 1941.

These gigantic heads are eighteen metres high. This memorial is often visited by the tourists who come to the USA.
