Topic	Поиск всех слов (без ограничений) в названии статей, реферате, авторах, ключевых словах	<i>"white oak" или "quercus alba"</i> <i>Vitamin A</i>
Author	Поиск по авторам	<i>Bergstrom CT</i> <i>Wallen K*</i>
Researcher ID	Поиск по номеру профиля авторов на ресурсе www.researcherid.com	<i>A-1009-2008</i>
Group Author	Группа или организация, выступающая как автор	<i>Aberdeen Lung Cancer Group</i> <i>Beta Cell Biology Consortium</i>
Publication Name	Название журнала	<i>Czech Journal of Food Sciences</i> <i>Progress in Brain Research</i>
Publication Year	Год, когда была опубликованы статьи	<i>1999</i> <i>2003-2005</i>
Address	Поиск по сокращенным названиям организаций авторов	<i>Emory Univ, Dept Biol, Atlanta, GA</i> <i>30329 USA</i>
Funding Agency	Поиск по названию финансирующей организации	<i>Australian Research Council</i>
Grant number	Поиск по номеру гранта или проекта	<i>P01*</i> <i>DP0342590</i>

Символы усечения

Символ	Назначение	Примеры поиска
*	любое количество символов или их отсутствие	carbon* <i>carbon, carbonate</i>
\$	один символ или его отсутствие	colo\$r <i>color, colour</i>
?	строго один символ	en?oblast <i>entoblast, endoblast</i>

Обратите внимание: символ \$ не может быть использован внутри выражений с кавычками (например, "colo\$r theory") при включенной лемматизации

Faculty Sensemaking and Mission Creep: Interrogating Institutionalized Ways of Knowing and Legitimacy

Abstract: Increasingly, regional and/or teaching colleges and universities are striving to assert themselves as national or international research universities. Although such shifts represent significant implications for faculty members, few works address the faculty perspective or experience. In this qualitative, interpretive paper, I discuss how faculty members made sense of their university's attempt to achieve a more research-focused mission. Using a critical neo-institutional lens, I outline the sources that faculty members relied upon as they defined the transition. From this analysis, I offer practical and theoretical implications.

Species loss and aboveg

Author(s): Bunker, Daniel E; Declerck, Agathe; Shahid

[PubMed Related Articles]

Abstract: Tropical forest biodiversity is declining, and carbon storage and sequestration, remain unknown. We assessed the influence of the loss of tropical tree species on carbon storage by simulating 18 possible extinction scenarios within a well-studied 50-hectare tropical forest plot in Panama, which contains 227 tree species. Among extinction scenarios, aboveground carbon stocks varied by more than 600%, and biological insurance varied by more than 400%. These results indicate that future carbon storage in tropical forests will be influenced strongly by future species composition.

Journal Citations Reports

Вы получите список результатов, которые можно отсортировать по следующим параметрам:

Journal Title – название журнала,

Total Cites - общее количество ссылок (количество цитирования конкретного журнала во всех журналах, включенных в базу данных JCR за текущий год).

Journal Citations Reports

Impact Factor – импакт-фактор

ИФ 2011 = количество цитирований в 2011 /
количество статей в 2009 и 2010

(среднее число цитирования в текущем году статей, вышедших в журнале в предыдущие два года).

Используется:

- для оценки или сравнения значимости журнала по отношению к другим журналам в определенной области,
- определение частоты цитирования статей для определения необходимости включения того или иного журнала в вашу коллекцию.

Journal Citations Reports

5-Year Impact Factor - пятилетний импакт-фактор - показатель цитирования статей, опубликованных в журнале в течение последних пяти лет, за определенный год.

Используется:

для более качественного измерения веса журналов в областях, где влияние опубликованных исследований необходимо учитывать на протяжении более длительного периода времени.

Journal Citations Reports

Immediacy Index – индекс оперативности - определяет, как часто статья из журнала цитировалась в год ее публикации. Этот показатель крайне важен для оценки журналов, публикующих передовые исследования.

Articles - количество статей - отражает количество опубликованных в журнале статей за определенный год или несколько лет.

Journal Citations Reports

Cited Half-life - показатель цитируемости, указывающий количество лет, начиная от текущего года, на которые приходится 50 % от общего числа ссылок на журнал за текущий год.

Используется:

- при выборе журналов для комплектования и архивирования фондов, коллекции,
- издателями при выборе редакционной политики с учетом ситуации в разных сегментах рынка.

Journal Citations Reports

Eigenfactor™ Score - рассчитывается с использованием показателей цитирования JCR за текущий год на основе изданных за предыдущие пять лет публикаций.

При измерении Eigenfactor Score больше внимания уделяется цитированию из влиятельных журналов, что играет решающую роль в процессе определения рейтинга того или иного журнала. При определении Eigenfactor Score не учитывается самоцитирование журнала.

Journal Citations Reports

Article influence™ Score – показатель, определяющий значимость журнала на основе опубликованных статей. Он измеряется путем деления Eigenfactor Score журнала на относительное количество опубликованных в журнале статей.

Количество статей подвергается нормализации, чтобы итоговая сумма статей из всех журналов равнялась единице.

Средний показатель Article Influence Score = 1.00.

Индекс более 1.00 указывает на то, что влияние статей в этом журнале выше среднего значения; индекс менее 1.00 указывает на то, что влияние статей в журнале ниже среднего значения.

Journal Cited Half-Life ⓘ

The cited half-life for the journal is the median age of its items cited in the current JCR year. Half of the citations to the journal are to items published within the cited half-life.

Cited Half-Life: >10.0 years

Breakdown of the citations *to the journal* by the cumulative percent of 2011 cites to items published in the following years:

Cited Year	2011	2010	2009	2008	2007	2006	2005	2004	2003	2002	2001-all

Журналы, входящие в первый квартиль:

- самые высокие импакт-факторы,
- большая аудитория,
- высокий шанс цитирования статей,
- высокие требования к материалам.

Журналы, входящие во второй и третий квартиль:

- менее высокие требования к материалам,
- являются признанными в научном сообществе.

The screenshot displays the EndNote Web interface. At the top, it says "ENDNOTE® WEB | WEB OF KNOWLEDGE™". Below this are navigation tabs: "My References", "Collect", "Organize", "Format", and "Options". Under "My References", there are sub-tabs: "Online Search", "New Reference", and "Import References".

On the left, there is a "Quick Search" box with a search input field and a "Search" button. Below it, a "My References" sidebar shows "All My References (5)", including "Unfiled (2)", "Quick List (0)", and "Trash (0)". Under "My Groups", there is a group named "Evidentiality (3)". A red arrow points from this sidebar towards the search results.

The main area shows "Online Search Results" for "American University 26 - of 62 results (evidentiality) in Any Field". It includes a "Show 25 per page" dropdown and a "Page 2" indicator. Below this is a table of search results with columns for "Author", "Year", and "Copied Title". Each row has a checkbox on the left. A red arrow points to the top of the table. A blue checkmark is visible in the "Copied" column for the entry by Fitneva, Stanka A.

On the right, an orange text box contains the following text: "Найденные записи можно отметить галочкой и добавить к одной из Ваших групп или в общую подборку (Unfiled)".
