GOAL

- To learn influencing different factors on behavior of teens and their fate.

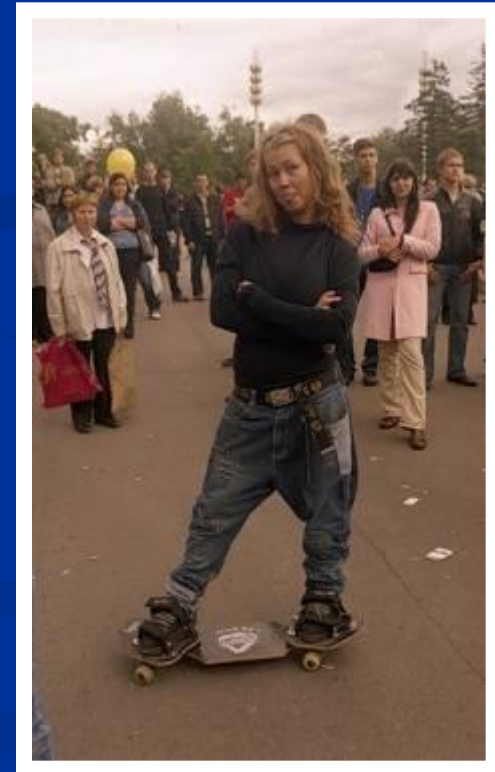

TASKS

- To create the test to detect reasons of using drugs, drinking alcohol, smoking;
- To analyze possibly effects of this;

- Every young person has his own point of view on his life and future. Teenagers are self-confident, like risking. So all of us want to try everything in the life, to grow up as soon as possible.

- When a person is young he goes through all the problems more vividly. For teenagers nearly everything becomes a tragedy. Love, friendship, conflicts, misunderstanding between them & parents are all the things that go hand in hand with youth.

Communication with persons of the same age

- The problem number one contains communication with each other. At our age it's so important to choose a true friend who can listen to you, support in any situation, and advise something useful.

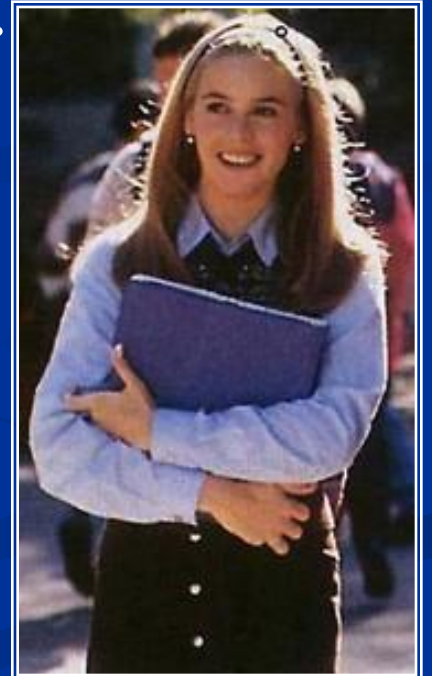

Those who choose another way are in the state of a conflict because they can't control their emotions. Such “hot” boys often organize groups against others & conflicts become more serious. They dictate their own rules to everybody.

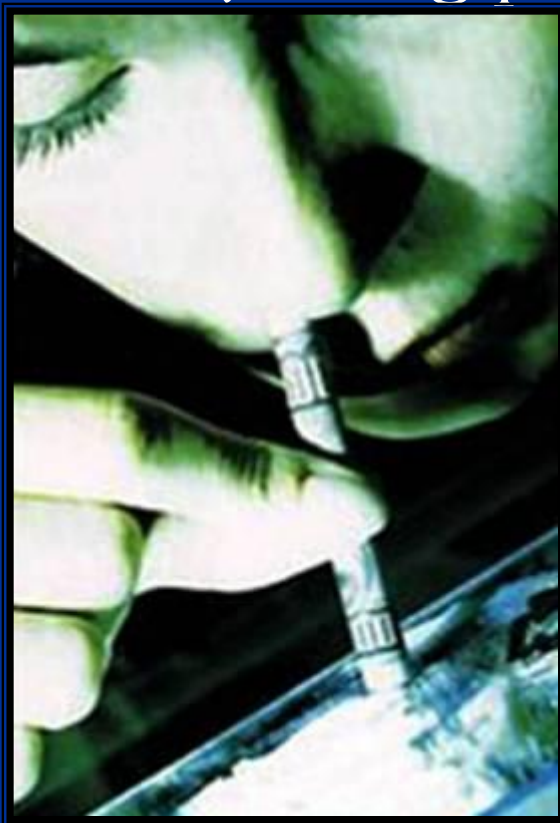

Fathers & Sons

The problem number two is the problem of fathers and sons. They want their parents to listen to their opinion, not to interfere in their private life, and allow to solve problems by themselves. Some parents neglect their children because they can't find the common language with each other.

DRUG ADDICTION

I think that the most difficult and serious problem of modern teenagers is drug addiction. Today millions of young people use drugs, and most of them die.

Besides, a lot of teenagers think drugs will help them to forget about different problems and to escape from reality.

In addition to that, young people always need some money to buy them.

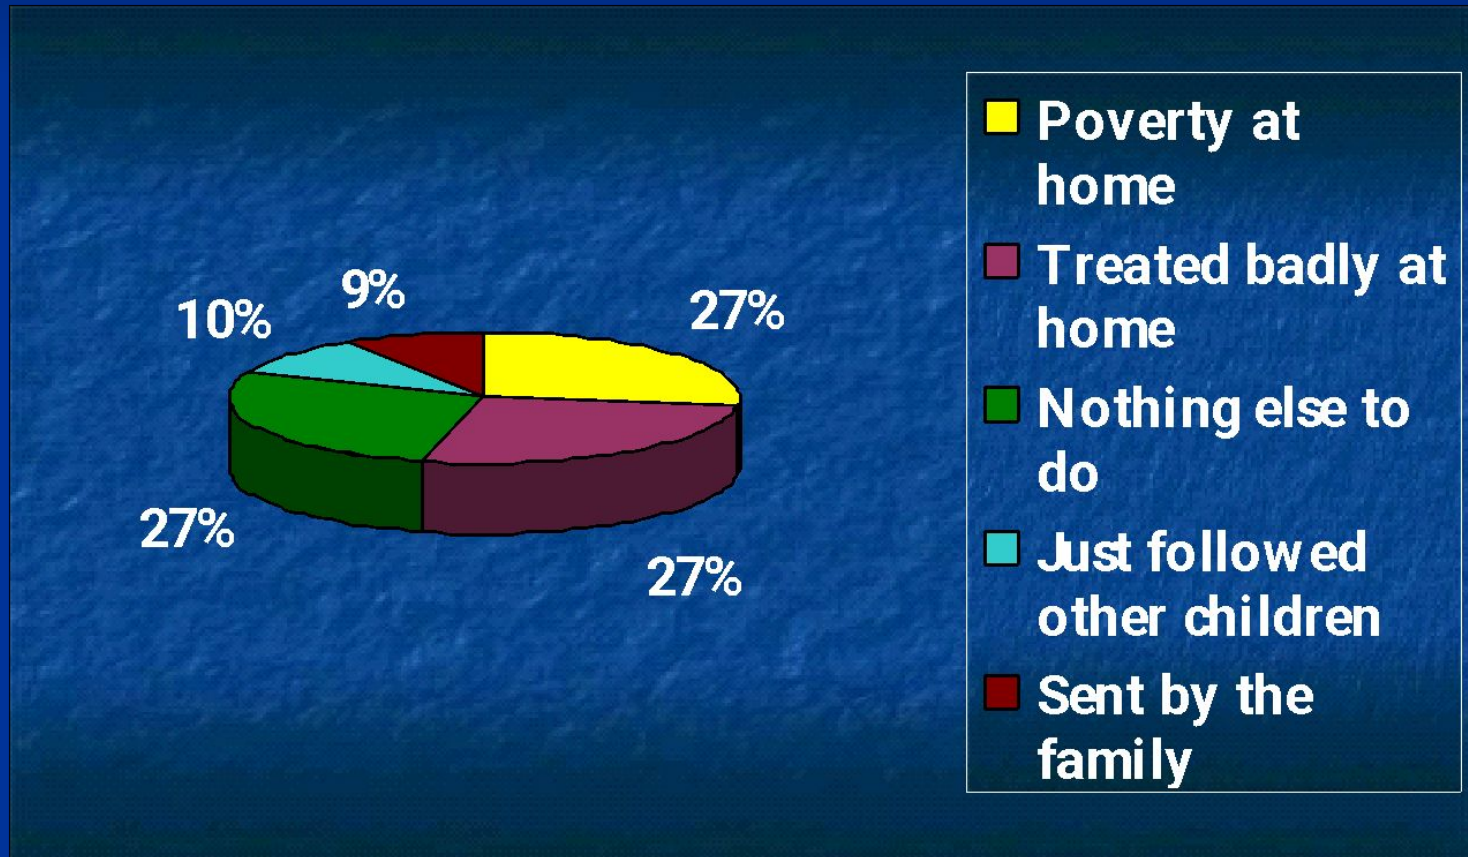

As a rule, young people usually steal. Then they sale stolen things and get some money. Drugs are very expensive so teenager even can be a killer to earn money.

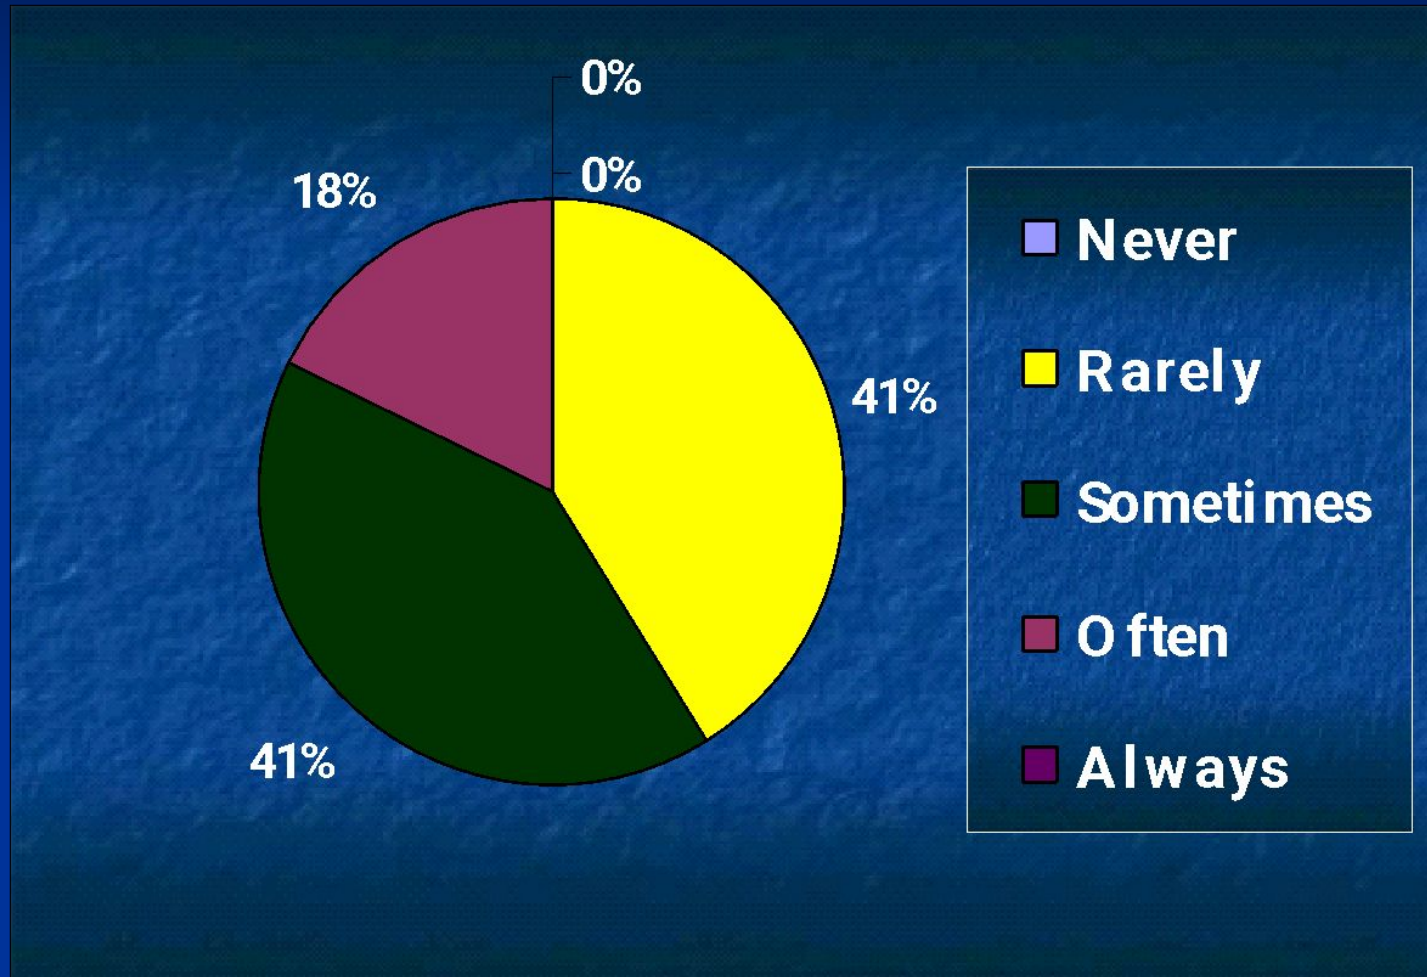

Street Children

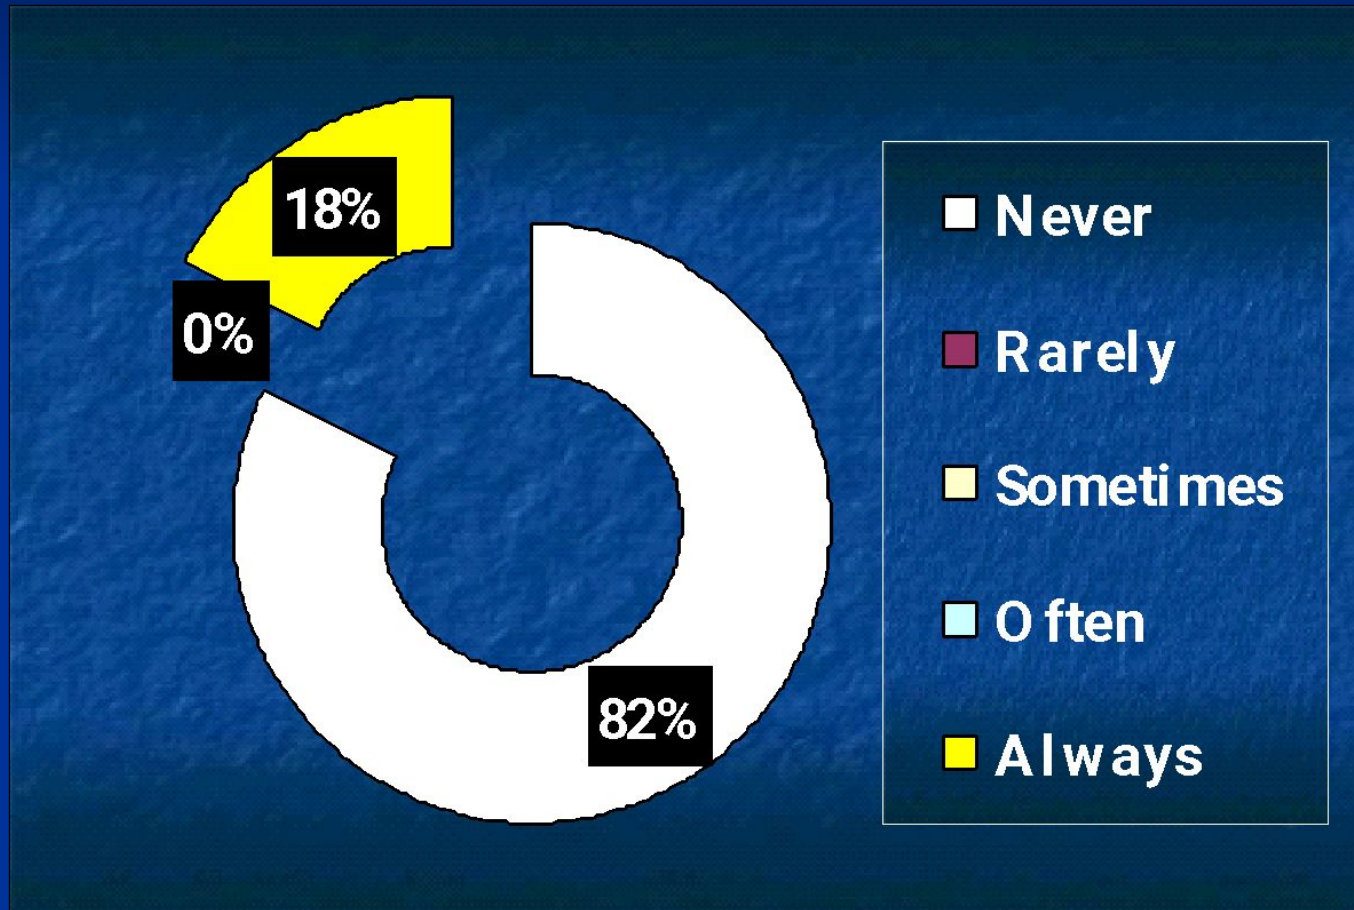

- 40 million children around the world spend their life on city streets.
- Why are they there?

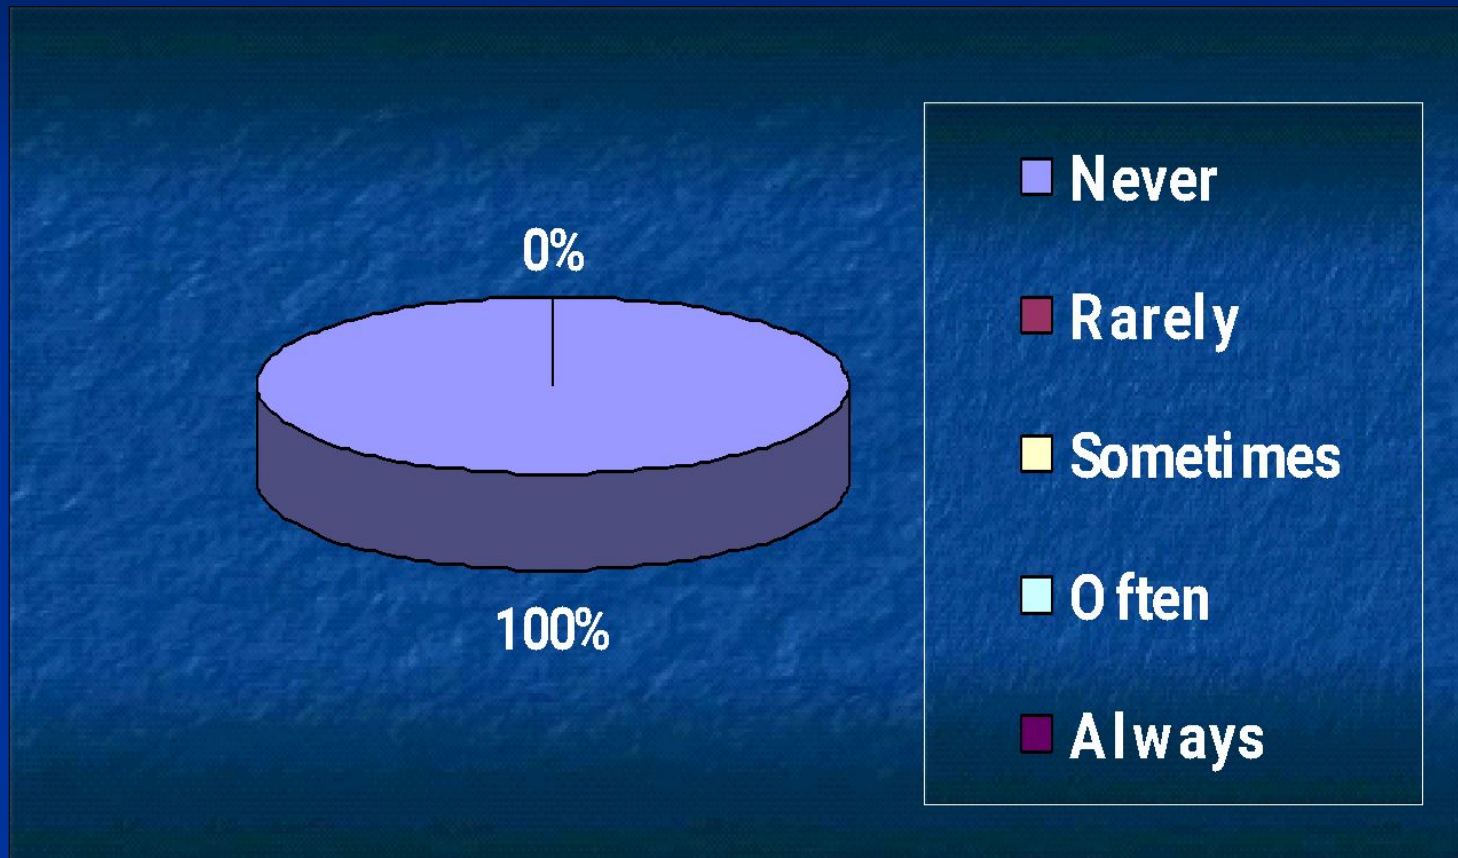

■ Do you argue with parents?

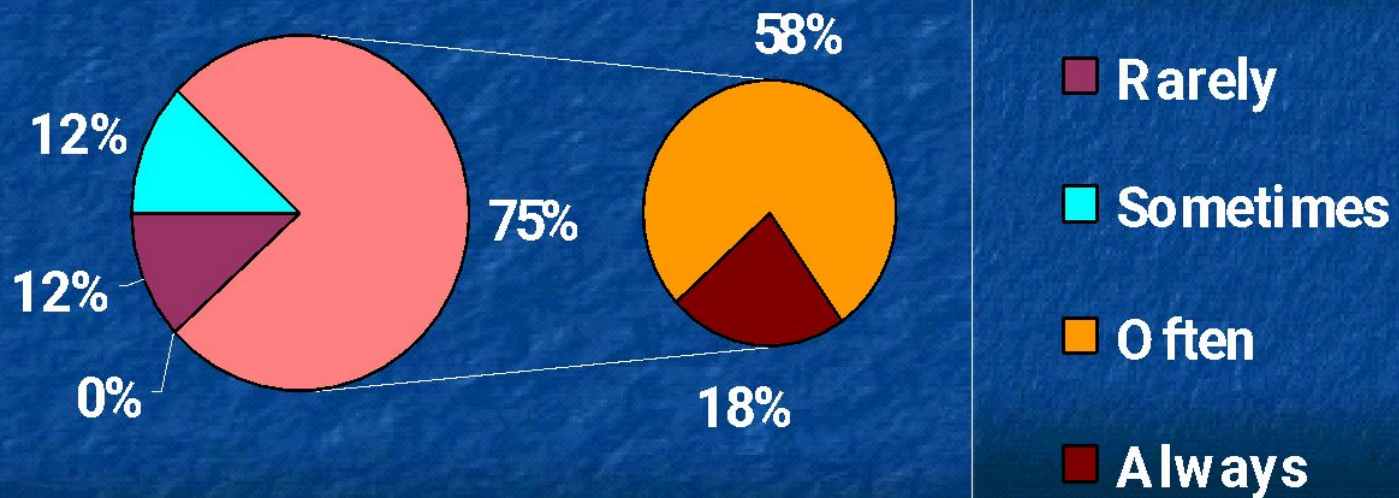

■ Do you smoke?

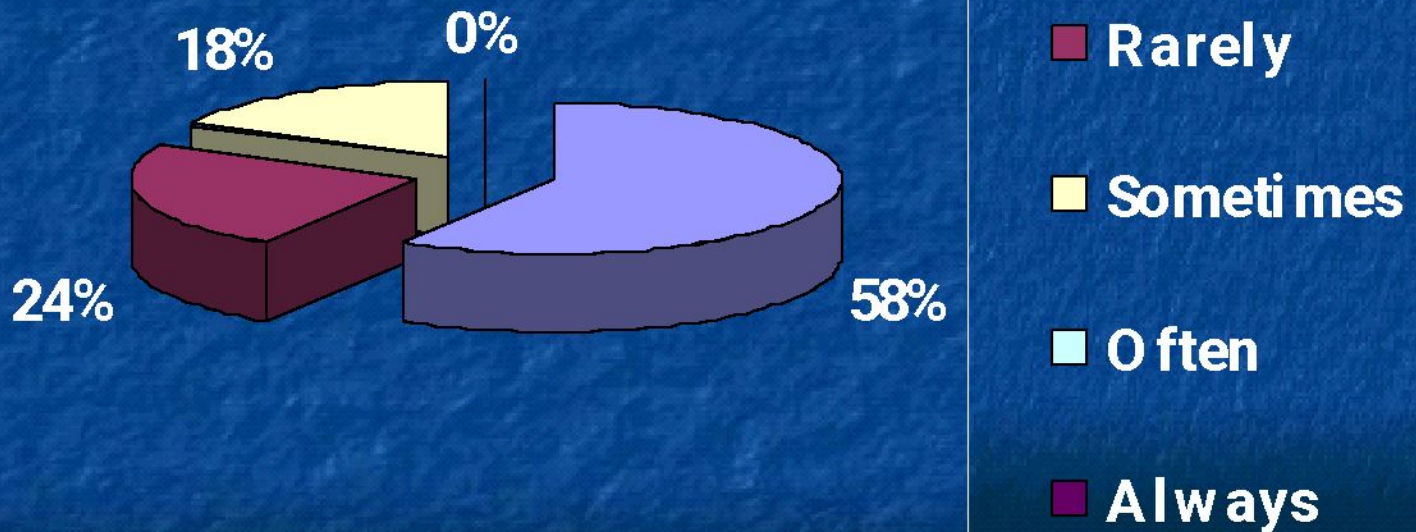

■ Do you take any drugs?

■ Do your parents approve your friends?

■ Do you miss classes?

- To sum everything up, I'd like to say that all the problems which face teens are solvable. You needn't be afraid of asking for someone's' help. I'm sure nobody rejects you.
