

FINANCIAL STATEMENTS

What do we *already* know about financial statements (FS)?

- ▣ FS are intended for external users.
- ▣ FS contain summarised information.
 - ▣ FS reflect the company's past.
- ▣ FS are prepared on a regular basis.
 - ▣ FS are required by law.
- ▣ FS are prepared in accordance with GAAP.

The **objective** of general purpose FS is
to provide information about

the **financial position,**
financial performance,
and **cash flows** of an entity

that is useful to a wide range of users in
making economic decisions.

Set of financial statements

- ★ 1) a statement of financial position (balance sheet)**
- ★ 2) a statement of comprehensive income
(income statement / profit and loss account)**
- ★ 3) a statement of cash flows**
- 4) a statement of changes in equity**
- 5) explanatory notes**

Assumptions

Accruals basis. The effects of transactions and other events are recognised when they occur (and not when cash is received or paid) and they are recorded in the accounting records and reported in the financial statements of the periods to which they relate.

Going concern. The entity is normally viewed as continuing its operation for the foreseeable future: the entity has neither the intention nor the necessity of liquidation or of curtailing materially the scale of its operations.

Qualitative characteristics

Fundamental characteristics

Relevance. Information influences the economic decisions of users and has predicative and confirmatory value.

Faithful presentation. Information must be complete, neutral and free from error.

Other characteristics

Comparability

Understandability

Timeliness

The background of the slide features a close-up, slightly blurred image of a white calculator on the left, a red pen with a silver tip on the right, and a document with handwritten numbers and blue checkmarks. The numbers visible on the document include 218, 527, 14.11, 99.77, 89.44, 1,500.00, and 11.56. The overall color scheme is light blue and white, with a yellow border at the top and bottom.

**No matter what transactions a
company enters into
the equation**

$$\textit{assets} = \textit{liabilities} + \textit{capital}$$

is ALWAYS true!

Things to remember...

- ✓ Internally generated intangibles (expertise of the staff, the reputation of the business) are NOT normally recognised as assets in the balance sheet.
- ✓ Net assets of a company (total assets — total liabilities) can be different from the value placed by the company's buyers.

THANK YOU!
