- Економіка підприємства./ За ред. Шегди А.В. К.: Знання, 2006. – 614 с.
- 3. Accounting standard # 3 "Financial results"

in English

http://en.wikipedia.org/wiki/Revenue http://en.wikipedia.org/wiki/Profit_%28accounting%29 http://en.wikipedia.org/wiki/Income http://en.wikipedia.org/wiki/Financial_ratio http://en.wikipedia.org/wiki/Income_statement

Revenue

- □is the amount of money a company receives in exchange for its goods and services.
- is usually listed on the first line of the income statement as revenue, sales, net sales or net revenue.

"Other Revenue" is money a company receives for activities that are not related to its original business. For example, if a clothing store sells some of its merchandise, that amount is listed under revenue. However, if the store rents a building or leases some machinery, the money received is filed under "other revenue."

Profit

□ is that money that your business retains after all expenses have been paid and accounts have been settled.

Is financial benefit that is realized when the amount of revenue gained from a business activity exceeds the expenses, costs and taxes needed to sustain the activity.

Calculated as:

PROFIT = TOTAL SALES less TOTAL COSTS

Sales	Costs	Profit or Loss?
£100,000	£75,000	£25,000 (profit)
£100,000	£125,000	£25,000 (loss)
Total sales greater than total costs Total costs greater than total sales Total sales = total costs		= Profit = Loss = Break-even

Revenue

- VAT
- Excise duty
- = Net revenue
- Production costs
- = Gross profit

Gross profit

- + other operating revenues
 - administrative expenses
 - selling expenses
 - other operating expenses
 - = Financial results of operation activity

Financial results of operation activity

- + yield on capital
 - + other financial incomes
 - + other incomes
 - financial losses
 - capital losses
 - other losses

= Financial results of main activity before taxation

Financial results of main activity before taxation

- income tax
 - = Financial results of main activity
- +/- extraordinary incomes or losses
 - taxation of extraordinary incomes
 - = Net profit / losses

Gross profit equals sales revenue minus costs of good sold (COGS).

Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) equals sales revenue minus cost of goods sold and all expenses except for interest, amortization, depreciation and taxes.

Earnings Before Interest and Taxes (EBIT) or Operating profit equals sales revenue minus cost of goods sold and all expenses except for interest and taxes. It is also known as Operating Profit Before Interest and Taxes (OPBIT) or simply Profit Before Interest and Taxes (PBIT). Earnings Before Tax (EBT) or Net Profit Before Tax equals sales revenue minus cost of goods sold and all expenses except for taxes. It is also known as pre-tax book income (PTBI), net operating income before taxes or simply pre-tax Income.

Earnings After Tax or Net Profit After Tax or Net Income equals sales revenue after deducting all expenses, including taxes.

Income before extraordinary expenses represents the same but before adjusting for extraordinary items. Earnings After Tax (or Net Profit After Tax) minus payable dividends becomes Retained Earnings.

- Evaluation characterizes effect of economic activity
- Distribution distribution of income between company and budget
- Promotional a source for promotion
- Reproductive a source for extended reproduction of capital and circulating assets

- Changes in
- sales
- structure of assortment
- prices of goods
- prices of raw materials
- I level of inputs of material and labour resources

Economic diagnostics – analysis and evaluation of results of activity of the enterprise based on study of individual results and incomplete information with the purpose of exploration of possible perspectives of development and consequences of current management decisions

- Enterprise utilizes existing assets effectively
- Enterprise pays off its debts in time
- Enterprise is profitable

Full-scale financial analysis of results of economic activity of the enterprise

- Horizontal by years
 Vertical internal structure
- Financial ratios

- balance sheet
- income (financial results) statement
- cash flow statement
- equity capital statement
- notes on annual financial accounts

- Operational analysis
- Analysis of operational expenses
- Analysis of assets management
- Liquidity analysis
- Analysis of long-term solvency
- Profitability analysis

Gross Profit Margin=	Gross Profit	Net Sales – COGS
	Net Sales	Net Sales
Return on Sales =	о т	
Operating Income		
Net Profit Margin =	Net Sales	S
Net Hont Margin -	Net Profit	
	Net Sales	

Profitability ratios

Return on equity (ROE) =
$$\frac{2*Net \text{ income}}{\left(\begin{array}{c}Shareholders\\equity \text{ beginning}^+\end{array} + \begin{array}{c}Shareholders\\equity \text{ equity ending}\end{array}\right)}$$
Return on assets (ROA) =
$$\frac{2*(Net \text{ income})}{\left(\begin{array}{c}Total\\assets \text{ beginning}^+\end{array} + \begin{array}{c}Total\\assets \text{ ending}\end{array}\right)}$$

Return on capital (ROC)= $\frac{\text{EBIT}(1 - \text{Tax Rate})}{\text{Invested Capital}}$

Current Ratio =

Current assets

Current liabilities Quick Ratio ("Acid Test")=

Cash + Marketable securities + Accounts receivable

Current liabilities Absolute Liquidity Ratio =

Cash Cash and Marketable Securities Current Liabilities Current liabilities
