

# Facebook – a friend or foe

Evelina Miščin  
evelinamiscin@yahoo.co.uk

- Advantages and disadvantages of using Facebook
  - - advantages:
  - - it can enlarge your vocabulary
- 

- ▣ defriend                      social swarming
  - ▣ fakester                      tweetup
  - ▣ meformer                      mindcasting
  - ▣ MoSoSo                      social networking fatigue
  - ▣ pity friend                      SoLoMo
  - ▣ socially produced      social networking
- 

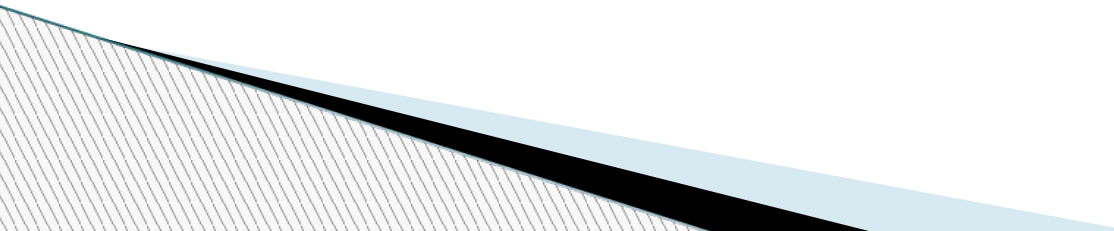

- Defriend - to remove a person from one's list of friends on a social networking site
  - Fakester - a person who puts up a profile on a social networking website that contains false or misleading information
  - Meformer - a social network user who posts updates that mostly deal with the user's activities, thoughts, and feelings
- 

- MoSoSo - mobile social software; a program that enables you to use your mobile phone to find and interact with people near you
  - Pity friend - on a social networking site, a person whose friend request you accept out of pity
  - Socially produced - created in collaboration with other people, particularly by using a Web site designed for such a purpose
- 

- Social swarming - the rapid gathering of friends, family, or colleagues using technologies
  - Tweetup - a real world meeting between two or more people who know each other through the online Twitter service
  - Mindcasting - Posting a series of messages that reflect one's current thoughts, ideas, passions, observations, readings, and other intellectual interests
- 

- Social networking fatigue - mental exhaustion and stress caused by creating and maintaining an excessive number of accounts on social networking sites
  - SoLoMo - mobile phone apps that combine social networking and location data. [*Social + location (or local) + mobile.*]
  - Social networking - Surfing a social networking site instead of working
-
