

# HIGHER EDUCATION in Britain

# HIGHER EDUCATION

Higher education begins at 18 and usually lasts three or four years.

Students go to universities, polytechnics or colleges of higher education.

# OXFORD

Oxford University is the oldest and most famous in Britain. It was founded in the 12-th century and is a collection of colleges with more than 12,000 students and 1,000 teachers.

# CAMBRIDGE

**Cambridge is the second oldest. It was founded in the 13-th century and has 27 colleges**

In the UK higher education academic year begins in October and consists of the trimesters of 8-10 weeks each.

Summer holidays last for four months, from June 1 to September 31.

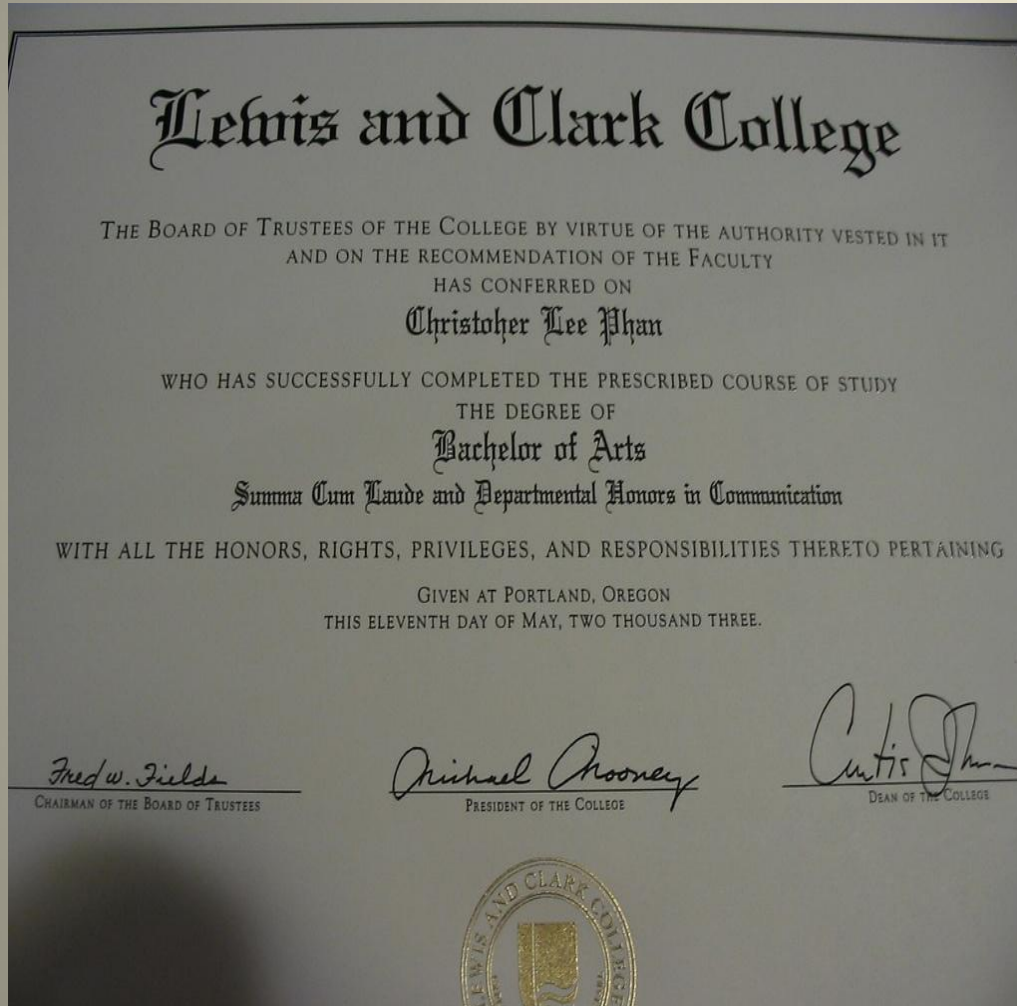

In most cases the examinations shall be after the 1st and 3rd year of study, usually two major exams, the results of which are awarded the degree.

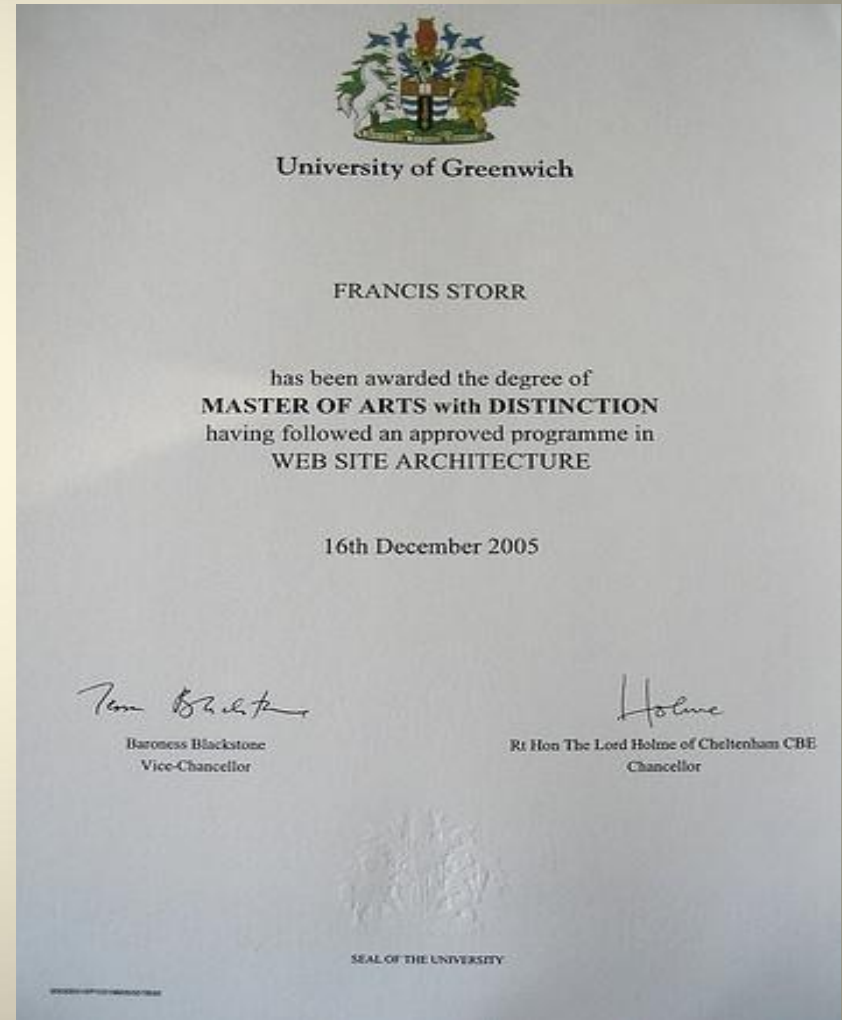

# British bachelor

British bachelor's degree is recognized throughout the world and gives high chances of a successful career in any country. This is the first stage of higher education.

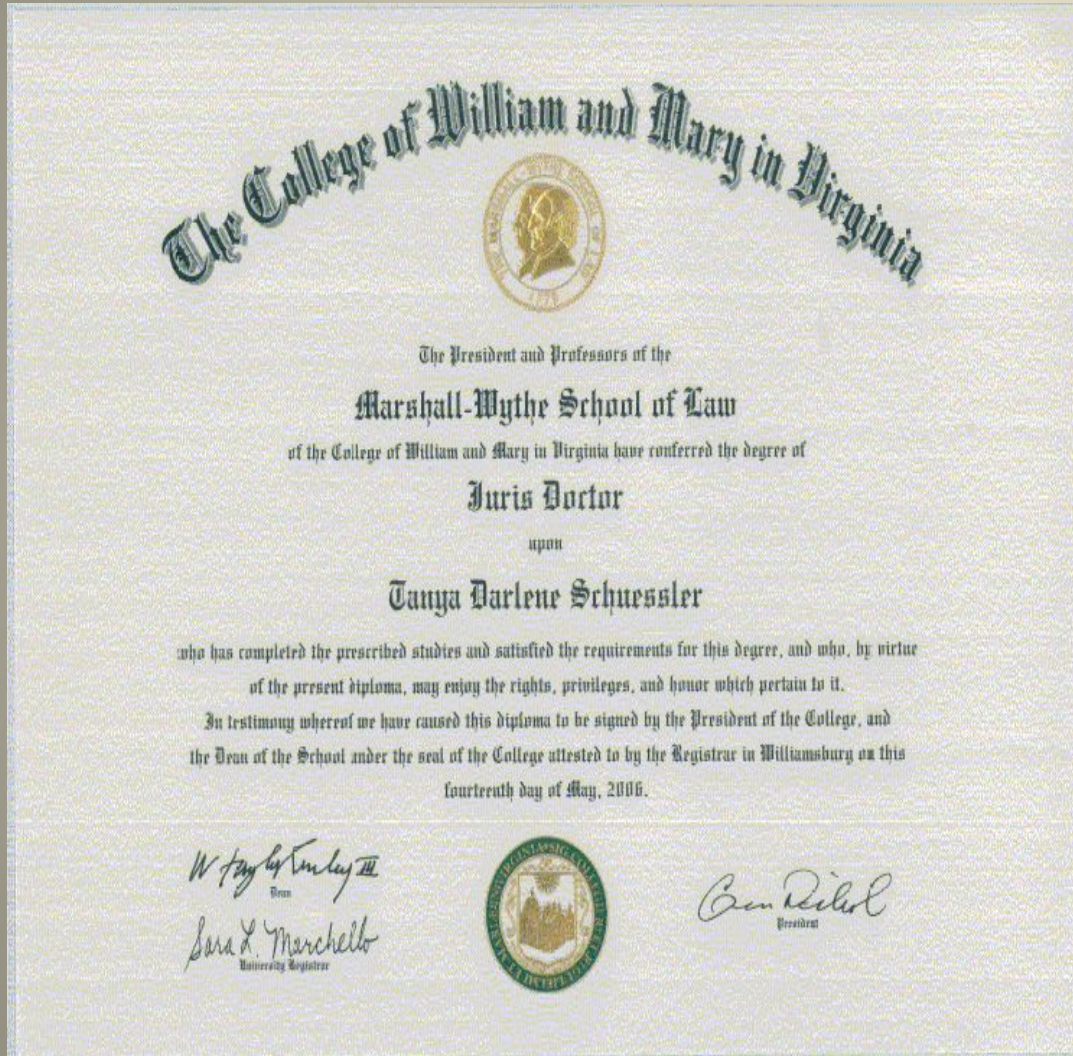

# British Master

Master's degree (second step) can be obtained by studying for one of two programs. Listen to the lectures and seminars at the end of exams, a thesis project and defend it or do yourself some research work for 1-2 years under the guidance of the supervisor (the supervisor) and the results of this work, you can assign a master's degree.

# British Doctor

The highest degree is a doctorate degree. Supervisor selects the topic of the research project, student's working on it for 2-3 years, and then publishes reports on the results of their work in scientific journals or websites, and published materials written thesis, which will protect them. If the dissertation is successful, then earned a doctorate.
