

Money makes world go round

It is well-known, that world is spinning around us every second of our life. And not the world only; all about it is also spinning around. So it may be said that the world includes people and all that people do: every people's invention and innovation.

Lets look into the well-known term "money".

From the very beginning people set the idea of value, therefore the prototype of money appeared. Did it work out or not we can see nowadays.

As an example the Starbucks Company was formed in 1971 in the Seattle. Initially, it was a little coffee house. In the 1990s, Starbucks was opening a new store every workday, a pace that continued into the 2000s. The first store outside the United States or Canada opened in the mid-1990s, and overseas stores now constitute almost one third of Starbucks' stores. The company planned to open a net of 900 new stores outside of the United States in 2009, but has announced 900 store closures in the United States since 2008.

Nowadays we can watch the Starbucks Coffee Company spreads all around the world: Africa, North America, Central America, Caribbean, South America, Oceania, Asia and Europe.

Global success rules the world. But in my opinion not money rules the world. Money is just a means of people's developing. It helps us to make own aims, to reach them and to develop again.
