

The Project «My Subculture»

is prepared by Bogusheva Alexandra,
10 "a" class,
school N° 4

Music

They listen to music, which is full of sounds of cello, violin, viola and piano; also they listen to electric guitar accompaniment for the pure vocal.

The new subculture is «pure»

Style

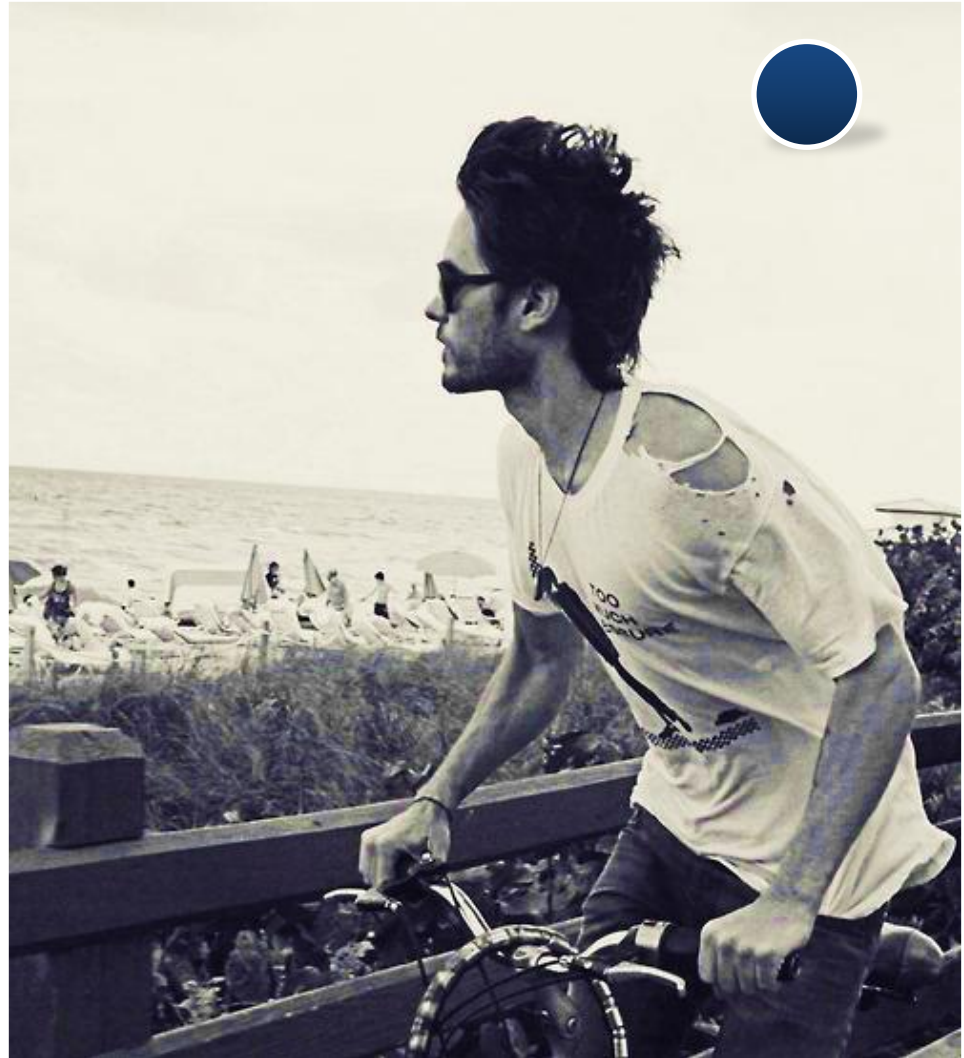

"Pure" is the union of people who wear white clothes, because they believe that white is the color of purity, freedom and peace.

They do not have a bright make-up, they always look naturally and neatly.

They have a classic style in everything.

Object of their life is to follow the dream.

They are very independent, and they are philosophers.

Their religion: One God

They believe that all religions are branches of the original belief in one God

Their slogan: “Have pure soul and you will never get problems“

They study all aspects of art on one's Jack, they do not go to schools

They want to realize themselves, they strive for perfection, which does not exist.

Freedom

These people pay special attention to freedom.

They prefer loneliness so long until they haven't had something new, something great for themselves until they reach at least one of their "great" goals

They constantly travel around the world in the search of the place where they will feel themselves really free.
