My university studies.

Petrozavodsk State University is the largest educational institution in the European part of northern Russia. It was founded in 1940. Its graduates have become academicians, ministers, world-famous specialists in culture and science.

I have entered the university this year. The academic year began on the 12th of September. In July I passed my entrance exams (USE) . I have managed to cope with the USE requirements in all exams subjects. I was accepted to the University. Now I am the first-year student of the agrotechnical faculty. I'll be in the specialty commodity.

There are 19 students in my group. I met many interesting people at the university. I have new friends who always help to cope with problems and I'm always ready to help them. It seems to me that from the first day we became friends.

I'm happy that I'm study at this university!

Thank you for your attention.
