The role of computers in our life

- Computers very changed our life since the late 20th century.

- Of course, the computer has simplified our life. Now we can immediately send and receive messages, copy, paste, delete information by clicking.

- My family uses a computer, most Internet. Because it helps to prepare for the lessons. We also play games on the computer.

BUT!

Computer is bad, if not to follow the rules:

- 1. Take a break.
- 2. Every 10 minutes to do a workout for the eyes.
- 3. Hold the posture.

- Computers have come into our lives, soon they will take center stage in our lives. Internet will be the largest source of information.
