Education in the USA

Education in the USA drastically differs from many other countries.

Education in the USA

There are 50 states in the country and each of them has its own peculiarities. So the national system varies from state to state.

Education in the USA

Children study at Elementary school till they are 16. After that, they can go to secondary school, which is also known as high school.

Education in the USA

Many high schools offer selective subjects for those students who want to enter a specific college or university after school graduation.

Education in the USA

The majority of American pupils continue their studies after school. Some go to the college, some to the university.

Education in the USA

Studying at college lasts for four years,
and after that the student gets a
Bachelor's degree.

Education in the USA

Studying at university may take four or more years. After four years the students also get the Bachelor's degree in Arts or Science.

Education in the USA

Some students, who wish to continue studying, go on for a Master's degree. Studying at American colleges and universities requires certain tuition fees.
