

**TYPES OF ICTS ARE COMMONLY  
USED IN EDUCATION  
(E-LEARNING, BLENDED  
LEARNING, DISTANCE  
LEARNING...)**

---

# INTRODUCTION

---

**ICT has a great impact on education as well as other aspects.**

**ICT in education has both positive as well as negative impact on students and teachers.**

# **Positive impact of ICT on education.**

---

- 1. Ensures life long learning.**
- 2. Also enables distance learning.**
- 3. We can access teaching materials and experts from all over the world.**
- 4. It has the ability to perform impossible experiments by using stimulations.**

# E education

**Life long learning can be ensured by E education.**

# What is E-Learning?

- E-learning refers to the use of Internet Technology to deliver and enhance knowledge, skills and know-how.
- It is a new approach to learning where the Learner has control over What, When and Where he/she Learns.
- E-learning can be an initiated program in a corporation, institution or at individual level

# What is blended learning?

---

Another term that is gaining currency is blended learning.

This refers to learning models that combine traditional classroom practice with e-learning solutions.

For example students in a traditional class can be assigned both print-based and online materials, have online mentoring sessions with their teacher through chat and are subscribed to a class email list

# Distance learning

**It also enables distant learning i.e. a teacher teaching his students through the use of ICT even though geographically dispersed.**

# **Video Conferencing**

**We can consult to many experts by video conferencing.**

# Ability to perform impossible experiments

**Some of the impossible experiments in the field of medicine, engineering and industry can be performed easily with the help of ICT.**

---

**5. Possibility for students to have individual learning.**

**6. Man power problem and human problems can be avoided by conducting online examinations.**

**7. The curriculum, information about text books, reference books and references are available using ICT.**

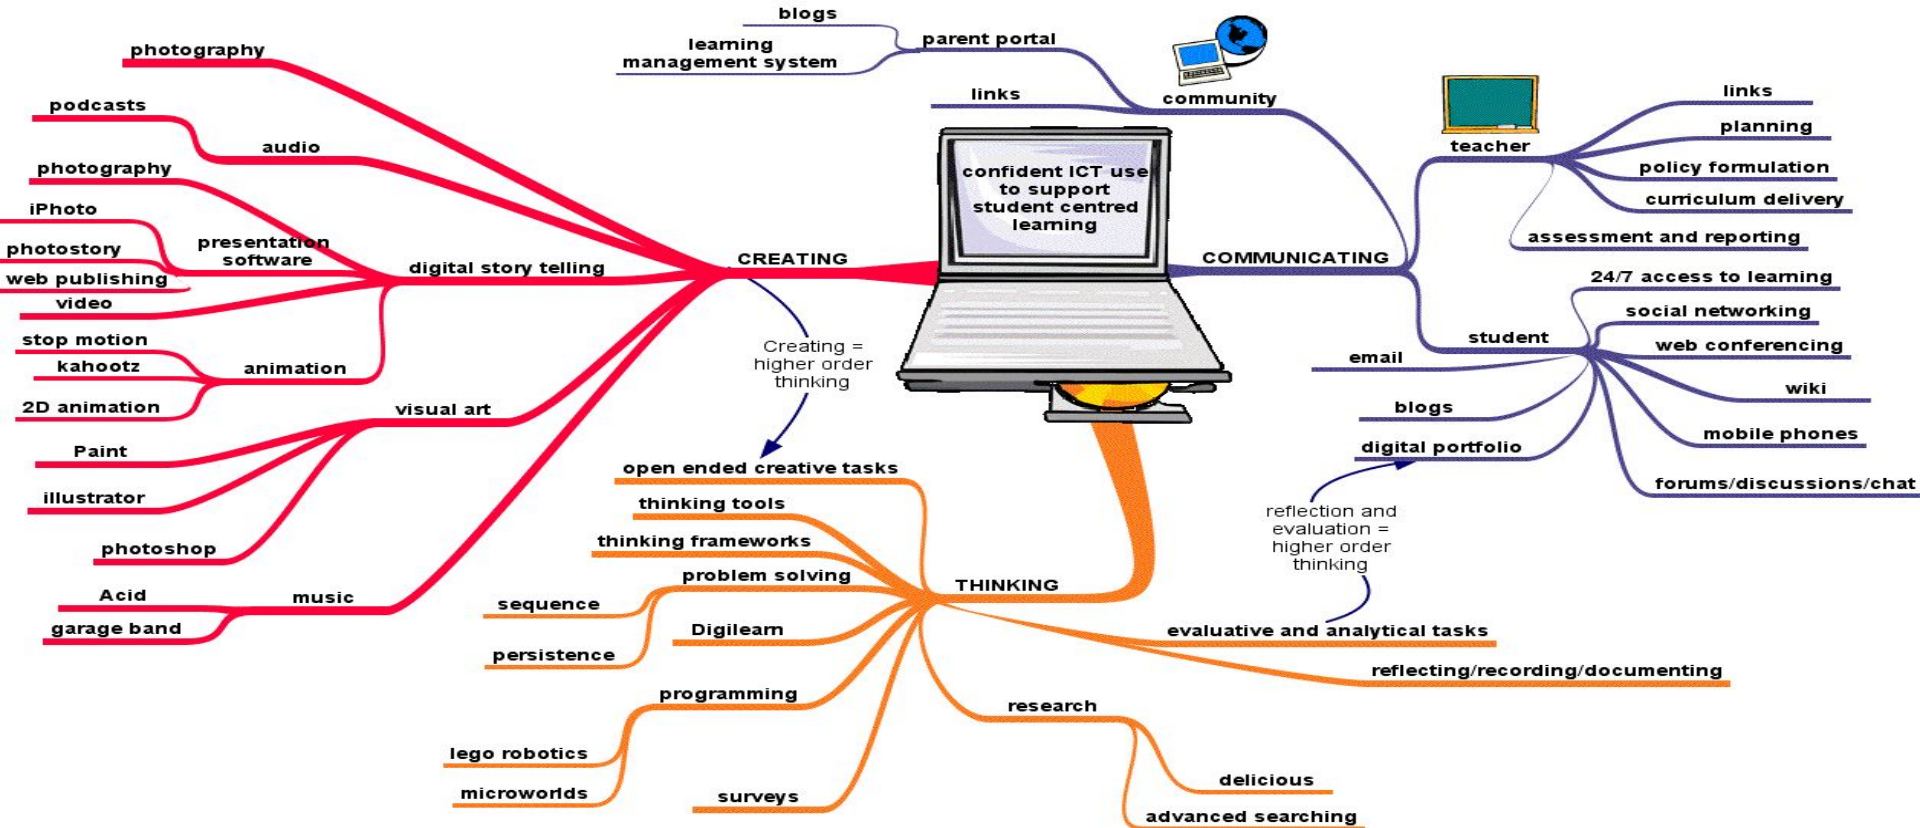

**Individual learning**

# Online Examination

**Online examination for man power problem and human mistakes.**

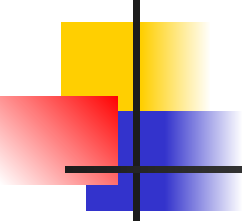

**Internet (ICT) is the source of every type of information especially it is the best for taking reference on any topic.**

# **Negative impact of ICT on education**

---

- 1. There are large costs involved.**
- 2. Students, and sometimes teachers, can get hooked on the technology aspect rather than subject content.**
- 3. A child's imagination power decreases i.e. the ability to imagine vanishes.**

# Conclusion

---

**As every good thing has a bad thing, in the same way ICT also has both positive as well as negative impact on education. But the use lies in our hands whether to use ICT in a useful manner or have its negative impacts on our life.**

**THANK-YOU**
