

Texting And Driving

19 Facts You Need to Know

It's especially scary given the fact that 1.5 million teens and adults were in some kind of accident driving while "intexticated" -- texting that last precious "LOL" or "TTYL." It takes just five seconds for one's attention to be diverted from the road. Five seconds!

Driving while texting, emailing, face booking and tweeting are twice as dangerous as previously thought according to a new on-road study.

Following are 19 facts you might not know about texting and driving.

A photograph of a football field at night, illuminated by several bright stadium lights. The lights are arranged in a semi-circle above the field, casting a strong glow on the green grass and the white yard lines. The sky is dark, and the overall atmosphere is dramatic and focused on the field.

FACT #1

Five seconds is the average time your eyes are off the road while texting. When traveling at 55mph, that's enough time to cover the length of a football field.

FACT #2

FACT #19

Almost all teens (9 in 10) expect a reply to their text within five minutes, which puts pressure for a response while driving.

A green rectangular sign with rounded corners and a white border is mounted on two wooden posts. The sign features the text "Don't Text & Drive" in a white, sans-serif font. The background of the image is a bright blue sky filled with fluffy white clouds, with a bright sun partially obscured by a cloud on the right side.

Don't Text
& Drive
