Car buyer trends

Online car buyers are making purchase decisions faster...

...because so much information is now easily available online.

Information gathering is expensive because no single site covers everything.

But independent auto sites are valued the most for their objectivity.

Brand and Model choice can be influenced during the buying process

How CUSTOMIZABLE is the program?

- What are the territory configuration options:
 - ✓ Can I build a program for just one model?
 - ✓ Can I design a model-specific program that allows me to select ANY area (*e.g. zip code(s)*, where I'd like to be seen by its online shoppers)?
 - ✓ Can I create a territory that DEFENDS my PMA, AND allows me to selectively CONQUEST in different markets? Can I do this by Model? By Zip Code?
- How frequently can I CHANGE the programs parameters:
 - ✓ the model(s) chosen?
 - ✓ the territories (e.g. zip codes)?
 - ✓ the amount of \$'s that I'm spending?
- Can the partner provide an accurate LEAD ESTIMATE for the program, in territories that I want, over time, FAST?

What are the territory configuration options

Territories using a "Radius" around the dealership

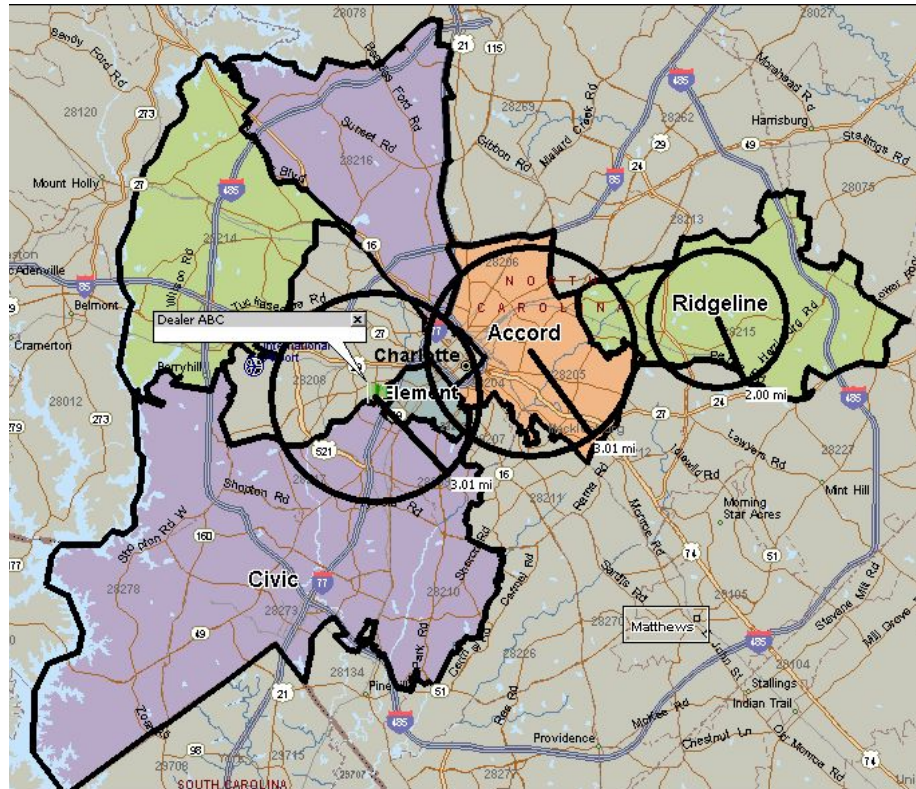

Territories to get into new market areas with unsold opportunities (based on consumer demand) to help you with your conquest marketing strategy.

Territories by Zip at the Model Level...

Territories that can EXCLUDE zip that you don't want

Can I create unique/different territories for each model?

Can I create a flexible “campaign” that’ll give me maximum control of my investment?

Can I create a **campaign** where I can:

1. Select a specific MODEL(s) to focus on?
2. Market to a precisely defined AREA (e.g. zip code range)?
3. Set a specific amount of TIME for the campaign to run?
4. Set a specific (not to exceed) BUDGET?
5. Set up the campaign to run in addition to my “base” program (e.g. for other models?)

How much key insight do you get and how easy is it to understand?

- Can I get real time insight into how my program is performing for me?
- How relevant, and understandable, is the information to me?
- Will it give me a sense of how I'm doing compared to others in my market

Do I get access to insight and important metrics when I want it?
