

"We aren't addicted to
oil, but our cars are."

- James Woolsey

DO'S

AND

DON'TS

IN

AUTO TRANSMISSION

Do's

Don'ts

Using good quality transmission cooler

Maintaining a properly tuned engine

Maintaining proper fluid level

Using emergency brake while parking on an incline

Checking problems right away

Using Automatic Transmission as a brake

Engaging Manual Shifts

Towing over the vehicle's towing limit

Over filling your transmission

Driving vehicles with auto-transmission problem

Did you know that there is no need for a transmission flush, if you do frequent engine oil and filter changes, and service the transmission every 15,000 miles?

**Did you know that heat is the main enemy of short car lifespans?
Maintain your fluid temperature at over 175 degrees Fahrenheit to extend your mileage to about 100,000 miles**

Tips for Avoiding Transmission Problems

-  **Drive gently**
-  **Service your transmission regularly**
-  **Check your filters and transmission fluids regularly and change them when needed**
-  **Pay attention to manufacturer recommendations**

**“If you look after your
car, your car will look
after you”**
