COMPULSORY EDUCATION

- The Law on Nine-Year Compulsory Education. it took effect on July 1, 1986, established requirements and deadlines for attaining universal education tailored to local conditions and guaranteed school-age children the right to receive at least nine years of education (six-year primary education and three years secondary education).

COMPULSORY EDUCATION

- Education is free and compulsory for 9 years in China, split between Primary and Junior middle school at the age of 6-15. many children start their schooling at a nursery school (called Kindergarten in China) as early as 2 years old.
- **2-6:** Kindergarten
- **6-12:** Primary school (compulsory)
- **12-15:** Junior middle school (compulsory)
- **15-18:** Senior high school (middle school) or Vocational school
- **18-22:** University or college

COMPARISON:

□ 9 year compulsory education

VS

□ no compulsory education

AGE DISTRIBUTION

- age 3-5 Pre-school or play group, kindergarten etc
- 6-10 Primary education till 1 grade to five
- 11-14 Elementary education till 6 grade to 8th grade
- 15-16 Secondary education grade 9th & 10th
- 17-18 Higher secondary or intermediate grade 11th & 12
- 18-22 Higher education

GRADES OF EDUCATION

Education in China is divided into four categories

- basic education
- secondary vocational-technical education
- regular higher education
- adult education.

Basic education:

- Kindergarten

- Primary

Primary schooling usually lasts six years.

- secondary

Junior secondary

Senior secondary

with each usually lasting three years.

SECONDARY VOCATIONAL-TECHNICAL EDUCATION:

- Secondary vocational training provide short-term vocational programs of finance and economics, physical education, and arts.
- Technical training provide medium-level skilled workers, farmers, as well as managerial and technical personnel.
- Both have 3 or 4 years programs

Regular Higher Education:

- Higher education is provided by institutions of various types including general universities, technical universities, specialized institutions and teacher-training colleges.
- Regular higher Education provide graduate courses like the bachelor's degree, and postgraduate programs like the master's degree, and the doctorate degree.

Adult Education:

- Adult education provide non-formal programs including literacy education and vocational and technical training. Like staff , correspondence, workers for primary school and secondary school and universities.
- The agencies responsible for China's adult education include various ministries or commissions under the State Council, educational departments of provinces, business or industrial departments at different levels, such as machinery electronics, light industry, coal-mining, metallurgy, railways, communication, agriculture and forestry..

Examination System Analysis

- Semester system is used in the examination system.

Basic education:

Primary:

- The academic year is divided into two semesters, each consisting of 19 weeks, with a total of 38 weeks of instruction for the year.

Secondary:

- The academic year is divided into two semesters for junior middle school and senior middle school consists of 39 or 40 weeks of instruction, with one week in reserve.

Vocational and Technical education:

- Semester system is used and each year has two semester. It includes 39 or 40 weeks.

Adult education:

- Semester system is used and each year have 2 semester. It includes 39 or 40 weeks.

- Semester system is used in colleges and universities.
- Three semester system dividing the academic year.
 1. Fall term (September to December)
 2. Winter term (January to April)
 3. summer term (May to August)

Administrative structure

- Ministry of education
- Education commission bureau of higher education of provinces
- Education commission at city level
- Education commission at county level
- Education commission at township level

Ministry of education:

- Universities are under the ministry of education

Education commission of bureau of higher education of provinces:

- higher education
- Primary and secondary education
- Vocational education
- Adult education

Education commission at city level:

- Key primary and secondary schools
- Secondary vocational schools
- Adult schools

Education commission at county level:

- Primary and secondary schools
- Rural vocational schools

Education commission at township level:

- Preschools
- Primary and secondary schools
- Rural vocational schools

Teacher education

There are two main categories of teachers in China.

- state-paid teachers
- community-paid teachers

The system of teacher education comprises two distinct subsystems:

- Pre-service
- In-service

Teacher Education

There are two main categories of teachers in China.

- The first category is state-paid teachers who are regarded as state employees and earn a regular monthly salary comparable to other civil servants or workers in state-owned enterprises.
- The second category is the community-paid teachers who are paid by the local community. Their monthly income depends on the economic conditions of the local community.

Pre-service:

- Pre-service education is housed in monotechnic colleges or specialized teacher education institutions. This is a four-year bachelor's degree.

In-service:

- The in-service teacher education is organized at city, country and township colleges or schools. This is a two-to three-year diploma program.

- After 9 year compulsory education there was a huge lack of trained teachers. It was needed that institutions should be made for producing teachers. Till 1990 1000 teacher training institutes were made and by the passage of time those gradually increased.

INDUCTION

- induction programs are irregularly conducted in china as when novice teacher go for job, a group is made of novice teacher and experienced teacher. Then there practical teaching begins. Time period also vary at different places. Some times it is one or two year and several short periods, such as a half year, or several periods of ten days, or some workdays in the semester.

ADMISSION PROCEDURE

- At Initial stages procedure of admission is simple as completion of previous class is necessary.
- but at higher level some special tests are taken.
- Important one is GOA KOA or high test. It is organized in July for getting admission in university. It is equal to SAT.

GAO KAO

- The gao kao (pronounced gow kow) roughly translated means “the high test”. The *gaokao* is China’s, ultra-competitive university entrance exam. Its the nine-hour test is offered just once a year and is the sole determinant for admission to virtually all Chinese colleges and universities.
- Taken at the end of high school, the gaokao is given over a three day period across the country. It emphasizes math and science but also measure knowledge of written Chinese, English and Marxist thought.
- about 9.15 million students who took the gaokao in 2012. Only 60% make it into university on the basis of their *gao kao* score

PREPARATION FOR THE HIGH TEST

EXAMINATION HALL

CHINA'S CURRICULUM

- it carries various educational philosophies like of Dewey, Montessori, skinner, Thorndike, Bruner and especially Vigotsky and piaget etc.
- If we think about it we suppose that china have a effective curriculum in his education. And the progress report supports it also.
- it has gain a special name in technology.
- but a complaint from students has also appeared that china's tough education and examination system enhanced cramming.

THE CHINA

- China's education is as refined as the country it self. Its at 11th number on world ranking.
- It has not only helped its own students to study but it invites foreign students too.
- around the 300,000 foreigner students study at China.
- And approx 340,000 Chinese study abroad too.
- China the world's sixth-largest study abroad destination.
- America has signed an agreement to send its 100000 students to study in China.

I thank
you!
