node (story) - Ea lobortis lobortis nibh vel. Secundum esse damnum. Cui exputo illum. Refoveo paulatim quia ea quadrum.Acsi abluo verto. Suscipere persto iriure iaceo. Praesent te tego typicus fere venio adipiscing roto eum. Quia cui metuo melior quidem occuro populus. Pneum praesent quae iriure.

или http://drupal.org/project/admin_menu

The screenshot displays the Drupal 6 administration interface. At the top, a navigation bar contains the following links: Content management, Site building, Site configuration, Generate items, User management, Reports, Help, 0 / 1 (with a user icon), and Log out demo. Below this is a blue header with the Drupal logo and the word "demo". On the left side, a sidebar menu is visible under the heading "demo", listing: My account, Create content, Administer (expanded), and Content management (expanded). Under "Content management", the following items are listed: Comments, Content, Content types, and Post settings. The main content area shows a single entry titled "Dignissim Lobortis Lobortis" in blue text. Below the title is the date and time "Tue, 08/25/2009 - 19:36" followed by "— demo". The body of the entry contains a paragraph of Latin text: "node (story) - Nibh vel secundum esse. Damnum cui exputo illum refoveo. Paulatim quia ea quadrum acsi abluo verto suscipere persto iriure. Iacedo praesent te tego typicus fere venio adipiscing roto eum. Quia cui metuo quidem occuro populus. Pneum praesent quae. Iriure appellatio proprius imputo saluto damnum accumsan esca. Интеграция с Devel

The screenshot displays the Drupal administration interface. At the top, a navigation bar includes links for Content management, Site building, Site configuration, Generate items, User management, Reports, and Help. The user is logged in as 'demo' (0 / 1 users) and can click 'Log out demo'. A dropdown menu is open, listing various administrative tasks: Flush all caches, Variable editor, Run cron, Run updates, Disable developer modules, and Drupal.org. A secondary menu is also visible, containing Administration menu, Cache tables, Menu, Page requisites, and Theme registry. On the left, a sidebar menu for the 'demo' user shows options for My account, Create content, and Administer. Under Administer, the Content management section is expanded, showing sub-items: Comments, Content, Content types, and Post settings. The main content area displays a post titled 'Dignissim Lobortis Lobortis' from Tuesday, 08/25/2009 at 19:36. The post content is a block of Latin text: 'node (story) - Nibh vel secundum esse. Damnum cui exputo illum refoveo. Paulatim quia ea quadrum acsi abluo verto suscipere persto iriure. Iacedo praesent te tego typicus fere venio adipiscing roto eum. или http://drupal.org/project/nice_menus

или <http://drupal.org/project/simplemenu>

The image shows a screenshot of a Drupal website interface. At the top, there is a navigation bar with links: Code review, Create content, Recent posts, My account, Administer, and Log out. The 'Administer' link is highlighted, and a dropdown menu is open, listing various administrative tasks: Content management, Site building, Site configuration, User management, Logs, and Help. The 'Site configuration' option is further expanded to show a list of settings: Administration theme, Clean URLs, Code review, Date and time, Error reporting, File system, Image toolkit, Input formats, Performance, Search settings, SimpleFeed, SimpleMenu, Site information, and Site maintenance. On the left side, the Drupal logo and the word 'Drupal' are visible. Below the logo is a search box with a 'Search' button. A user profile for 'ted' is shown, with a list of links: Code review, Create content, Recent posts, My account, Administer, and Log out. In the center, there is a post titled 'Happy Thanksgiving?' by 'ted' from November 22, 2007. The post content includes a snippet about a friend's sacrifice and a reference to Buffy. Below the post, there is an 'Expires: 1 day' notice and a list of links: Add new comment, Read more, mom blog network, and Source.

Navigation

- Administer
 - Administer
 - Content management
 - Site building
 - Site configuration
 - User management
 - Help

This site shows you the functionality of DHTML Menu. You can navigate the administration menu and the books dynamically, and you can adjust the DHTML Menu settings below.

This site is running Drupal 6.x-dev and DHTML Menu 6.x-3.x-dev.

DHTML Menu

DHTML Menu adds dynamic functionality to the menus of your site. Ordinarily, reaching the child elements below an item requires you to visit its page. With DHTML Menu, clicking on an item with child elements will expand it without leaving the page, saving time. You can reach the actual page of such an item either by double-clicking on it or visiting the small extra link that will be shown right below it when expanded.

DHTML Menu effects:

- Animated sliding effect
- Keep only one menu open at a time.
- For the above option, consider each menu tree separately.
- Close menus when their parent menu is closed.
- Add an extra page link to each expanding menu item.
- Go to the page on double-click

Modules

List Uninstall

The configuration options have been saved.

Modules are plugins that extend Drupal's core functionality. Enable modules by selecting the *Enabled* checkboxes below and clicking the *Save configuration* button. Once a module is enabled, new [permissions](#) may be available. To reduce server load, modules with their *Throttle* checkbox selected are temporarily disabled when your site becomes extremely busy. (Note that the *Throttle* checkbox is only available if the Throttle module is enabled.)

It is important that [update.php](#) is run every time a module is updated to a newer version.

You can find all administration tasks belonging to a particular module on the [administration by module page](#).

To extend the functionality of your site, a number of [contributed modules](#) are available.

Administration

Enabled	Name	Version	Description
<input checked="" type="checkbox"/>	Admin	6.x-1.0-beta3	UI helpers for Drupal admins and managers. Includes a special admin theme, custom admin header with JS support, and contextual admin links.
<input type="checkbox"/>	Administration menu	6.x-1.5	Provides a dropdown menu to most administrative tasks and other common destinations (to users with the proper permissions).

Blocks

List Add block

This page provides a drag-and-drop interface for signing a block to a region, and for controlling the order of blocks within regions. To change the region or order of a block, grab a drag-and-drop handle under the *Block* column and drag the block to a new location in the list. (Click and hold the mouse while hovering over a handle icon.) Since not all themes implement the same regions, or display regions in the same way, blocks are positioned on a per-theme basis. Remember that your changes will not be saved until you click the *Save blocks* button at the bottom of the page.

Click the *configure* link next to each block to configure its specific title and visibility settings. Use the [add block page](#) to create a custom block.

Tools

View name: *

edit_nodes

This is the unique name of the view. It must contain only alphanumeric characters and underscores; it is used to identify the view internally and to generate unique theming template names for this view. If overriding a module provided view, the name must not be changed or instead a new view will be created.

View description:

This description will appear on the Views administrative UI to tell you what the view is about.

View tag:

Enter an optional tag for this view; it is used only to help sort views on the administrative page.

View type:

Node

Nodes are a Drupal site's primary content.

Comment

Comments are responses to node content.

File

Files maintained by Drupal and various modules.

Node revision

Node revisions are a history of changes to nodes.

Term

Taxonomy terms are attached to nodes.

User

Users who have created accounts on your site.

The view type is the primary table for which information is being retrieved. The view type controls what arguments, fields, sort criteria and filters are available, so once this is set it **cannot be changed**.

3d-модели товаров доступны любому интернет-магазину

Дима, 23.07.2009 16:46

Сегодня на хабрахабре анонсировали сервис, который [собирает из фотографий 3d-модель](#). Демки *очень качественные*.

Чтобы быстро понять, что к чему, можно посмотреть видео <http://www.youtube.com/watch?v=bxlgOWyudE4>

У сервиса интересная [бизнес-модель](#): они хостят ваши модели у себя и берут за это абонентскую плату, вам отдают только код для вставки виджета на сайт (как ютьюб). На мой взгляд цены сейчас довольно высокие.

Однако, речь не об этом. Речь о том, что теперь интернет-магазины могут без особых проблем получить 3d-модели товаров. Это может стать фишкой сайта, а, значит, притягивать ссылки, повышать конверсию.

Смотрится суперски. Но для всей этой красоты нужен фотограф и все что к нему прилагается. На мой взгляд, при наличии фоток сделать такие вот флэш ролики можно и без этого сервиса; конечно если есть небольшие знания флэша.

Дима, 23.07.2009 18:49

Я только что понял, что это не настоящее 3д :) Просто ряд склеенных фотографий со стабилизацией. Фотоаппарат стоит на месте, а объект съемки крутят по чуть-чуть. И видимо сделать из них псевдо-3д можно даже средствами javascript.

Taxonomy Manager - pu

Search

Toolbar

Up Down Delete Add Move Merge CSV Export Double Tree

Moving of terms

You can change the parent of one or more selected terms. If you leave the autocomplete field empty, the term will be a root term.

Parent term(s):

Options:

Keep old parents and add new ones (multi-parent). Otherwise old parents get replaced.

Move Cancel

Up Down Delete Add Move Merge CSV Export Double Tree

Merging of terms

The selected terms get merged into one term. This resulting merged term can either be an existing term or a completely new term. The selected terms will automatically get synonyms of the merged term and will be deleted afterwards.

Resulting merged term:

Options:

- Collect all parents of selected terms and add it to the merged term
- Collect all children of selected terms and add it to the merged term
- Collect all relations of selected terms and add it to the merged term

In this example, the dropbox is enabled, and a title and limit are set for it. Also, the selection will not be reset after you add an item to the dropbox.

Try adding a term and you will get a warning, stating that you cannot select any additional items.

[Show config](#)

My car park: *

Car park

Nothing has been selected.

At least when I win the lottery ... twice.

In this example, the dropbox still is enabled, but you are no longer forced to select an item from the deepest level. Level labels have been entered. And the entire lineage is being saved. Finally, the ability to create new items is enabled.

Try adding Paris, you will see that France will be selected as well.

Also try creating some new terms, Hierarchical Select makes this trivially easy and painless.
