### Navigation

- Administer
  - Administer
  - Content management
  - Site building
  - Site configuration
  - User management
  - Help

This site shows you the functionality of DHTML Menu. You can navigate the administration menu and the books dynamically, and you can adjust the DHTML Menu settings below.

This site is running Drupal 6.x-dev and DHTML Menu 6.x-3.x-dev.

### DHTML Menu

DHTML Menu adds dynamic functionality to the menus of your site. Ordinarily, reaching the child elements below an item requires you to visit its page. With DHTML Menu, clicking on an item with child elements will expand it without leaving the page, saving time. You can reach the actual page of such an item either by double-clicking on it or visiting the small extra link that will be shown right below it when expanded.

#### **DHTML Menu effects:**

- ✓ Animated sliding effect
- Keep only one menu open at a time.
- For the above option, consider each menu tree separately.
- Close menus when their parent menu is closed.
- Add an extra page link to each expanding menu item.
- ▼ Go to the page on double-click

### Book navigation

### 3d-модели товаров доступны любому интернет-магазину

Дима, 23.07.2009 16:46

Сегодня на хабрахабре анонсировали сервис, который собирает из фотографий 3d-модель. Демки очень качественные.

Чтобы быстро понять, что к чему, можно посмотреть видео http://www.youtube.com /watch?v=bxlgOWyudE4

У сервиса интересная бизнес-модель: они хостят ваши модели у себя и берут за это абонентскую плату, вам отдают только код для вставки виджета на сайт (как ютьюб). На мой взгляд цены сейчас довольно высокие.

Однако, речь не об этом. Речь о том, что теперь интернет-магазины могут без особых проблем получить Зд-модели товаров. Это может стать фишкой сайта, а, значит, притягивать ссылки, повышать конверсию.

#### My tags:

Robotti, 23.07.2009 18:17

Смотрится суперски. Но для всей этой красоты нужен фотограф и все что к нему прилагается. На мой взгляд, при наличии фоток сделать такие вот флэш ролики можно и без этого сервиса; конечно если есть небольшие знания флэша.

изменить ответить цитировать unpublish

Дима, 23.07.2009 18:49

Я только что понял, что это не настоящее Зд :) Просто ряд склеенных фотографий со стабилизацией. Фотоаппарат стоит на месте, а объект съемки крутят по чуть-чуть. И видимо сделать из них псевдо-3д можно даже средствами javascript.
