UNIT 12 Cities at night

Reading 6

Buildings around the world

Cities look fantastic at night. In the evening the sun goes down. The sky gets darker and darker. Slowly the bright colours go, too. Everything looks grey. Then the lights come on. Silver metal shines and the colours are bright again. Cities look different at night. There are glittering lights and dark shadows. The buildings look beautiful.

Paris

This is Paris. It is the biggest city in France. In the middle of it stands a famous tower. It is 300 metres tall and more than 100 years old. It first opened on 6th May 1889. It looks like a tall metal giant. It is stainless steel in the middle of the city.

Shanghai

This tower is new. It is in Shanghai. Shanghai is a very big city in China. What does the tower look like? A space ship? A strange plane? Parts of the building are round. They look like huge shiny balls.

Moscow

This building is in Moscow. Moscow is the biggest city in Russia. There are many different towers and they are painted different colours. What do you think it looks like? Lots of giant ice-creams? An enormous cake? The colours are bright but this building is more than 450 years old.

New York

This is New York in the United States of America. There are many tall buildings in this city. New York is on an island. Buildings are close to each other. It looks like an enormous ship on the sea.

Dubai

Dubai is a city with many new buildings. It is in the United Arab Emirates. This tall building is a hotel. It opened on 1st December 1999. It looks like a ship's sail.

Упражнения на понимание прочитанного в Книге для учащегося, дополняются упражнениями в Рабочей тетради. Раздел *Study skills* содержит упражнения, которые формируют микроумения, необходимые для развития умений и навыков чтения.
