Reservoir Management Discussion Forum: Gas and Water Co-Production

[Open](#) | [Alert Me](#)

Subject	Gas and Water Co-Production
Body	<p>There is this mature gas+cond field, which injected almost half of cumulative gas production as dry gas, it is almost half of the original now, has approx 55% of recovery to date, wells tend to water out and some wells downdip still produce (heterogeneous). We believe there is still some additional potential by co producing such water with the gas ("sparkling water") in the sense that we could install some artificial lift as to keep the well flowing. Does anyone have some experience or a source where I could look out about a mature gas field being co produced in this sense? Thanks in advance.</p>

Preparing Your Technical Paper

When your paper is accepted for an SPE conference or symposia, you will receive an author kit. The author kit contains a Word template. Templates are meeting-specific, so it is important to use the template provided. The author kit also contains a number of forms, such as audio/visual requirements and [transfer of copyright](#), that you also must submit with your manuscript. Papers will be withdrawn from the program if the transfer of copyright is not received.

When you are submitting your manuscript, you will have the option to submit your paper for [peer review](#) (which selects papers for publication in SPE journals and is completely separate from presentation at the meeting). **DO NOT** do so automatically. Take the time to consider [whether your paper is a good candidate for peer review](#), and whether it falls into the [coverage areas of any of SPE's journals](#) (not all papers do). Many excellent meeting papers do not meet the criteria for peer review. If you choose to submit your manuscript for peer review, you will be asked to provide a justification for why your paper meets the criteria for peer review (i.e., what is innovative about your paper).

Video: You and SPE

Chris Carpenter, Managing Editor, Journals, explains why you can and should write a technical paper for SPE. This short video covers the whole process, including SPE paper guidelines, choosing a topic, the submittal process, style and grammar points, and more. [Watch now »](#)

Активность секции УГНТУ

- USPTU SPE SC впервые зарегистрирована в 2006 году
- Ежегодная международная выставка Russian Oil & Gas 2010
- Участие на форумах и конференциях других студенческих секций
- Программа «Выдающиеся лекторы SPE»
- В 2011 году сформирован состав действующих представителей секции
