Жизнь в облаке

Облачные вычисления

Облачные выступления – это способ доступа к данным и программам отовсюду через Интернет («облако»).

«Самая важная характеристика «облака» — отделение аппаратных средств от службы, — говорит Джон Уиллис, известный эксперт по вычислительному «облаку», местонахождение серверов не так важно, как простой доступ к данным. — Какое бы определение мы ни дали, в течение следующих пяти лет технология «облака» отразится на каждом предприятии, связанном с ИТ».
