About This Book

<< Previous | Next >>

"An exemplary textbook that can serve all professionals caring for cardiac patients." -- JAMA

With 35 new chapters as well as comprehensive updates throughout, the new edition of the cardiology masterwork represents the most complete revision to date. Hundreds of world authorities synthesize all of the developments that are revolutionizing practice--from the newest findings in molecular biology and genetics to the latest imaging modalities, interventional procedures, and medications. Plus, it now features a brand-new section on preventive cardiology, and a wealth of new contributors.

Информация для пациентов

The screenshot shows the MD CONSULT website interface. At the top, there are navigation tabs for 'Personal Information', 'Preferences', 'Reports', and 'Subscription'. The MD CONSULT logo is on the left, and 'Dr. L.' is on the right. Below the logo is a search bar with 'Patient Education' selected and 'fibromyalgia' entered. A navigation menu includes 'Home', 'Books', 'Journals', 'The Clinics', 'Patient Education', 'Drugs', 'Guidelines', 'Images', 'News', and 'CME'. The page title is 'Fibromyalgia'. There are buttons for 'Email to Colleague', 'Add to My Folder', and 'Print'. The main content area has two sections: 'What is fibromyalgia?' and 'How does it occur?'. The 'What is fibromyalgia?' section contains two paragraphs: 'The term fibromyalgia means pain in fibrous and muscular tissues. It is a chronic (ongoing) condition of pain, stiffness, and usually fatigue.' and 'Fibromyalgia affects several million people in the US. It is more common in younger adults, and more women have it than men.' The 'How does it occur?' section contains one paragraph: 'What fibromyalgia is exactly, or what causes it, is not known. Studies have shown that many people with the condition have abnormal brain waves (EEGs) during sleep. Others have less of the hormone called cortisol. Stress, anxiety, depression, illness, or poor sleep may contribute to the problem. The symptoms may get worse when you overexert yourself or when the weather is damp and cold.' On the right side, there is a 'Custom Header' section with 'MD Consult' and 'Dr. L. Barnes' contact information, a 'Customize Information*' button, and a note: '* Note: This customized heading will appear on all handouts.' Below that is a 'Special Instructions:' section with the text: 'Enter special instructions to display on the bottom of this handout.'

[[Patient Education](#)] [[Indications/Dosage](#)] [[Administration](#)] [[Contraindications/Precautions](#)] [[Interactions](#)] [[Adverse Reactions](#)] [[Monitoring Parameters](#)] [[Chemical Structures](#)]

Classification:

- ▶ Antinfective Agents
 - ▶ Macrolides

Description: Azithromycin is a semisynthetic antibiotic belonging to the macrolide subgroup of azalides and is similar in structure to erythromycin. Although azithromycin is significantly more expensive, it can be dosed once daily and produces less GI intolerance than does erythromycin. An apparent advantage over erythromycin is that azithromycin reaches higher intracellular concentrations, thus increasing its efficacy and duration of action. These advantages are demonstrated in studies comparing the two antibiotics in the treatment of various infections.
