- 2 Institutional branding теперь на каждой странице.
- 3 Многоязычный интерфейс.

Главная страница SpringerLink

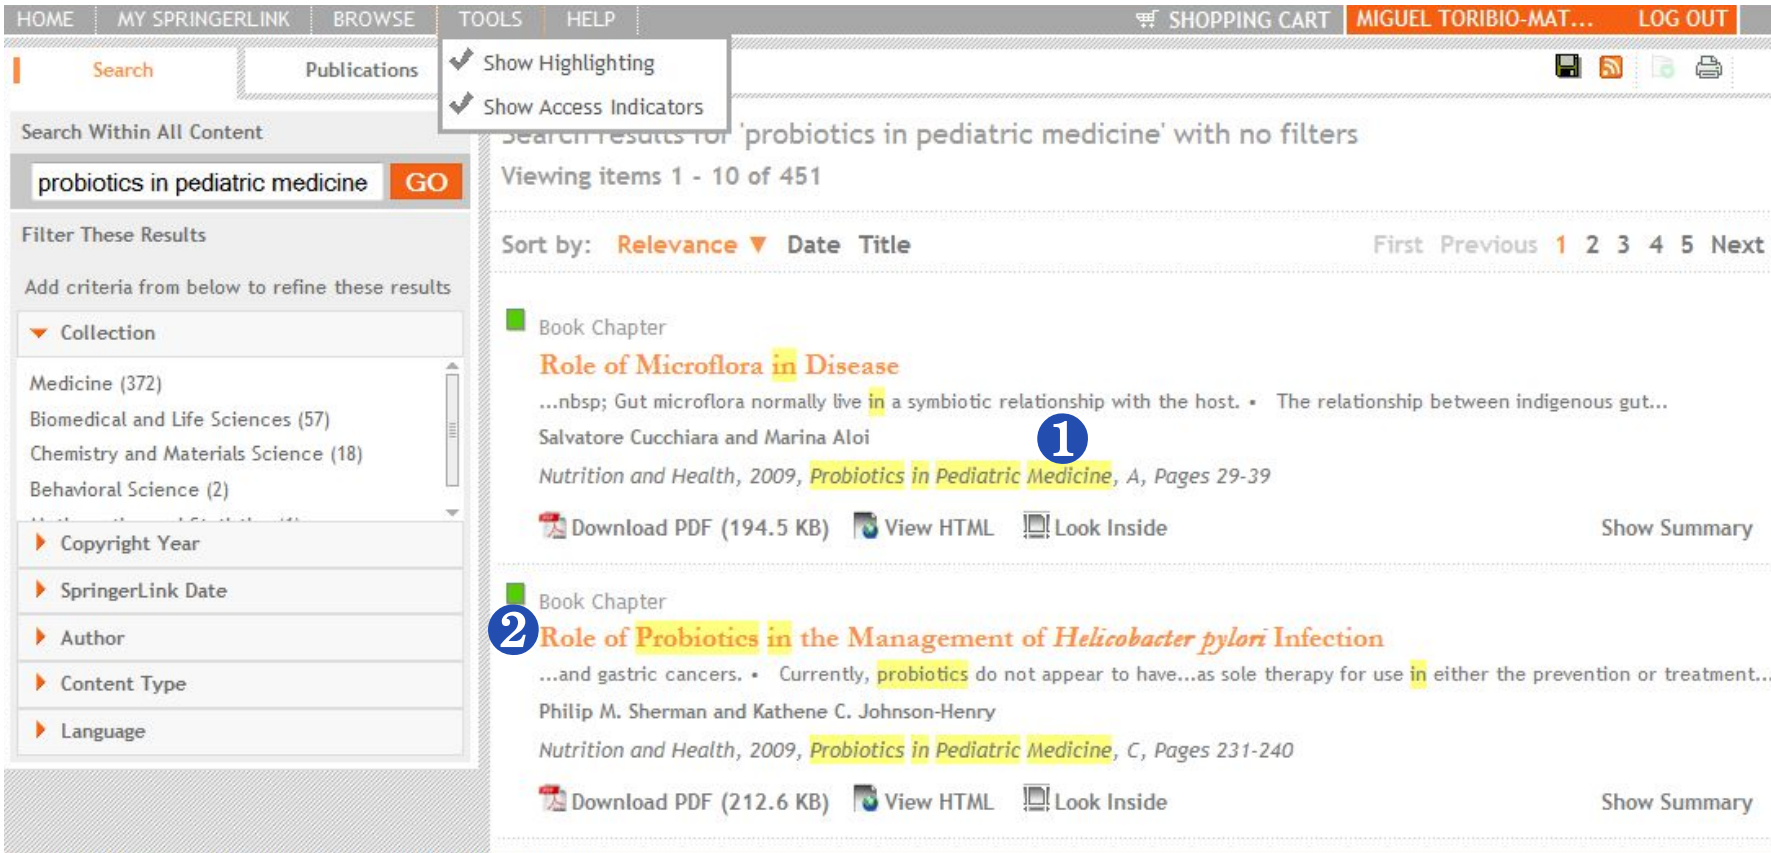

The screenshot shows the SpringerLink homepage with a search bar at the top. The search bar contains the text "training" and a "GO" button. Below the search bar, there are links for "Advanced Search" and "Search Tips". The page is divided into several sections: "BROWSE PUBLICATIONS BY CONTENT TYPE" with a grid of "Journals" (2,107), "Books" (32,857), "Book Series" (1,038), and "eRef" (148); "BROWSE PUBLICATIONS BY TITLE" with an alphabetical index (A-Z); and three promotional boxes for "FOR AUTHORS", "FOR LIBRARIANS", and "FOR SOCIETIES". A "LOG IN" button is visible in the top right corner, and a login form is overlaid on the right side of the page.

- 1 Поля для ввода логина/пароля (Login Box) доступны с каждой страницы сайта. Теперь нет необходимости возвращаться на главную страницу для того, чтобы авторизоваться.

- 2 Новая группировка контента по типу изданий и алфавитный указатель (A-Z List) исключают необходимость прокрутки страницы.

- 3 Удобный и простой доступ к модулю Администрирования и материалам для библиотекарей.

Результаты поиска

The screenshot shows the SpringerLink search results page. The search query is "probiotics in pediatric medicine". The results are sorted by Relevance. Two results are visible, both highlighted with yellow boxes. A dropdown menu is open under the "Tools" tab, showing "Show Highlighting" and "Show Access Indicators" both checked. A red circle with the number 1 is placed over the word "Probiotics" in the first result, and a red circle with the number 2 is placed over the word "Probiotics" in the second result.

Abstract

Irritable bowel syndrome (IBS) is a complex, yet common diagnosis in gastroenterology. Recent data suggest the increasing importance of bacteria in the pathophysiology of IBS. Some studies have shown that IBS can be precipitated by an acute case of gastroenteritis. These pathogenic organisms may

 Hide Summary

2 *Abstract*

Our previous studies have shown that morphine withdrawal induced hyperactivity of cardiac noradrenergic pathways. The purpose of the present study was to evaluate the effects of morphine withdrawal on site-specific tyrosine hydroxylase (TH) phosphorylation in the rat left ventricle. Dependence on morphine was induced by a 7-day s.c. implantation of morphine pellets. Morphine withdrawal was precipitated on day 8 by an injection of naloxone (2 mg/kg, s.c.). TH phosphorylation was determined by quantitative blot immunolabelling using phosphorylation state-specific antibodies. Ninety min after naloxone administration to morphine-dependent rats there was an increase in phospho-Ser40-TH ($139.0 \pm 13\%$, $P < 0.05$) and Ser31-TH ($135.5 \pm 11\%$, $P < 0.05$) in the left ventricle which is associated with both an increase in total TH levels ($114.4 \pm 4.6\%$, $P < 0.05$, $P < 0.01$) and an enhancement of TH activity (51.0 ± 11 dm/ μ g protein, $P < 0.001$). When HA-1004 (40 nmol/day), inhibitor of cyclic AMP dependent protein kinase (PKA) was infused, concomitantly with morphine, it diminished the increase in monoamine (66% to 60%), total TH expression ($92.5 \pm 11\%$, $P < 0.05$) and TH phosphorylation at Ser40

Effects of the NO donor sodium nitroprusside on myocardial energetics in rabbit papillary muscles

Mark Hünlich and Gerd Hasenfuss

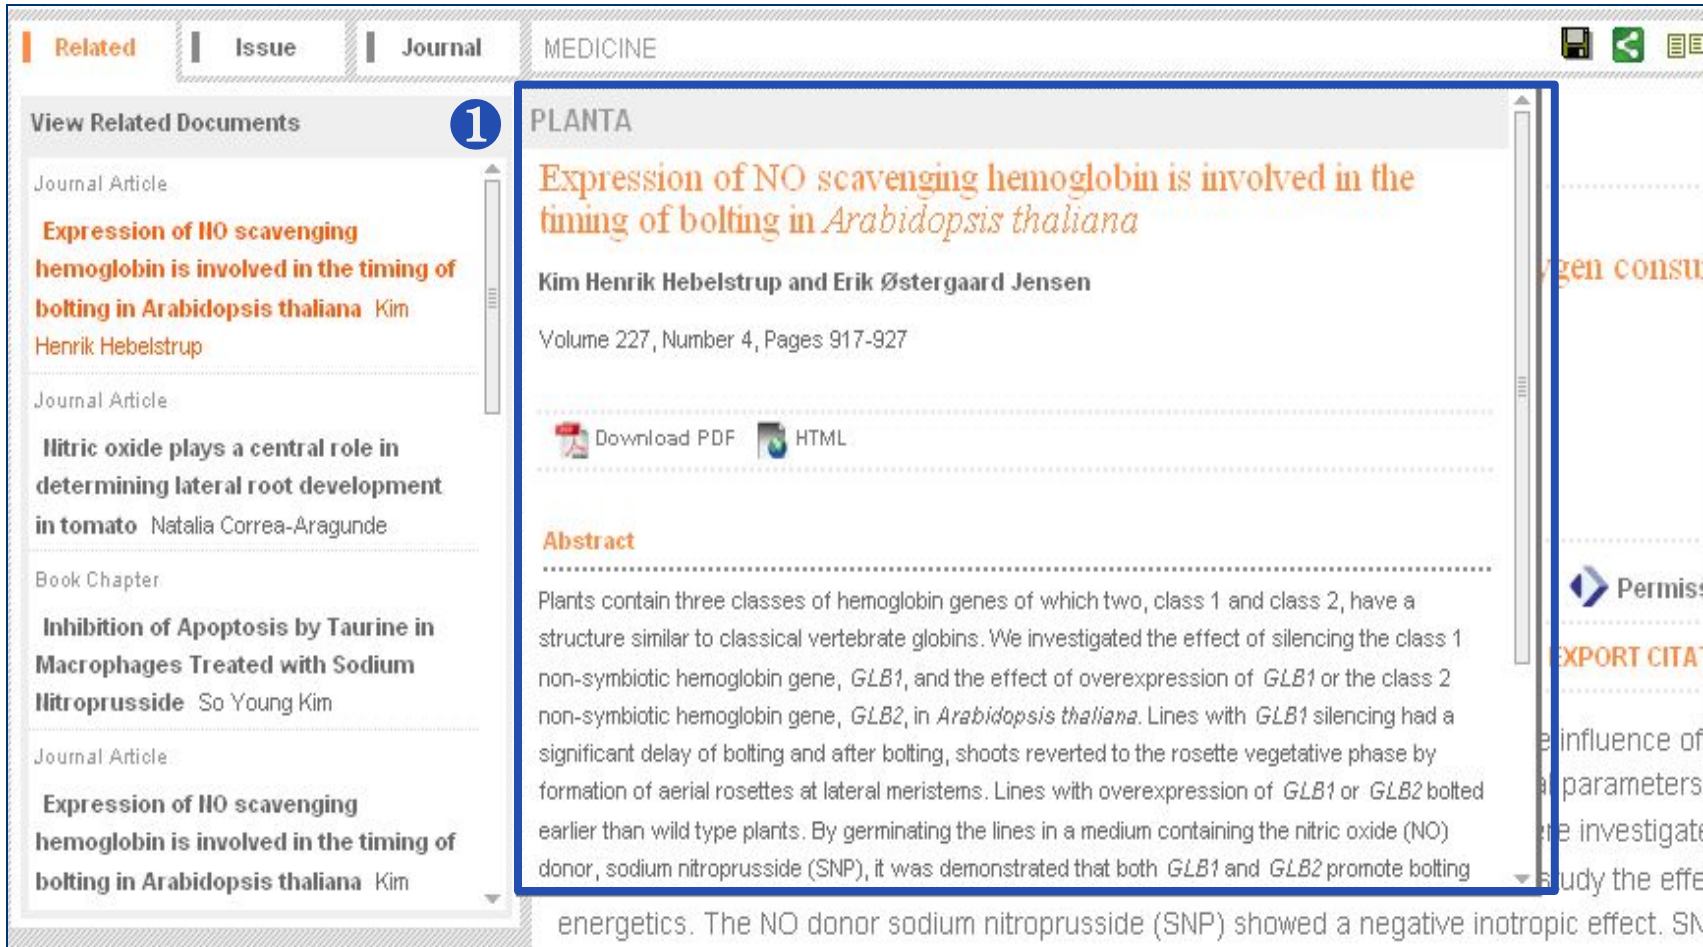

[Download PDF](#) [View HTML](#)

Abstract

Nitric oxide (NO) has influence on various cellular myocardial energetics. In the present study oxygen isometrically contracting rabbit papillary muscles (n = 10) were exposed to various interventions while maintaining physiological conditions. The NO donor sodium nitroprusside (SNP) (0.1 μM) significantly increased myocardial oxygen consumption (MVO₂) and myocardial oxygen tension (MVO₂T) during interventions. The NO donor SNP (0.1 μM) significantly increased myocardial oxygen consumption (MVO₂) and myocardial oxygen tension (MVO₂T) during interventions.

Работа с документами по теме

The screenshot displays the SpringerLink interface. At the top, there are tabs for 'Related', 'Issue', and 'Journal', with 'MEDICINE' selected. Below the tabs is a 'View Related Documents' sidebar on the left, containing a list of document titles. A blue circle with the number '1' is positioned over the first item in the list: 'Expression of NO scavenging hemoglobin is involved in the timing of bolting in Arabidopsis thaliana'. To the right of the sidebar, a large window displays the details of the selected document. The window title is 'PLANTA'. The main title of the article is 'Expression of NO scavenging hemoglobin is involved in the timing of bolting in Arabidopsis thaliana'. Below the title, the authors are listed as 'Kim Henrik Hebelstrup and Erik Østergaard Jensen'. The volume and page information is 'Volume 227, Number 4, Pages 917-927'. There are two icons for downloading the document: 'Download PDF' and 'HTML'. Below this, the 'Abstract' section begins with the text: 'Plants contain three classes of hemoglobin genes of which two, class 1 and class 2, have a structure similar to classical vertebrate globins. We investigated the effect of silencing the class 1 non-symbiotic hemoglobin gene, *GLB1*, and the effect of overexpression of *GLB1* or the class 2 non-symbiotic hemoglobin gene, *GLB2*, in *Arabidopsis thaliana*. Lines with *GLB1* silencing had a significant delay of bolting and after bolting, shoots reverted to the rosette vegetative phase by formation of aerial rosettes at lateral meristems. Lines with overexpression of *GLB1* or *GLB2* bolted earlier than wild type plants. By germinating the lines in a medium containing the nitric oxide (NO) donor, sodium nitroprusside (SNP), it was demonstrated that both *GLB1* and *GLB2* promote bolting energetics. The NO donor sodium nitroprusside (SNP) showed a negative inotropic effect. SN

PDF Preview со скрытой панелью эскизов страниц (Thumbnails)

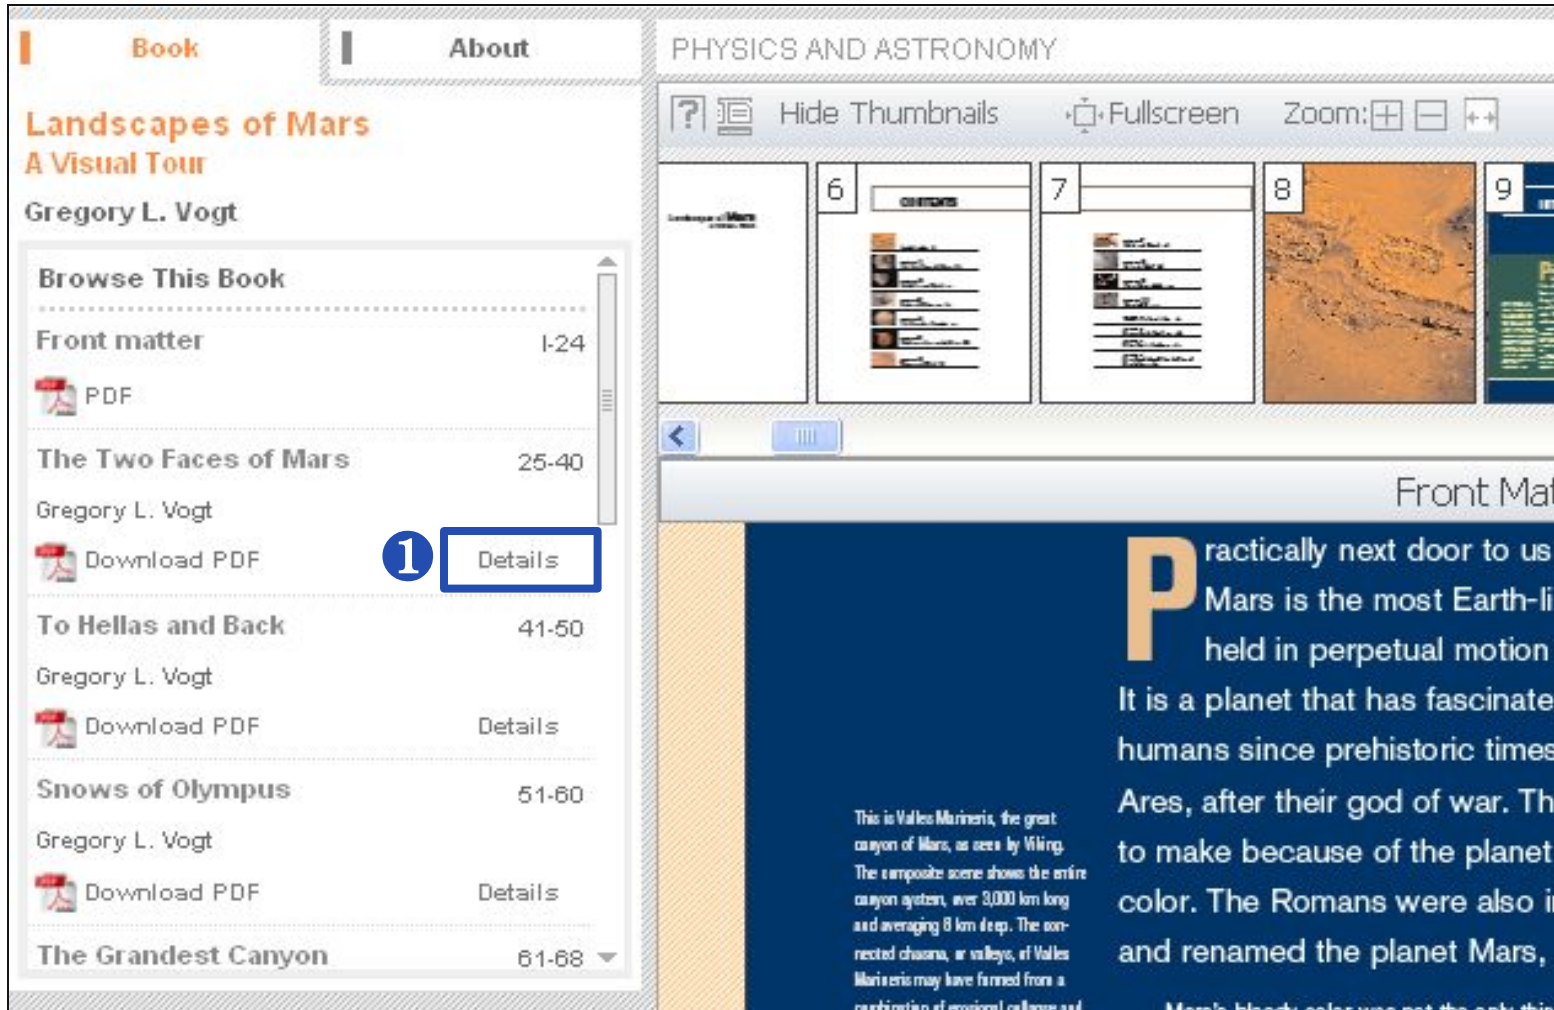

The screenshot shows a PDF viewer interface. At the top, there is a toolbar with a 'Show thumbnails' button highlighted by a blue box, an 'Exit Fullscreen' button, a 'Zoom' control, 'Page 2', 'Previous page', and 'Next page' buttons. The document title is 'The Two Faces of Mars'. The main content area features a large image of Mars at the top, followed by a dark blue section with the heading '1 THE TWO FACES OF MARS'. Below this, there is a text block starting with 'Whether or not Mars is Earth-like, it is a unique world in a Solar System populated by distinctly unique planets. Mars is classified as a terrestrial or rocky planet, along with Mercury, Venus, and Earth. Beyond Mars and beyond the wide and loosely packed Asteroid Belt'.

This image, a composite, was obtained by the OSIRIS Maroon Angle Camera. At the southern part of the planet, the southern spring polar cap can clearly be seen. At this time of the Martian year, a large fraction of Mars's atmosphere is expanding from the southern polar cap and will migrate to the northern polar cap during northern winter. Over most of the Martian disk we can see large cloud systems.

Whether or not Mars is Earth-like, it is a unique world in a Solar System populated by distinctly unique planets. Mars is classified as a terrestrial or rocky planet, along with Mercury, Venus, and Earth. Beyond Mars and beyond the wide and loosely packed Asteroid Belt

Front Matter

Practically next door to us Mars is the most Earth-like planet in our solar system. It is a planet that has fascinated humans since prehistoric times. The Romans named it Mars, after their god of war. The planet's red color is due to iron oxide. The Romans were also the first to make the planet Mars, and renamed the planet Mars.

This is Valles Marineris, the great canyon of Mars, as seen by Viking. The composite scene shows the entire canyon system, over 3,000 km long and averaging 8 km deep. The connected chasms, or valleys, of Valles Marineris may have formed from a combination of erosion and tectonic activity.

Abstract

In Chap. 1, we discussed the difference between meteors, meteoroids, and meteorites to be certain we are all speaking the same language. The study of asteroids also has its own evolving language. The name *asteroid* was given to these small bodies by William Herschel in 1802 in the first scientific paper on the newly discovered objects. (1 Ceres and 2 Pallas) "... resemble small stars so much as hardly to be distinguished from them. From this, their asteroidal appearance, if I may use that expression, I shall take my own name, and call them Asteroids..."

Gradually, as more asteroids were discovered astronomers began to realize that they were simply bodies of subplanetary mass and size which, in their minds' eyes gave asteroids a minor status among the Solar System's much more massive planets. By the late nineteenth century many

Create Membership Tokens

Token Created

A new membership token was successfully created and is listed below. You should deliver the token to the prospective member to manually enter into the 'Process Token' wizard (under the 'Account Details' section) of the 'My SpringerLink' homepage.

There is also a URL that when followed will automatically begin the membership activation process. This is usually the preferred method.

Издательство, агент или научное сообщество могут предоставить Вам доступ к своему онлайн-контенту. Для этого используется код активации "Access Activation Code".

Не забывайте о разделе Помощь (Help) в панели инструментов

The screenshot shows the SpringerLink website interface. At the top, there is a search bar with the text "SEARCH FOR" and a search button labeled "GO". Below the search bar, there are tabs for "AUTHOR OR EDITOR", "PUBLICATION", "VOLUME", "ISSUE", and "PAGE". The search results show "Heather Consortium".

The navigation menu includes "HOME", "MY SPRINGERLINK", "BROWSE", "TOOLS", "HELP", "SHOPPING CART", and "LOG OUT". The "HELP" menu is expanded, showing a list of options: "Frequently Asked Questions", "Feedback", "Contact Us", and "About SpringerLink". A blue circle with the number "1" is placed over the "Frequently Asked Questions" option.

The "General Information" section is visible on the left side of the page, containing links for "Do I need to log in to use SpringerLink?", "What is a Related article and Semantic Linking?", "Where can I find the Terms and Conditions?", and "What is Online First?". Below this, there are links for "Access and Registration", "Guests", "Author Information", "Librarian Information", "Pay-Per-View", "Personalization", "Editorial Board Members", "Societies", "Look Inside", and "MyCopy".

The main content area displays the "Frequently Asked Questions" section, which includes the following text:

SpringerLink is a full-text database for journals, books, protocols, eReferences, and book series. SpringerLink currently offers 2,306 fully peer-reviewed journals and 39,888 books online.

General and detailed information about our journals, books, software and other products is available on our corporate website springer.com.

Please choose from a list of topics to the left to jump to the frequently asked questions for that topic.

SpringerLink offers free access to search, tables of content, abstracts, and alerting services. Most likely you have full-text access to the published content in your area of interest via your institution having a subscription or being a member of a consortium. Personal subscribers benefit from online access combined with a subscription.

You can find much more information on new journals, eBooks, licensing options, etc. at springer.com/librarians.

Your questions and comments are most welcome. [Feedback form](#).

Makes sure you refer your trainees to the Frequently Asked Questions section, and introduce the Contact Us and Feedback options.
