Health InterNetwork Access to Research Initiative

Using Journals through HINARI
Journal abstracts are available to all users, without registration. Registered HINARI users have full-text access to journals. Non-HINARI users may still have full-text access through this menu, if their institutions subscribe to the journals.

Finding Journals
From this page you can find journals alphabetically by title or by subject (or by language, available soon). Detailed searching for articles can be done through PubMed (Medline database) or by visiting the websites of individual publishers.

Find Journals by title
Click on a letter for an alphabetical list of journal titles starting with that letter. Select a journal title to go directly to that journal.

ABCDEFGHIJKLMN OPQRSTUVWXYZ

PubMed

The screenshot shows the Entrez PubMed website in a Microsoft Internet Explorer browser window. The address bar displays <http://www.ncbi.nlm.nih.gov/entrez/query.fcgi>. The page features the NCBI logo on the left and the PubMed logo with the National Library of Medicine (NLM) logo on the right. Below the logos is a search bar with a dropdown menu set to 'PubMed' and a search input field containing the text 'for'. To the right of the search bar are 'Go' and 'Clear' buttons. Below the search bar is a navigation menu with options: Limits, Preview/Index, History, Clipboard, and Details. The main content area includes a list of search tips:

- Enter one or more search terms, or click [Preview/Index](#) for advanced searching.
- Enter [author names](#) as smith jc. Initials are optional.
- Enter [journal titles](#) in full or as MEDLINE abbreviations. Use the [Journals Database](#) to find journal titles.

Below the search tips is a paragraph describing PubMed: "PubMed, a service of the National Library of Medicine, includes over 15 million citations for biomedical articles back to the 1950's. These citations are from MEDLINE and additional life science journals. PubMed includes links to many sites providing full text articles and other related resources."

There are two highlighted sections: "Bookshelf Additions" and "MeSH Database Updated".

Bookshelf Additions: *Molecular Biology of the Cell, 4th Ed. and The Genetic Landscape of Diabetes* are now available for interactive searching on the [Bookshelf](#).

MeSH Database Updated: Over 140,000 Supplementary Concept Records (substance names) have been added to the [MeSH database](#) so the database now contains the full MeSH vocabulary. MeSH terms can be used in PubMed searches.

A box titled "New Global NCBI Search Engine" contains the text: "NCBI's growing number of Entrez databases can now be searched at once! [go](#)".

At the bottom of the page, there are links for "Write to the Help Desk", "NCBI | NLM | NIH", "Department of Health & Human Services", "Privacy Statement", "Freedom of Information Act", and "Disclaimer".

The browser's taskbar at the bottom shows the Windows start button, several open applications including "Department of a...", "CorelDRAW 11 - [...]", "Entrez PubMed - ...", and "Microsoft PowerP...", and the system tray with the time 10:40.

Journal Alert About

Have you subscribed to **free AMEDEO 7**?

Free Medical Journals - Over the next few years, many important medical journals will be available online, free and in full-text. The access to free scientific knowledge will have a major impact on medical practice and attract Internet visitors to these journals. Journals that restrict access to their Web sites will lose popularity.

If you wish to be informed about new free journals, you may subscribe to our [Journal Alert](#). The Free Medical Journals Site is dedicated to the promotion of free access to medical journals over the Internet.

Использование кокрановской библиотеки при создании программ позволяет включать в учебную программу вмешательства, эффективность которых научно доказана, и модифицировать программы по мере обновления данных

ГЛАВНОЕ ОТЛИЧИЕ КОКРАНОВСКОЙ БИБЛИОТЕКИ ОТ ДРУГИХ БАЗ ДАННЫХ В ТОМ, ЧТО ИНФОРМАЦИЯ В НЕЙ:

- **тщательно отобрана** из разноязычных источников: в нее входят только контролируемые и/или рандомизированные исследования
 - **обобщена** (в виде систематических обзоров и мета-анализов)
-

**КОКРАНОВСКАЯ БИБЛИОТЕКА
имеет четыре базы данных**

- Базу данных систематических обзоров
 - Базу рефератов эффективности лечебных вмешательств
 - Регистр контролируемых клинических испытаний
 - Базу работ по методологии обзоров
-

**Кокрановская электронная
библиотека доступна на:**

- CD-ROM
 - Online – MedLine (gateway.ovid.com)
 - Отдельные специализированные базы
-

КОКРАНОВСКАЯ БИБЛИОТЕКА на CD. Результат поиска “heart attack”

The screenshot displays the interface of The Cochrane Library 2003, Issue 3. At the top, a search bar contains the query "heart attack" with a "Go" button. Below the search bar, it indicates "(heart next attack) - 190 hits". The main content area is divided into two columns. The left column lists search results, starting with "The Cochrane Database of Systematic Reviews (27 out of 3058)". Under this, there is a list of 20 items, each with a checkbox and a title. The first item is "1. Community interventions for reducing smoking among adults." The second is "2. Continuous positive airways pressure for obstructive sleep apnoea." The third is "3. Update: Dietary advice given by a dietitian versus other health professional or self-help resources to reduce blood cholesterol." The fourth is "4. Dietary treatment for familial hypercholesterolaemia." The fifth is "5. Digitalis for treatment of congestive heart failure in patients in sinus rhythm." The sixth is "6. Dipyridamole for preventing stroke and other vascular events in patients with vascular disease." The seventh is "7. Effect of the treatment of Type II diabetes mellitus on the development of cognitive impairment and dementia." The eighth is "8. Exercise-based rehabilitation for coronary heart disease." The ninth is "9. Fish oil in people with type 2 diabetes mellitus." The tenth is "10. Information provision for stroke patients and their caregivers." The eleventh is "11. Low molecular weight heparins versus unfractionated heparin for acute coronary syndromes." The twelfth is "12. Update: Mass media interventions: effects on health services utilisation." The thirteenth is "13. Oral anticoagulants versus antiplatelet therapy for preventing further vascular events after transient ischaemic attack or minor stroke of presumed arterial origin." The fourteenth is "14. Pharmacotherapy for hypertension in the elderly." The fifteenth is "15. Pharmacotherapy for hypertension in women of different races." The sixteenth is "16. Prostacyclin and analogues for acute ischaemic stroke." The seventeenth is "17. Reduced or modified dietary fat for preventing cardiovascular disease." The eighteenth is "18. Rofecoxib for rheumatoid arthritis." The nineteenth is "19. School-based programmes for preventing smoking." The twentieth is "20. Vasoactive drugs for acute stroke." Below this list are sections for "Protocols (7 out of 1304)", "Database of Abstracts of Reviews of Effectiveness (5 out of 4122)", "The Cochrane Central Register of Controlled Trials (CENTRAL) (141 out of 375143)", and "The Cochrane Database of Methodology Reviews (3 out of 14)". The right column features the "2003 Issue 3" logo, the text "the best single source of reliable evidence about the effects of health care", and the "UPDATE SOFTWARE" logo. At the bottom, there is a copyright notice: "Copyright: Update Software Limited 2003".

DIPYRIDAMOLE FOR PREVENTING STROKE AND OTHER VASCULAR EVENTS IN PATIENTS WITH VASCULAR DISEASE

De Schryver ELLM, Algra A, van Gijn J

Date of most recent substantive amendment: 25 February 2002

This review should be cited as: De Schryver ELLM, Algra A, van Gijn J. Dipyridamole for preventing stroke and other vascular events in patients with vascular disease (Cochrane Review). In: The Cochrane Library, Issue 3, 2003. Oxford: Update Software.

ABSTRACT

Background
Patients with transient ischaemic attacks (TIA) and minor ischaemic strokes are at risk of serious vascular events (death from all vascular causes, non-fatal stroke, or non-fatal myocardial infarction). Their risk of vascular events lies between 4 and 11 percent per year. Aspirin only, in a daily dose of 30 mg or more, offers only modest protection in such patients: it reduces the incidence of major vascular events by 13 percent. In a single trial, adding dipyridamole (an alternative antiplatelet agent) to aspirin was associated with a 22 percent reduction in the risk of major vascular events compared with aspirin alone. However, a systematic review of all trials of antiplatelet agents by the Antithrombotic Trialists' Collaboration showed that, in high risk patients, there was virtually no difference between the aspirin-dipyridamole combination and aspirin alone. We therefore sought to assess the effects of dipyridamole in more detail.

Objectives
1) To assess the efficacy of dipyridamole versus control in the secondary prevention of vascular events in patients with vascular disease in the presence and absence of other antiplatelet drugs.
2) To assess the safety of dipyridamole versus control in the secondary prevention of vascular events in patients with vascular disease in the presence and absence of other antiplatelet drugs.

Search Strategy
The Cochrane Stroke Group Trials Register was searched and other relevant Cochrane Groups were contacted to search their specialised registers (last search 29 April 2002). In addition the Cochrane Controlled Trials Register, MEDLINE and EMBASE were searched and Dutch manufacturers of dipyridamole were contacted to identify further published and unpublished studies.

Selection Criteria
Randomised long term secondary prevention trials with concealed treatment allocation, treatment for > 1 month, starting within 6 months after presentation of a arterial vascular disease were selected (coronary artery disease, myocardial infarction, angina pectoris, retinopathy, nephropathy, peripheral arterial disease, stroke, TIA, amaurosis fugax). Therapy consisted of dipyridamole in any dose in the presence or absence of other antiplatelet drugs compared with no drug or an antiplatelet drug(s) other than dipyridamole (control group).

Data collection and analysis
Two reviewers selected trials which met the inclusion criteria and extracted details of randomisation methods, blinding of treatments and assessments, whether intention-to-treat analysis was possible from the published data, whether treatment groups were comparable with regard to major prognostic factors, the number of patients who were excluded or lost to follow-up, definition of outcome events, and entry and exclusion criteria. The methodological quality of each trial was assessed by the two reviewers on the basis of these extracted data. In addition, dose and type of antiplatelet treatments, duration of follow-up, and the number of defined outcome events were recorded. Data published by the Antithrombotic

НАШ ИНСТИТУТ

Первый Ташкентский Государственный Медицинский Институт был создан в 1918 году и на сегодняшний день является одним из ведущих ВУЗов республики Узбекистан, а также одним из крупнейших научно-исследовательских центров. На факультетах нашего института обучается около 3000 студентов по программе врачей общей практики, 200 клинических ординаторов (программа магистратуры) более 100 аспирантов и докторантов. Институт занимается подготовкой специалистов лечебного дела и стоматологов. В институте работают ведущие специалисты по хирургии, терапии, акушерству и гинекологии, реанимации, интенсивной терапии и анестезиологии, стоматологии, а также специалисты по биохимии, фармакологии, морфологии и другим медико-биологическим дисциплинам, которые помимо преподавательской работы занимаются научно-исследовательской деятельностью.
