Описание проекта “Мы интегрируем онлайн и оффлайн”

- 1. Задача:** Рассказать, что M! Network, голландская консалтинговая фирма, помогает компаниям интегрировать онлайн маркетинг-каналы и медиа (баннеры, контекстную рекламу, онлайн видео...) и оффлайн (телевидение, наружка, принт...)
- 2. Целевая аудитория:** Директора по Маркетингу крупных компаний
- 3. Стратегия:** Мы не хотели рассылать традиционные брошюры, ибо большинство брошюр попадает в мусорный ящик. Мы решили использовать веблоги о маркетинге, чтобы привлечь внимание к услугам M! Network. Мы знали, что директора не читают блогов, зато их подчинённые блоги посещают регулярно
- 4. Решение:** Мы разместили “printable” баннеры на вебблотах. Посетители блогов могли распечатать брошюру, кликнув на баннер, и показать её своему директору. Интегрировав интернет (баннеры) и принт (брошюры), мы продемонстрировали, как M! Network интегрирует онлайн и оффлайн медиа

Так выглядела первая баннерная кампания. Читатели блогов видели в баннере только первую часть рекламного сообщения

PICNIC interviewt Werner Vogels (CTO Amazon)

Matthijs van den Broek maandag 1 september 2008, 9:04

Rubriek: [Bedrijven en personen](#) | Bekeken: 938 keer (195 keer doorgeklikt)

Vooruitblikkend op [PICNIC '08](#) (Marketingfacts is mediapartner) hield [Monique van Dusseldorp](#) een interview met [Werner Vogels](#), de huidige CTO van [Amazon.com](#). Alleen hij, en Jeff Bezos mogen in het openbaar namens Amazon.com spreken. Dus als een hoge pief van Amazon zijn mond open doet, is dat het vermelden wel waard.

Van Dusseldorp wil van Vogels weten hoe hij bij Amazon terecht is gekomen, of hij het universitaire leven niet mist, hoe het contact met Jeff Bezos precies in elkaar zit. Vogels praat over A9 van Amazon (eigenlijk wil hij daar niets over kwijt), en over Nederlandse start ups: 'I am psyched to see the Dutch and European startup getting better support and really getting off the ground. I have come to know many European entrepreneurs throughout the past year and their passion and focus is on par with that of their Silicon Valley counter parts, and their creativity and drive for innovation can rival any business in the world.' Lees hier het hele [interview met Werner Vogels](#) op de site van PICNIC.

M! Network helps you to integrate online and offline marketing

Serge Fenenko (M! Network)

Category: [Internet marketing](#) | [Strategy](#)

Each medium has its advantages. Internet allows us to interact with our customers. Print gives us more time and space to tell our story. But in order to maximize effects of our marketing campaigns, we need to integrate online and offline marketing.

This is what M! Network does. We help your company to integrate internet into your overall marketing strategy.

We use our proprietary Internet Strategy Audit method to do it. The ultimate goal of the Audit is helping your company to use internet more effectively in your branding and marketing campaigns. The main output of the Audit is a clear and realistic marketing plan, including Top 10 steps to improve your marketing performance. And our recommendations how to implement these improvements within 2-6 months.

The main advantage of the Internet Strategy Audit is that you get immediate results. More visitors to your website, higher positions in search results, more clicks on your banners and Google ads, more interaction with your customers. Our recommendations are based on the vast marketing expertise of Novocortex and other 14 members of the Dutch M! Network. We have been managing online campaigns for 9 years, in Western and Eastern Europe. So we know exactly what internet marketing instruments actually work and what don't - from search engine marketing and banners to online video, weblogs and ads on social networks.
