

Открытые электронные архивы в области библиотечного дела и информационных дисциплин

Негуляев Е. А.

Пятая международная конференция «Science Online»,

Турция, г. Кемер, 14 мая 2005 г.

План доклада

- > Инициатива открытого доступа и библиотечное сообщество.
- > Открытые электронные архивы в области библиотечных и информационных дисциплин:
 - DLIST, University of Arizona;
 - Caltech Library System;
 - LDL: Librarians' Digital Library;
 - Sciences de l'Information et de la Communication;
 - CNR Bologna Research Library;
 - OCLC Repository.
- > E-LIS — Eprints in Library and Information Science.
- > Тематические проекты кросс-поиска:
 - Metalis.
- > Проблемы и перспективы.

Open Access и библиотеки

- > Библиотеки заинтересованы в продвижении идеи открытого доступа:
 - OA увеличивает количество открытой информации;
 - OA развивает средства для объединения информации.Таким образом, идея OA совпадает с социальной ролью библиотеки.
- > Сотрудники библиотек являются целевой группой для пропаганды идеи открытого доступа, т. к. через них с ней могут ознакомиться представители других сообществ (ученые, студенты и др.).
- > Библиотекари могут применить идеи OA для собственных нужд, организовывая открытые электронные архивы или электронные журналы.

Открытые электронные архивы

- > «Зеленый путь» (Green Road) к открытому доступу.
- > Идея **самоархивирования** (self-archiving)— самостоятельного размещения авторами своих публикаций.
- > Нацелены на рецензируемые (peer review) публикации, хотя возможно размещение и препринтов и неопубликованных работ.

Title: भारत जानकारी: राज्य और राजधानियाँ

Authors: अन्जान

Issue Date: 27-Feb-2004

Abstract: भारत जानकारी: राज्य और राजधानियाँ हनिदी न्यूजग्रूप पर दरख्वास्त आई- भारत के राज्य और शहरों के बारे में हनिदी में जानकारी कहाँ मिलेगी। गूगल द्वारा खोज करने पर युनिकोडिति हनिदी में ये जानकारी देने वाला कोई भी जालस्थल मुझे नहीं मिला। हनिदी में ये जानकारी मुझे भारत सरकार के जालस्थलों पर PDF आवृत्ति में प्राप्त हुई। अंग्रेज़ी में ये जानकारी देने वाले काफी जालस्थल मिले। सोचा युनिकोड में भी इसे उपलब्ध किया जाए.. ये याद रखिये कि भारत के हर क्षेत्र की भाषा और बोली अलग होने के कारण नीचे दिये गए नाम सिर्फ हनिदी बोलने वाले ही प्रयोग करते हैं। हो सकता है कि बाकी भाषाओं / क्षेत्रों में नाम अलग हों। अरुणाचल प्रदेश (इटानगर) असम (दिसिपुर) उत्तर प्रदेश (लखनऊ) उत्तरांचल (दहरा दून) उडिसा (भुवनेश्वर) अंदमान और निकोबार द्वीप* (पोर्ट ब्लेयर) आंध्र प्रदेश (हैदराबाद) कर्नाटक (बंगलोर) संघ राज्यक्षेत्र: केन्द्रीय सरकार द्वारा शासक केरल (थरुवनंतपुरम) गोआ (पणजी) गुजरात (गांधीनगर) चंडीगढ़* (चंडीगढ़) छत्तीसगढ़ (रायपुर) जम्मू & कश्मीर (शरीनगर/जम्मू) झारखंड (रांची) तमिल नाडू (चेन्नई) ...

Welcome to E-LIS

E-LIS is an open access archive for scientific or technical documents, published or unpublished, on Librarianship, Information Science and Technology, and related application disciplines. The archive's goal is to promote communication in LIS by the rapid dissemination of papers. Eprints for LIS has been established as a community service by RCLIS (Research in Computing, Library and Information Science) to promote open access to papers on these fields. In keeping with the objectives of the EPrints movement and the Free Online Scholarship (FOS) movement, we expect this service to facilitate self-archiving for LIS researchers and long-term preservation of their scholarly publications, provide world wide easy access to these publications and improve the impact of their research. Authors who wish to post papers to the Archive should first consult the Submission Policy.

By now, there are **2386** articles in our Archive.

E-LIS is hosted by CILEA

This site is running GNU Eprints software, developed at the University of Southampton and complies with the The Open Archives Initiative Protocol for Metadata Harvesting (OAI2.0) for open archive interoperability

E-LIS — Eprints in LIS

- > Создан в январе 2003 г.
- > Проект исследовательской группы *RCLIS* (Research in Computing, Library and Information Science).
- > Хостинг — *CILEA* (консорциум итальянских университетов в Ломбардии).
- > Финансирование — испанское министерство.
- > Управление архивом — международная группа редакторов.

E-LIS — базовые принципы

- > Свободная регистрация — необходима для подписки на уведомления о поступлении новых публикаций или для самостоятельного архивирования документов.
- > Содержит любые типы материалов, имеющих отношение к области библиотечных и информационных дисциплин (в том числе и неопубликованные материалы, имеющие статус законченной работы).
- > Архив имеет на открытую часть и буферную зону, куда помещаются все новые публикации. Они должны пройти проверку редактором архива. Полномочия редакторов разделены по странам.

E-LIS — редакторы

- > 39 редакторов (29 стран) на 1 мая 2005 г.:
 - США — 4
 - Италия — 3
 - Испания — 2
 - Великобритания — 3
 - Чехия — 1
 - Сербия и Черногория — 1
 - Германия — 1
 - Россия — 1
 - Молдавия — 1
 - Бразилия — 2
 - Аргентина — 1
 - Индия — 1
 - Мексика — 1
 - Китай — 1
 - Зимбабве — 1
 - ЮАР — 1
 - ...

E-LIS — объем публикаций

Февраль 2004 г. — 450.

1 ноября 2004 г. — 1600.

1 мая 2005 г. — 2386.

- > За прошедшие полгода рост архива составил 786 публикаций, в среднем 131 публикацию в месяц.

Распределение публикаций по датам

Динамика распределения числа публикаций по датам за последние 6 месяцев

Промежуточные выводы

- > E-LIS растет не только за счет текущих публикаций, но в значительной степени за счет работ последних 5 лет.
- > Соответственно можно сказать, что архив находится на этапе первичного накопления информации, когда в нем размещаются избранные работы нескольких последних лет.
- > Значительное пополнение E-LIS за счет публикаций нескольких последних лет может быть связано также с появлением новых редакторов и ростом популярности архива в новых странах.

Service Provider?

METALIS

A service provider of AEPIC project

[Home](#) - [Simple Search](#) - [Advanced Search](#) - [Setup OpenUrl Resolver](#)

METALIS is a Service Provider for the Library and Information Science field. We collect (harvest) metadata from institutions that offer full-text papers and documents about Library and Information Science.

The general framework is known as "[Open Access Movement](#)"; the [AEPIC](#) project maintains a [list of useful resources](#) about all aspects of Open Access.

The different options available have these meanings:

- **Simple Search:** To search by keywords in all fields. It is possible to filter by year, type of document, origin of metadata and class.
- **Advanced Search:** To search by keywords and phrases in different fields. It is also possible to filter by one or more years, type of document, origin of metadata and class.
- **Setup OpenUrl Resolver:** METALIS builds an [OpenURL](#) with the metadata of the document. By default METALIS uses its resolver; if you prefer you can specify your local resolver.

METALIS harvests from these Data Providers:

- [Archive Ouverte en Sciences de l'Information et de la Communication.](#)
- [ArXiv.](#) Only set about Computer Science and for the subjects "Digital Libraries" and "Information Retrieval".
- [Caltech Library System Papers and Publications.](#)
- [CNR Bologna Research Library.](#)
- [Digital Library of Information Science and Technology.](#)
- [E-Prints in Library and Information Science.](#)
- [Librarians' Digital Library.](#) Only two sets, Publications / Articles and Theses / Dissertations.
- [Mémoires de 3 cycle en Sciences de l'Information et de la Communication.](#)

Title	Metadata: The Theory Behind the Practice
Authors	Coleman, Anita.
Class	H. Information sources, supports, channels
Abstract	This is a presentation at the 4th State GILS (Government Information Locator) Conference, Arizona State Library, Archives, and Public Records, Scottsdale, AZ, April 24-27, 2002. It discusses how metadata is akin to traditional library cataloging and classification practices by providing the context of users and intellectual access. Definitions, objectives, history, and types of metadata, a list of metadata standards are listed. Finally, it is all put together as theory that drives metadata in the form principles. Contains a list of resources and references.

The DLIST Archive is a service of the [School of Information Resources and Library Science](#) and [Learning Technologies Center, University of Arizona](#). Seed monies for DLIST are from the University of Arizona College of Social and Behavioral Sciences and the Proposition 301 funded initiative of the Internet Technology Commerce and Design Institute, now the [Arizona Center for Information Science and Technology](#). DLIST is running on *EPrints2* archive-creating software, which generates eprints archives that are compliant with the [Open Archives Protocol for Metadata Harvesting OAI v2.0](#). DLIST has an Advisory Board and also serves as a testbed for the Information Technology and Society Research Lab.
