Select AT&T Connect Software

Select the type of AT&T Connect client software you want to use to connect to this Event:

Participant Application (Recommended)

A Windows-based application that includes all available AT&T Connect features.

To use this, you must be running the Windows operating system and be able to download applications to your computer.

Web Participant Application

A browser-based application with some feature limitations.

Use this if you are running on a Macintosh or Linux platform, or if you are not able to install software on your Windows computer.

AT&T Connect

**:Выбираете первый вариант, под заголовком
Participant Application (Recommended)**

Setup the Participant Application and Enter the Event

Instructions: You should first setup the Participant application (Step 1) and then connect to the Event (Step 2).
If you already have the Participant application installed on your computer you can skip Step 1 and proceed to Step 2.

Step 1

Setup the Participant application

Step 2

Enter the Event

Step 2: enter the event

:Выбираете второй вариант

Entering the Event...

Checking your computer's settings... this may take a few moments.

If a security message is displayed, click OK/Yes to continue.

If you haven't connected to the Event within a few moments, you can manually setup the Participant application and/or enter the Event by [clicking here](#)

Программа начинает загружаться. При появлении окошка с .блокировкой, следует подтвердить загрузку

Entering the Event

You may close this window after the AT&T Connect Participant application has opened.

Please note that this Event may be recorded for later playback.

.закреть**

Виртуальный класс

The screenshot shows the AT&T Connect Participant Application window. The title bar reads "AT&T Connect Participant Application - Meeting - Marcelo Dorfman / MELTON's Meeting Room [Meeting Room ID - 3054747]". The menu bar includes "File", "View", "Event", "Connection", "Audio/Video", "Record", and "Help". The toolbar contains icons for "Raise Hand", "Share Note", "Stop ...", "Webboard", "Audio", "Mute", "M. Video", and a drawing tool. A status bar at the top right shows "Meeting in Progress" and "Connection: Good".

The main content area is titled "Getting Started" and features a sidebar with navigation links: "Mute Your Microphone", "Change Audio Device", "Invite Others", "Share an Application", "Insert / Present a Document", and "Document". The "Mute Your Microphone" section is active, displaying the following text:

Mute Your Microphone

To mute yourself, click the mute button. You hear others, but they don't hear you. Click the Mute button again to unmute and speak.

In some events only the presenter mutes and un-mutes microphones. Your mute/unmute icon is disabled until the presenter opens your microphone.

You can also mute and un-mute telephone-based audio by pressing *6.

If you use another voice conferencing service for telephone audio, the mute button is disabled.

Most voice conferencing services provide mute/unmute capability - check the keypad code for the service you are using.

On the right side, the "Participants" panel shows a list with columns for "Name" and "Comment". The entry "Marcelo Dorfman / MEL" is visible. Below this is a "Participants" toolbar with icons for "Mute", "Unmute", and "Mute All".

The "Share" panel at the bottom right includes "Share My Screen", "App Sharing", "Web", and "Hold" options. The "Event Materials" section is currently empty. An "Insert..." button is located at the bottom right of the main content area.

The bottom status bar shows "AT&T Connect", "Mute/Unmute", and "Ready to Use". The Windows taskbar at the very bottom displays the system tray with the date and time: "12:14 AM 17-Aug-10".

Choose Audio Device

Select one of the following options:

- Use a telephone/already connected with a telephone**
You want to connect (or have already connected) your telepho... & Connect conferencing system.
- Use microphone and speakers, or headset**
You want to use your microphone and speakers, or headset, during the Event.
- Remember my choice, don't ask next time.
- Do not use AT&T Connect audio on your computer**
* You are using a standard phone call or non-AT&T Connect conferencing.
* You are in a room where there is already an established audio connection.
