База данных реакций и химических соединений, экспериментально подтвержденных, с возможностью планирования синтеза

Базы данных для специалистов биомедицины и фармакологии

Embase®

Find quick, accurate answers to your biomedical questions.

Embase is the most comprehensive biomedical database available online, providing extensive coverage of peer-reviewed biomedical literature, selected and indexed specifically for the biomedical field.

Need to know:

- Over 24 million records from more than 7,500 current, peer reviewed journals as well as 2,000+ biomedical titles not currently offered by MEDLINE
- The most relevant results indexed by biomedical experts using the unique lifescience thesaurus, Emtree, which includes chemical names, trade names, and laboratory/research codes mapped to generic names for more than 27,000

PharmaPendium™

Comprehensive drug data at a researcher's fingertips.

PharmaPendium is a unique online resource that puts drug safety data of US-approved drugs at a researcher's fingertips. PharmaPendium is the only online resource able to search all FDA/CDER/FOI archived FDA drug approval review and correspondence documentation since 1938, as well as an EMA/EPAR approval document database.

Need to know:

- FDA Approval Packages - allowing you to search through more than 1,465, 000 pages of information and experimental data including reviews, labels and other data.
- European Medicines Agency's (EMA) European Public Assessment Reports (EPARs) - 76,000+ pages of searchable EPAR documents on EMA-approved drugs, including over 50 drugs/mixture not approved by the FDA.
- Adverse Event Reporting System (AERS).
- Meyler's Side Effects of Drugs, 15th edition with over 40,000 references.
- Extracted metabolite data from literature
- Extracted pre-clinical and clinical toxicity data
- Extracted toxicity data from literature, from a pool of over 3,000 journals and other global sources. ■

Базы данных для нейро-специалистов и специалистов по химической безопасности

BrainNavigator™

Research & teach the nomenclature of the brain in 3D.

BrainNavigator is an online 2D and 3D brain map program which combines 3D brain visualization technologies from the Allen Institute for Brain Science with Elsevier's vast library of brain reference materials, including the world-renowned brain atlases authored by leading cartographers George Paxinos, Charles Watson and Keith Franklin.

Need to know:

- 3D brain imaging that allows manipulation of brain atlas data and content to shorten information gathering and investigation times
- The ability to evaluate and annotate your own brain research data using brain maps and other data
- Common nomenclature that allows comparisons of 3D rat brains and mouse brains (with other species, including human, coming soon)

- significantly enhance training and understanding of the brain's anatomy
- High resolution brain images, illustrations and photographs that are immediately available for comparison
- A brain research tool where users can input and save information about specific subject animals to more closely match BrainNavigator co-ordinates
- Plentiful links to reference material including journal articles in ScienceDirect and Elsevier's vast collection of neuroscience books. ■

Why invest in BrainNavigator?

- Easily compare the brain of major species – mouse, rhesus monkey and human
- Perfect brain slicing technique
- Increase teaching impact with virtual sliceable models of each major brain type

Hazmat Navigator™

Avoid chemical accidents with trusted and authoritative chemical safety information.

Hazmat Navigator is a chemical safety database based on Bretherick's Handbook of Reactive Chemical Hazards that helps chemists and safety personnel quickly access critical, detailed chemical hazards information.

With multiple ways of searching for chemical compounds, you can find timely, accurate information on a compound's properties, handling, safety, reactivity, flammability, and toxicity. Hazmat Navigator helps you to reduce the likelihood of accidents before they occur and respond effectively if and when they do occur.

Need to know:

- Essential safety and reactivity information from the top chemical safety titles.
- Search by chemical substructure and similarity as well as chemical name, molecular formula, and CAS number
- Find the latest information from journals and other sources on reactive, health and

Why invest in Hazmat Navigator?

Базы данных для инженеров и геологов

Engineering Village®

Find relevant, and trustworthy engineering information.

Engineering Village is a powerful search platform where researchers can search multiple databases focused on engineering literature from a range of reliable sources, including scholarly journals, trade publications, patents, government reports, reference books, and conference proceedings.

Engineering Village provides access to today's most important engineering content through one single interface:

- Compendex™
- Engineering Index Backfile
- Inspec
- Inspec Archive
- NTIS
- Referex
- Patents from USPTO and esp@cenet
- EI Patents
- EnCompassLIT™
- EnCompassPAT™
- GEOBASE®

Why invest in Engineering Village?

- Engineers won't miss a thing with complete coverage of the authoritative sources
- Engineering thesaurus and tailored index ensures quick access to answers

GeoFacets™

Designed for geoscientists working in the early stages of upstream exploration.

GeoFacets is a searchable database of geo-referenced geological maps that enables users to assess a region or basin's geologic characteristics with efficiency and confidence. By streamlining the process of synthesizing content, GeoFacets allows users to spend less time searching for maps and more time on analysis and interpretation.

Need to know:

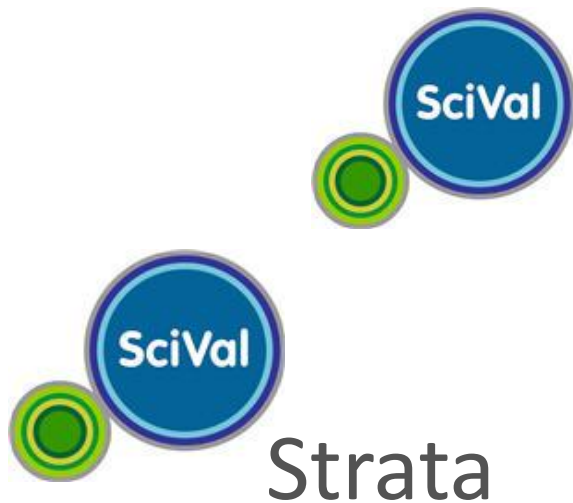

- More than 125,000 geologic maps with over 75,000 geo-referenced and downloadable as GeoTIFFs for integration into GIS software
- Map metadata and information such as coordinates and scale, map datum and projections, and abstracts and bibliography of associated articles
- Map information overlays from leading industry providers such as IHS and Wood Mackenzie
- Intuitive search features designed for geoscientists including an interactive map interface, geo-based search facets (e.g., map type, map surface area, geological basin), and advanced keyword text search to find geological analogs
- Links to maps' associated full-text articles (read-only PDF or via ScienceDirect), which provide access to 40,000+ scientific journal articles from Elsevier's earth science journals. ■

Why invest in GeoFacets?

- Retrieve relevant geological maps and background data 3 times faster
- Combine and overlay maps to create completely new

Иновáция (англ. *innovation*) — это внедрённое новшество, обеспечивающее качественный рост эффективности процессов или продукции, востребованное рынком. Является конечным результатом интеллектуальной деятельности человека. Примером инновации является выведение на рынок продукции (товаров и услуг) с новыми потребительскими свойствами или качественным повышением эффективности производственных систем.

Illumin8 предназначена чтобы помочь пользователям:

1. Найти новые технологии и процессы для разработки продукта
2. Обнаружить новое применение и новые рынки для существующих технологий
3. Найти потенциальных партнеров и поставщиков для вывода ваших новых идей на рынок
4. Идентифицировать лидирующих экспертов, организации и конкурентов на незнакомых вам рынках
5. Понять потенциальные рынки и преимущества от применения новых методов или от выхода на новые рынки

illumin8 берет тему вашего исследования и извлекает данные и скрытые взаимосвязи между ними из проверенных информационных источников

News & Web

Миллионы веб-страниц и более **1,000** отраслевых, технических и экономических **новостных источников**

Journal

5 Миллионов полнотекстовых научно-технических статей и **40 Миллионов** рефератов от 5,000 издательств

Patent

24 Миллиона патентов от 5 международных патентных агентств

Использование семантического анализа оптимизирует поиск.

Illumin8 анализирует контекстное значение поисковых терминов в найденных документах и веб-страницах и «угадывает» намерения пользователя.

Семантический анализ — это метод обработки информации на естественном языке, анализирующий взаимосвязь между коллекцией документов и встречающимися в них терминами, сопоставляющий некоторые факторы (тематики) всем документам и терминам.

illumina не просто выдает информацию, а находит новые идеи и методы применения, недоступные в других инструментах
