The screenshot displays the IET Digital Library interface. The top navigation bar includes a search box with the text 'Enter Any Word' and a 'Search' button. Below the search bar are links for 'Home', 'Help', 'Contact', and 'Sign Out'. The main content area features a navigation menu on the left with categories like 'Journals', 'Magazines', and 'Conferences'. The central article page shows the title 'Robustness analysis of an unstructured overlay for media communication' and its authors: G. Marchetto, M.P. Manzillo, L. Torrero, L. Ciminiera, and F. Rizzo. The abstract text discusses network address translators (NATs) and the DISCOS architecture. On the right side, there is a 'Buy This PDF' section for US\$30 and a list of services including Connotea, citeulike, del.icio.us, and BibSonomy. Below this, there are options for downloading citations, email abstracts, and research toolkits. At the bottom, there is a section for 'Inspec and Other Keywords' with 'Inspec Indexing' and 'Inspec Classification Codes'.

IET Commun. -- 4 March 2011 -- Volume 5, Issue 4, p.409-417
doi:10.1049/iet-com.2010.0624

ABSTRACT REFERENCES (32)

G. Marchetto,¹ M.P. Manzillo,¹ L. Torrero,¹ L. Ciminiera,¹ and F. Rizzo¹
¹Politecnico di Torino, Dipartimento di Automatica e Informatica, Torino, Italy

The wide diffusion of network address translators (NATs) (and, in some respect, firewalls) may prevent some applications that require direct end-to-end connectivity (e.g. real-time media) from being able to connect to the remote party. Although the solutions currently adopted rely on centralised nodes as third party relays, the distributed connectivity service (DISCOS) architecture has been recently proposed and aims at distributing such functionalities across a peer-to-peer (P2P) overlay. The original study presented some performance characteristics of the overlay, but the ability to resist to both failures and attacks was not taken into consideration. This study illustrates the robustness feature of the DISCOS overlay and suggests some minor

BENTHAM OPEN

BENTHAM OPEN aims to be the largest publisher of quality open access journals offering authors World Wide readership at attractive rates.

Welcome to Bentham Open Access

BENTHAM OPEN publish over 250 peer-reviewed open access journals. These free-to-view online journals cover all major disciplines of science, technology, and medicine.

EMINENT SCIENTISTS ENDORSE BENTHAM OPEN

"The advantage of the Open Journal series is that it is just that: open, and accessible to anyone with a PC at no charge I appeal to scholars across the disciplines to consider the Open Journal series as a forum for their work."

J.C. Jones
(University of Aberdeen, Scotland)

Searchable Information Center

Info Search QuickView Bookshelf English | My Settings | Sign In | Help

Simple Search: Search ebrary [Advanced](#) [All Subjects](#)

Welcome!

Created with DASH! This site is one of a series of searchable information centers that ebrary employees are creating on topics that are important to us. We understand that while there is a wealth of information on these topics available on the Internet, it is often difficult to find and search the data you need, especially across multiple sources.

To build this site, we gathered public domain PDF documents from government websites, and converted some information from web pages, Word documents, and other file types into PDF by "printing to PDF." We then uploaded them into the ebrary system, which converts PDF documents into highly interactive, searchable databases, using our new DASH! feature and other ebrary services.

We are proud to put our technology to use in a way that can benefit people worldwide, and we hope that you find it a valuable resource.

We welcome any comments or suggestions by emailing dp@ebrary.com.

This site contains information on natural disasters and extreme weather from agencies

Полнотекстовые ресурсы Open Access – Ebrary

The screenshot displays the Ebrary search interface. At the top, the search bar contains the query "earthquake OR earthquakes". The search results page shows a document titled "Why Do Earthquakes Occur in the Bay Area?". The document content includes a map of the San Francisco Bay Region showing earthquake probability, with a highlighted area indicating a 62% probability for one or more magnitude 6.7 or greater earthquakes from 2003 to 2032. The document also lists several chapters related to earthquake safety and preparedness.

Why Do Earthquakes Occur in the Bay Area?

The San Francisco Bay Area has had and will continue to have **earthquakes** because it has at least eight **earthquake** faults (black lines on map) that can cause serious damage.

- Large damaging **earthquakes** happened here in 1868, 1906, and 1989; smaller damaging **earthquakes** occur more often.
- Scientific research shows that, more likely than not, a big quake will happen here in the next 30 years.
- Strong ground shaking will cause most of the damage. The map shows that most of the Bay Area will experience strong shaking.
- Areas of soft soil, mainly near the bay, shake harder than areas of hard rock.
- Unlike some **earthquakes** that occur beneath the ocean, Bay Area **earthquakes** are not expected to cause significant tsunamis. However, distant

Полнотекстовые ресурсы Open Access – Ebrary

The screenshot shows the Ebrary website interface. At the top, there is a navigation bar with the Ebrary logo and the text "Cyber Bullying Searchable Information Center". Below this, there are tabs for "Info", "Search", "QuickView", and "Bookshelf". A search bar contains the text "earthquake OR earthquakes" and a "Search ebrary" button. To the right of the search bar, there are links for "Advanced" and "All Subjects".

The main content area is divided into several sections:

- Welcome to ebrary's Searchable Information Center on Cyber Bullying!**

According to the National Crime Prevention Council, 43% of teens have been the victims of cyber bullying in the past year.

To help parents, educators, and others better understand, prevent, and take action against this growing concern, ebrary is subsidizing a collection of e-books on cyber bullying. Additionally, ebrary employees have uploaded a number of government documents from the Pew Internet & American Life Project, U.S. Department of Justice, and other organizations with DASHI (Data Sharing, Fast) – a do-it-yourself e-publishing feature of many ebrary products.

We encourage organizations to contribute additional materials as long as they have copyrights. If you are interested in contributing, please email tish.wagner@ebrary.com for a complimentary DASHI account.
- Getting Started**
 - Conduct a search** – Use simple or advanced.
 - Open a document** – Click on the title name or jacket.
 - Explore the document** – Navigate to search terms, search the document for key words, jump to relevant chapters, flip through pages.
 - Highlight text and take notes** – Create a bookshelf (if needed) to save and organize your research.
- Featured E-books**

Below this, a central search box is labeled 'Search Protocols' with a 'Search' button and a link to 'Advanced Search'. To the left of the search box are several utility boxes: 'Upload a Protocol', 'Protocol Alert', 'Video Protocols', 'Comments', 'Favorites', and 'RSS'. To the right of the search box is a 'Browse by Subject' section listing various scientific fields such as Biochemistry, Biotechnology, Cell Biology, etc. Further right is an 'Inside SpringerProtocols' section with links to 'Source Title List', 'New Protocols', 'Free Protocols', 'Popular Protocols', 'Tour', and 'For Contributors/Editors'. At the bottom, there is a 'Most Popular Protocols' section listing specific research topics like 'Generating Murine Osteoclasts from Bone Marrow'. The browser window title is 'SpringerProtocols - Microsoft Internet Explorer' and the address bar shows 'http://www.springerprotocols.com/'.
