

# УМК «Школа России»

Образовательная область:

Математика

Тема:

Приёмы вычислений для случаев вида  $30 - 7$

Учебное пособие: М.И. Моро, математика 2 класс

$$40 + \square = 50$$

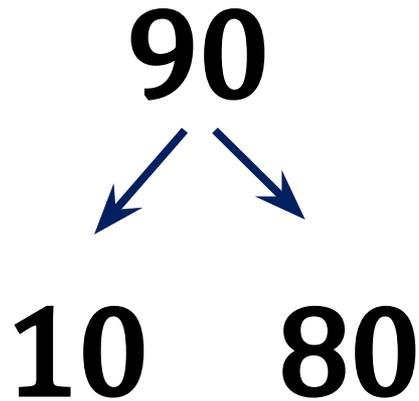

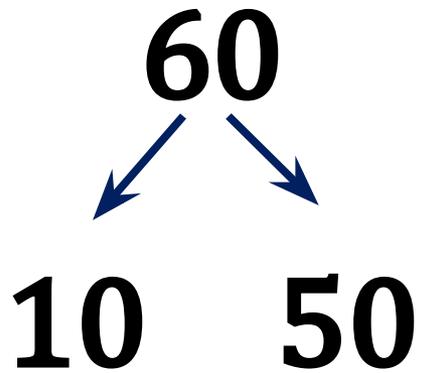

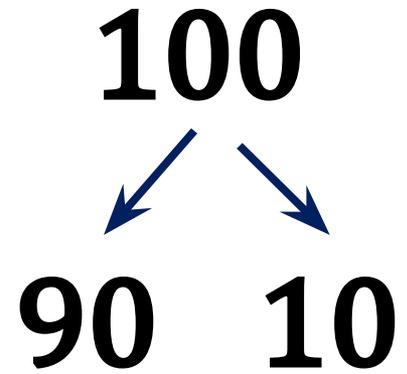

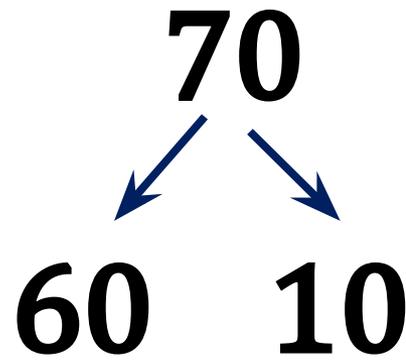

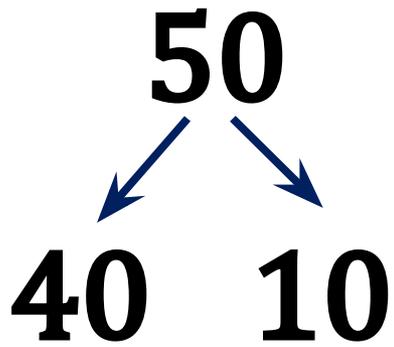

$$\square + 10 = 70$$

$$50 + \square = 60$$

$$\square + 10 = 100$$

$$\square + 10 =$$

$$30 + \square = 40$$

# Задач

- 20 а

рублей

- ?, на 10 рублей б.

$$20 + (20 + 10) = 50 \text{ (р)}$$

**Ответ: слойка и кекс  
вместе  
стоят 50 рублей.**

# Математический

## диктант:

1. Разность 24 и 4

2. Сумма 7 и 9

3. На сколько 3 меньше, чем  
7?

4. Периметр квадрата со стороной  
5 см

5. Сколько см в 1 дм 3 см ?

**1. 20**

**2. 16**

**3. 4**

**4. 20 cm**

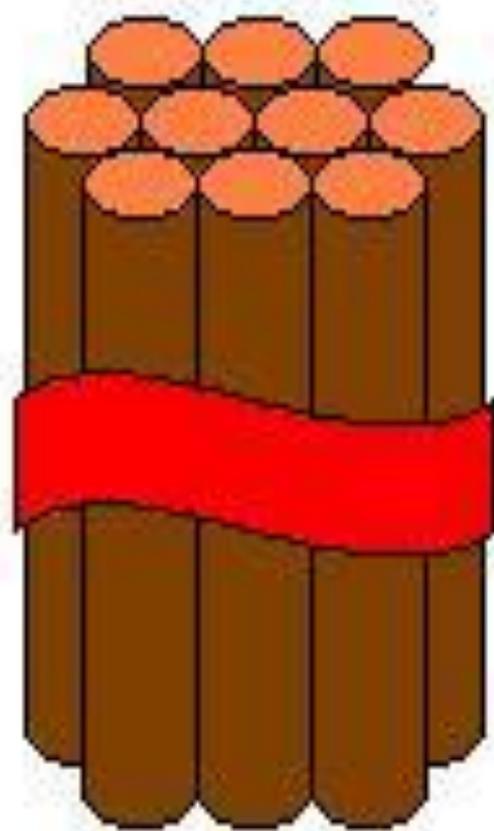

**5. 13 cm**

# Физкультминутка

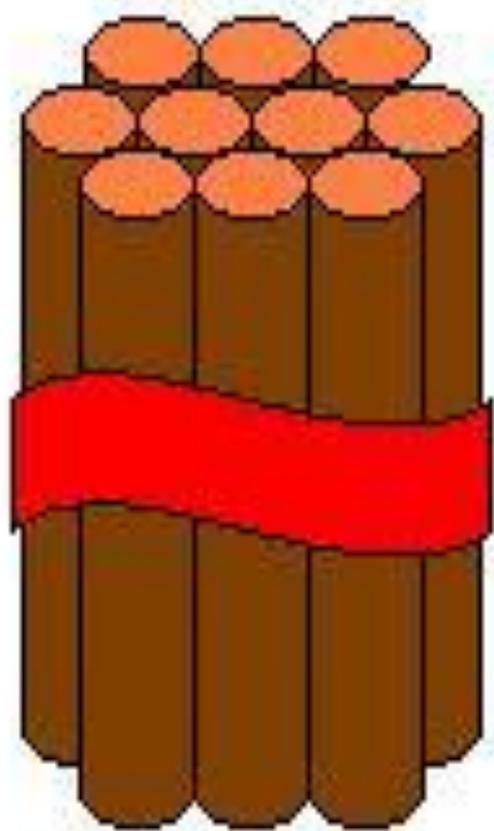

$$30 - 7 =$$

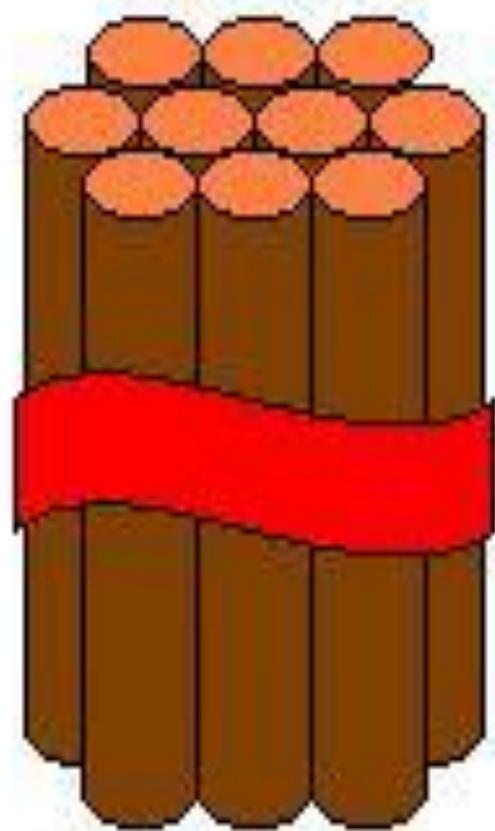

???

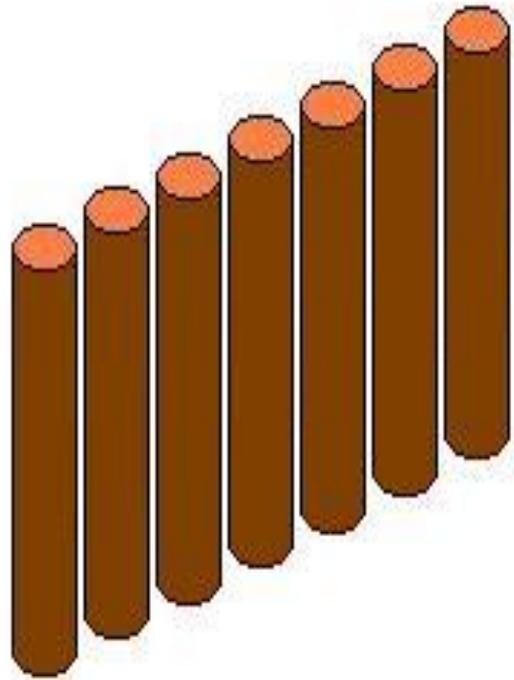

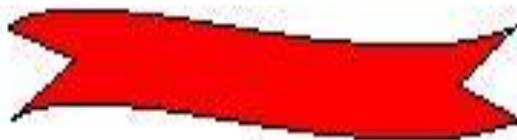

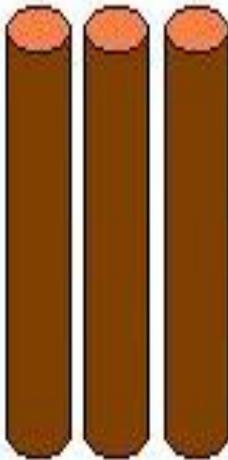

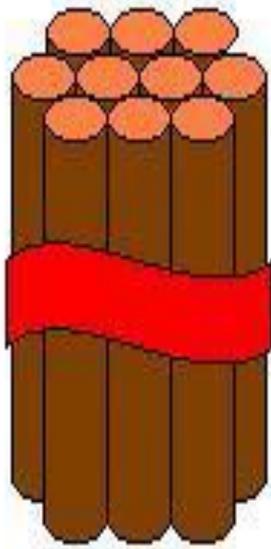

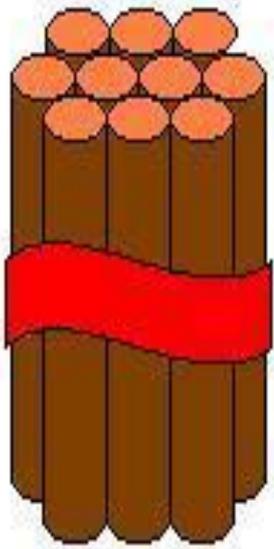

10

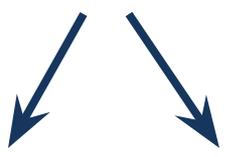

10

10

$$30 - 7 = 20 + (10 - 7) \quad 23$$

**20**   **10**

**=**

**МОЛОДЦЫ!**
