Times Cited: 18 **References:** 38 [Citation Map](#)

Abstract: Experimental results are presented on the formation of condensed combustion products (CCPs) at the burning surface of aluminized solid propellants. A number of experimental techniques were developed for describing the characteristics of the CCPs as a function of the oxidizer particle size and pressure. The results of this investigation provide qualitative descriptions of the CCPs formed at the propellant burning surface as functions of oxidizer particle size and pressure.

Conference Information: International Workshop on Concept Lattice-Based Theory, Methods and Tools for KDD STANFORD UNIV, STANFORD, CA, JUL, 2001

Abstract: Recently concept lattices became widely used tools for intelligent data analysis. In this paper, several algorithms that generate the set of all formal concepts and diagram graphs of concept lattices are considered. Some modifications of well-known algorithms are proposed. Algorithmic complexity of the algorithms is studied both theoretically (in the worst case) and experimentally. Conditions of preferable use of some algorithms are given in terms of density/sparseness of underlying formal contexts. Principles of comparing practical performance of algorithms are discussed.

Различные вопросы – различные показатели

Объект оценки	Необходимые данные	Оцениваемая выборка
Производительность	Количество публикаций	Автор, группа, организация
Общее влияние	Объём цитирования	Автор, группа, организация
	Индекс Хирша	Автор, группа, организация
Непрямое влияние	Объём цитирования "второго поколения"	Автор, группа, организация
Эффективность	Средний объём цитирования на статью	Автор, группа, организация
	Соотношение процитированных/не процитированных работ	Автор, группа, организация
	Импакт-фактор	Журнал
Относительный импакт	Среднее цитирование в предметной области	Автор, группа, организация
	Ожидаемое цитирование в журнале	Автор, группа, организация
	Перцентили: статей, средние, относительные	Автор, группа, организация
Специализация	Показатели коллаборации	Автор, группа, организация
	Индекс Дисциплинарности	Автор, группа, организация
Трендовый анализ	Временные ряды	Автор, группа, организация
