Убраны т.н. "Stop Words"

The image shows a screenshot of the Web of Science search interface. The top navigation bar includes "All Databases", "Select a Database", "Web of Science", and "Additional Resources". Below this, there are search options: "Search", "Author Finder", "Cited Reference Search", "Advanced Search", and "Search History".

The search input field contains the text "vitamin a" and is set to search in the "Title" field. Below the search bar, there are two "AND" dropdown menus for adding more search criteria. The "Search" button is highlighted in orange.

The search results page shows "Record 2 of 24,634". The article title is "Total and Mitochondrial Nitrosative Stress, Decreased Brain-Derived Neurotrophic Factor (BDNF) Levels and Glutamate Uptake, and Evidence of Endoplasmic Reticulum Stress in the Hippocampus of Vitamin A-Treated Rats". The word "Vitamin A" in the title is highlighted in yellow.

Cited References: 57 [view related records] Citation Map

Abstract: Vitamin A supplementation has caused concern among public health researchers due to its ability in decreasing life quality from acute toxicological effects to increasing mortality rates among vitamin supplement users. For example, it was described cognitive decline (i.e. irritability, anxiety, and depression) in patients subjected to long-term vitamin A therapy, as occurs in cancer treatment. However, the mechanism by which vitamin A affects mammalian cognition is not completely understood. Then, we performed the present work to investigate the effects of vitamin A supplementation at clinical doses (1,000-9,000 IU/kg day(-1)) for 28 days on rat hippocampal nitrosative stress levels (both total and mitochondrial), bioenergetics states, brain-derived neurotrophic factor (BDNF), alpha- and beta-synucleins, BIP and dopamine receptor 2 (D2 receptor) contents, and glutamate uptake. We observed mitochondrial impairment regarding respiratory chain function: increased complex I-III, but decreased complex IV enzyme activity. Also, decreased BDNF levels were observed in vitamin A-treated rats. The present data demonstrates, at least in part, that mitochondrial dysfunction and decreased BDNF and D2 receptors levels, as well as decreased glutamate uptake may take an important role in the mechanism behind the previously reported cognitive disturbances associated to vitamin A supplementation.

Усечение слова с левой стороны (truncation) и оператор near/x

The image shows a screenshot of the Web of Science interface. The main search bar contains the text "osmium near". Below it, there are several search options: "AND", "AND", and "Add Another File". A "Search" button is visible. The interface also shows "Current Limits:" with options for "Timespan", "Citation D", "Adjust yo", and "Adjust yo".

The detailed record for "Dihydroxylation of alkenes using a T-osmium complex" is shown. The title is highlighted with an orange box. The abstract is also highlighted with an orange box. The record includes the following information:

- Author(s):** Dehestani, A (Dehestani, Ahmad)¹, Wu, A (Wu, Adam)¹, Hayoun, R (Hayoun, Rebecca)¹, Kaminsky, W (Kaminsky, Werner)¹, Mayer, JM (Mayer, James M.)¹
- Source:** INORGANICA CHIMICA ACTA Volume: 362 Issue: 12 Pages: 4534-4538 DOI: 10.1016/j.jca.2009.05.004 Published: SEP 15 2009
- Times Cited:** 0 (from Web of Science)
- Cited References:** 39 [Citation Map](#)
- Abstract:** The reaction of TpOs(V)(N)(OH)(2) (1) [Tp = hydrotris(1-pyrazolyl) borate], m-chloroperbenzoic acid (m-CPBA), and trans-stilbene in C(6)H(6) at room temperature gives the diolate complex TpOs(V)(N)(trans-O(2)C(2)H(2)Ph(2)) (2) and m-chlorobenzoic acid (m-CBA). The trans configuration of the stilbene is retained in the diolate complex as shown in the crystal structure of 2. Complex 2 is hydrolyzed by 2 equivalents of aqueous HCl in CD(2)Cl(2) to give rac-hydrobenzoin, the product of cis-dihydroxylation, and TpOs(V)(N)Cl(2). cis-Stilbene, styrene, cyclohexene, trans-dimethyl fumarate, trans-methyl cinnamate, and trans-4-dimethylamino-4-nitrostilbene are also converted to their corresponding free diol products by reaction with 1 and m-CPBA in CD(2)Cl(2), and then aqueous HCl. In aqueous HBF(4), oxidation of the water-soluble olefin, 4-styrenesulfonic acid, by 1 is modestly catalytic (15 turnovers in 3 h) with excess PbO(2) as the oxidant. Under non-acidic conditions, the diolate complexes are inert and catalysis is precluded. Mechanistic experiments implicate an oxidizing osmium complex as an intermediate in these reactions. Abstract: Over the past 10 years, mitochondrial effects have been implicated in a wide variety of human diseases. Studies on patients with these diseases have revealed much about the complexities of mitochondrial genetics and nuclear genomes. However, the pathophysiology of mitochondrial diseases has remained unclear. Mitochondrial dysfunction is associated with a number of novel models of mitochondrial disease. In particular, mitochondrial oxidative phosphorylation in cellular energy production, the generation of reactive oxygen species, and the generation of reactive oxygen species, are key mechanisms for mitochondrial pathology. The importance and interrelationship of these mechanisms for mitochondrial pathology. The importance and interrelationship of these mechanisms for mitochondrial pathology. The importance and interrelationship of these mechanisms for mitochondrial pathology.

2 направления применения показателей научного цитирования

- Практика проведения исследований (Practice of Science)
 - Что уже было написано по исследуемой мной проблеме?
 - Кто из исследователей этой проблемы наиболее авторитетен?
 - Где мне опубликовать мою статью?
 - и т.д.
- Управление научной деятельностью (Business of Science)
 - Чего мы добились как исследовательская организация?
 - В каких предметных областях мы наиболее успешны?
 - Какие из наших учёных наиболее активны/ авторитетны/ эффективны?
 - Как мы показываем себя в сравнении с нашими партнёрами или конкурентами?
 - Какие из международных научных связей нам следует развивать в первую очередь?
 - И т.д.

Некоторые организации, использующие наши данные для оценки

- США: National Institutes of Health
- США: National Science Foundation (с 1974)
- Великобритания: Office of Science & Technology; Higher Education Funding Council
- Евросоюз: DGXII (Research Directorate)
- Австралия: Академия Наук, правительственная лаборатория CSIRO
- Канада: NSERC, FRSQ (Quebec), Alberta Research Council
- Франция: Министерство Науки, OST - Париж, CNRS
- Германия: Общество Макса Планка, правительственные лаборатории, DKFZ, MDC
- Япония: Национальный институт Информатики, Министерство Образования, Министерство Экономики, Торговли и Промышленности
- Китай: Академия Наук
- Россия: РАН, СПбГУ, МИСиС
- Times Higher Education

Политика отбора журналов в Web of Science

- Для чего мы отбираем журналы?

Относительно небольшая группа журналов публикует абсолютное большинство значимых научных результатов

Всего 3000 журналов покрывает 80% статей...

...но, что ещё более важно – 92% того, что цитируется

В 7,621 журнале опубликовано 814,967 статей, получивших 20,834,641 ссылок
4% журналов (300) публикуют 30% статей (239,206)
4% журналов (300) получают 51% ссылок (10,681,596)

Нормализованные показатели цитирования

- Есть 4 базовых показателя:
 - Количество статей
 - Суммарный объём цитирования
 - Среднее цитирование одной статьи
 - Индекс Хирша
- Год назад я показывал ограничения их применения
 - Сопоставление между предметными областями
 - Сопоставление учёных, работавших в разное время
 - С чем сравнивать-то?

Нормализованные показатели цитирования

- Суммарный объём цитирования по отношению к среднему цитированию в предметной области (**Category actual/Expected Cites, СХС**) – позволяет сравнивать статьи, учёных и организации, работающие в разных предметных областях

Category actual / Expected Cites (СХС) 5.44

Нормализованные показатели цитирования

- Суммарный объём цитирования по отношению к среднему цитированию в журнале (**Journal actual/Expected Cites, JXC**) – позволяет оценивать, насколько эффективен автор (или группа авторов) по отношению к журналам, в которых он публикуется

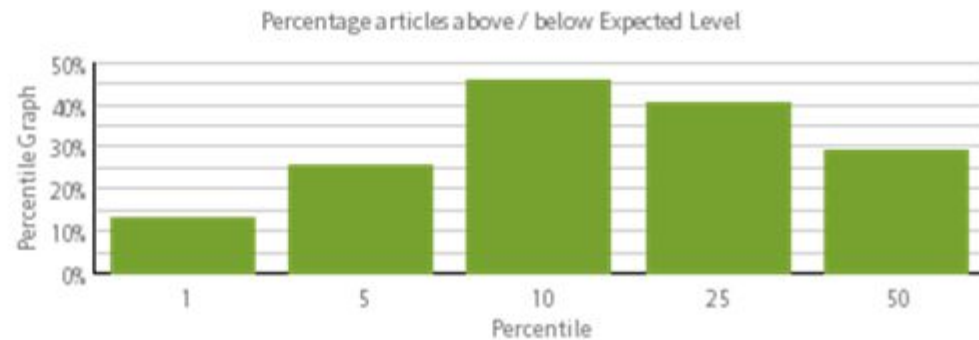

Journal actual / Expected Cites (JXC) 3.39

Нормализованные показатели цитирования

Mean Percentile 23.24

| Percentile | 1 | 5 | 10 | 25 | 50 |
|---------------------|--------|--------|--------|--------|--------|
| Number of articles | 6 | 13 | 24 | 28 | 34 |
| Percent of articles | 13.95% | 30.23% | 55.81% | 65.12% | 79.07% |

- Перцентили (**Mean Percentile; Percentage above/below Expected level**) – в какой процент самых цитируемых работ в мире (по предметной области!) входит работа или группа работ?

Рост публикационной активности по некоторым предметным областям

InCites™

COMPARE FIELDS IN COUNTRIES/TERRITORIES 1981-2009

Если вкратце - Research In View объединяет следующую информацию

Как это выглядит – профиль учёного

The screenshot shows a web interface for Thomson Reuters University Faculty. At the top, there are logos for Thomson Reuters University and Thomson Reuters, along with a navigation bar containing 'HOME', 'PROFILE', 'DOCUMENTS', 'SEARCH', 'REPORTS', and 'HELP'. A 'sign out' link is also present. Below the navigation bar, there are filters for 'Alphabetical' and 'Hide Empty Sections', along with buttons for 'Show Items & Recommendations', 'Show Only Items', and 'Show Only Recommendations'. The main content area is titled 'Chris E. Calculus' and identifies him as an 'Associate Professor' with contact information: '125 Main Street, Rockville, MD 20850, (240) 504-1251'. A sidebar on the left lists various categories of works, with 'PUBLISHED WORKS (57)' highlighted. The main content area lists 'PUBLISHED WORKS' in several categories: 'BOOKS AND MONOGRAPHS', 'BOOK CHAPTERS', 'EDITED BOOKS', and 'JOURNAL ARTICLES'. Each entry includes a title, authors, and a year, with icons for actions like 'Add', 'Merge', 'Delete', 'Private', 'Public', 'Edit', 'Help', 'History', 'Recommendation', and 'Additional Info'. At the bottom, there are links for 'CONFERENCE PAPERS AND PROCEEDINGS', 'TECHNICAL REPORTS', and 'REFERENCE WORKS/ENTRIES'. A footer contains copyright information and links for 'PRIVACY POLICY', 'TERMS OF USE', 'COPYRIGHT', and 'CONTACT US'.

Custom Reports

The screenshot displays the Thomson Reuters University profile interface. At the top, the navigation bar includes 'HOME', 'PROFILE', 'DOCUMENTS', 'SEARCH', 'REPORTS', and 'HELP'. The user is logged in as 'E. Calculus' at '1234 Main Street, Amherst Massachusetts 01003'. The main content area shows a list of categories with a filter for 'All Categories' and a 'Hide Empty Sections' checkbox. A large orange arrow points to the 'All Categories' dropdown menu. Below this, three example report views are shown, each with a different department selected in the dropdown: 'All Categories', 'Biology Department', and 'School of Fine Arts'. Each view lists various categories with counts, such as 'BIOGRAPHICAL INFORMATION (5)', 'Degrees (2)', and 'TEACHING (1)'. The 'OR' labels between the views indicate that these are alternative filter options. The bottom of the page shows the copyright notice '© 2010 THOMSON REUTERS'.
