

Поиск информации в базе данных доказательной медицины

Турдалиева Ботагоз Саитовна –
д.м.н., директор ЦДМ КазНМУ

Цели презентации

- Научится постановке исследовательского вопроса
- Научиться определять стратегию поиска
- Научиться уточнять элементы поиска

Полнота поиска

- Нужно стать детективом-новатором
- Определить каждый элемент вопроса (представьте себе пациента или группу пациентов при определении вопроса)
- Думайте, где может быть опубликована нужная информация (журналы, страны, авторы, годы)
- Будьте готовы к изменениям в поиске

Методы нахождения данных (в публикациях)

Литературный поиск

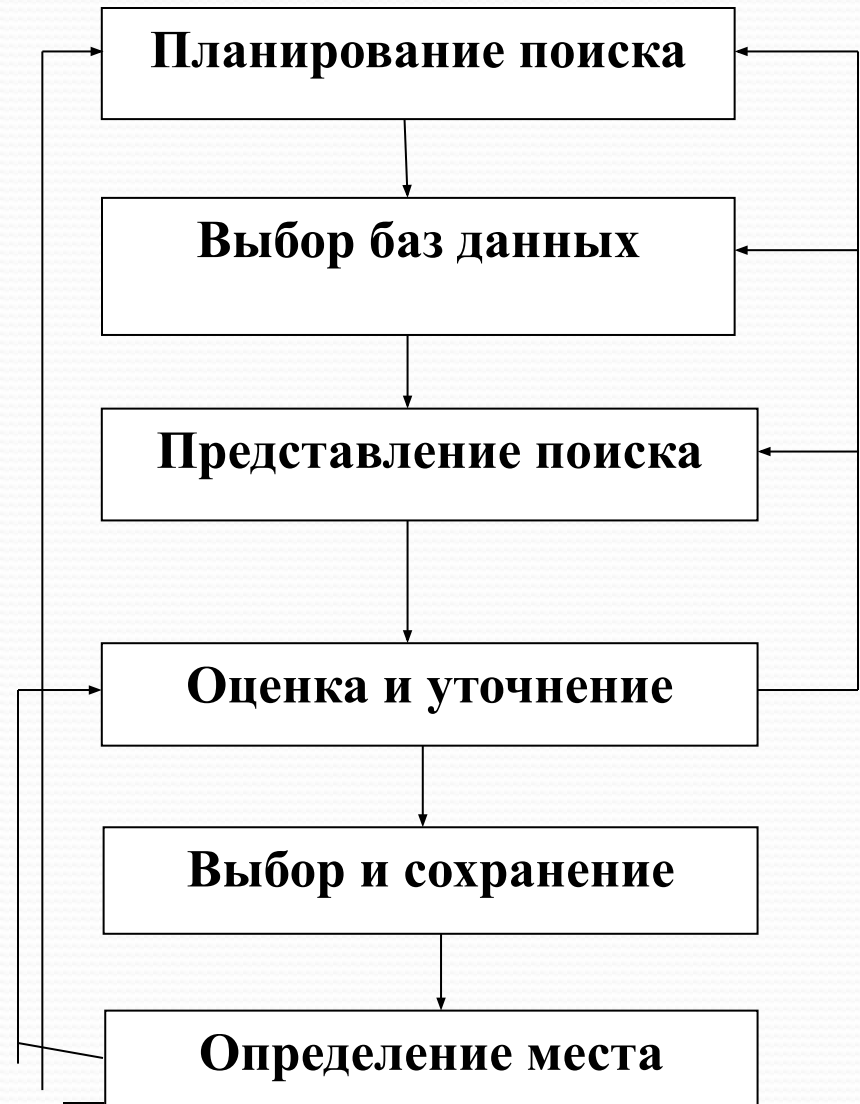

- Ключевые слова
- Базы данных
- Реферативные списки
- Ограничители:
 - ✓ Построение исследования
 - ✓ Период публикации
 - ✓ Язык

Стратегия поиска

- Конструирования плана поиска
- Выбора и доступа к базам данных
- Исполнением запроса
- Оценки и уточнение запроса
- Оценки и сохранения результатов запроса
- Нахождением ссылок

Шаги при поиске информации

Схема показывает, как
можно сузить и
уточнить поиск

Анализ темы

- Первый вопрос – где?
- Второй вопрос – что? (первичные, вторичные или третичные источники)

Шаги

- Определение темы и идентификация понятий
- ✓ Ключевые слова (стресс, исследование)
- Список ключевых слов для каждого понятия (стресс - беспокойство; исследование - изучение)
- Комбинирование слов (OR, AND, NOT) с использованием коннекторов или логических операторов или boolean

Комбинирование слов с использованием OR

Комбинирование слов с использованием AND

Комбинирование слов с использованием NOT

- New Conclusions Changed Commented
- New Search Major Change Withdrawn

SEARCH TIPS

Tip No. 1:

Boolean operators AND, OR, and NOT can be selected from the pulldown selection boxes or entered directly within the search text boxes. Use parentheses to separate components when entering complex search directly in text box with mixed Boolean operators.

Example: *(colchicine AND liver) AND (fibrosis OR cirrhosis)*

Tip No. 2:

The AND operator is used by default between search terms. The string *brain stem* will match records where both words are included in any order or proximity. Search for exact phrases by enclosing a string in quotation marks.

Example: *"clodronate therapy"* matches that exact term

Tip No. 3:

Search for accented characters (within all fields except Author) by using both the accented and unaccented versions of a term or by using wildcard (multiple: *) or (single: ?) characters.

Example: *meniere* or mēnière**

Example: *m?ni?re**

Both examples match Meniere's or Ménière's

Tip No. 4:

Within the Author field, both the accented forms of a name (such as Müller and Müller) are matched

Пример поиска в базе данных *Cochrane* с использованием принципа *PICO*

Результаты поиска

Оценка и уточнение критериев поиска

После использования формулировки поиска в базе данных необходимо:

- Показать результаты на экране
- Оценить результаты поиска с точки зрения точного соответствия

Если Вы нашли подходящие и необходимые статьи,
поздравляем!

Оценка результата

- Соответствие результатов критериям, например:
- Новизна информации
- Соответствие типа информации желанным результатам, напр. исследованиям
- Информация из первичных, вторичных или третичных источников
- Выражает ли нужную точку зрения?

Уточнение результата

- Какие ключевые слова нашли лучшие ссылки
- Какие ключевые слова м.б. неподходящими
- Альтернативные ключевые слова
- Правильны ли ввод формулы поиска с правильными командами?
- Поиск проводился в самой подходящей базе данных?

Резюме

- Необходимо закончить уточнение и оценку результатов поиска. Цель – получить большинство уместных публикаций.

Средства поиска

- Универсальные поисковые машины (Google, Yandex, Yahoo)
- Медицинские поисковые машины (Medical Word Search, MedHunt, Medlinks и др.)
- Библиотеки Cochrane, Pubmed, Medline
- Тематические каталоги (Yahoo Health, Martindale Health Science)
- Специализированные сайты (UniSA, National Guidelines Clearinghouse, New Zealand Guidelines Group)
- Электронные версии журналов (BMJ, Lancet)
