**Compatibility should be statistically proven!** - No one is good for everyone but every person has its own niche.  
Answer as little as five simple questions to find how many thousands of ideal matches do you have at Yangutu. [How it Works](#)

- RULE No1**  
**Don't Start With The Wrong Match!**  
Nobody perfect. Even the best people have the features they don't want to see in their kids. To avoid it, try not to get married to a person with the similar problems.
- RULE No2**  
**Don't multiply the bad by two!**  
You are looking for love and happiness, not for war and struggle. Better to start a relationship with the person you are compatible with than to spend your life trying to deal with contradiction.
- RULE No3**  
**Supplement each other!**  
Knowing who are you really are. Everyone is unique and different type. These types are different ways. Want to find your perfect match? Know yourself!
