The background of the slide features a vibrant display of fireworks exploding against a black night sky. The central firework is a large, bright yellow and orange sphere from which numerous trails radiate outwards. These trails vary in color, including shades of red, orange, yellow, and purple. Some trails are thick and curved, resembling comets, while others are thin and zig-zagging. The overall effect is one of intense energy and light.

Заочное путешествие  
«По местам  
Сталинградской битвы»

# Площадь павших борцов.

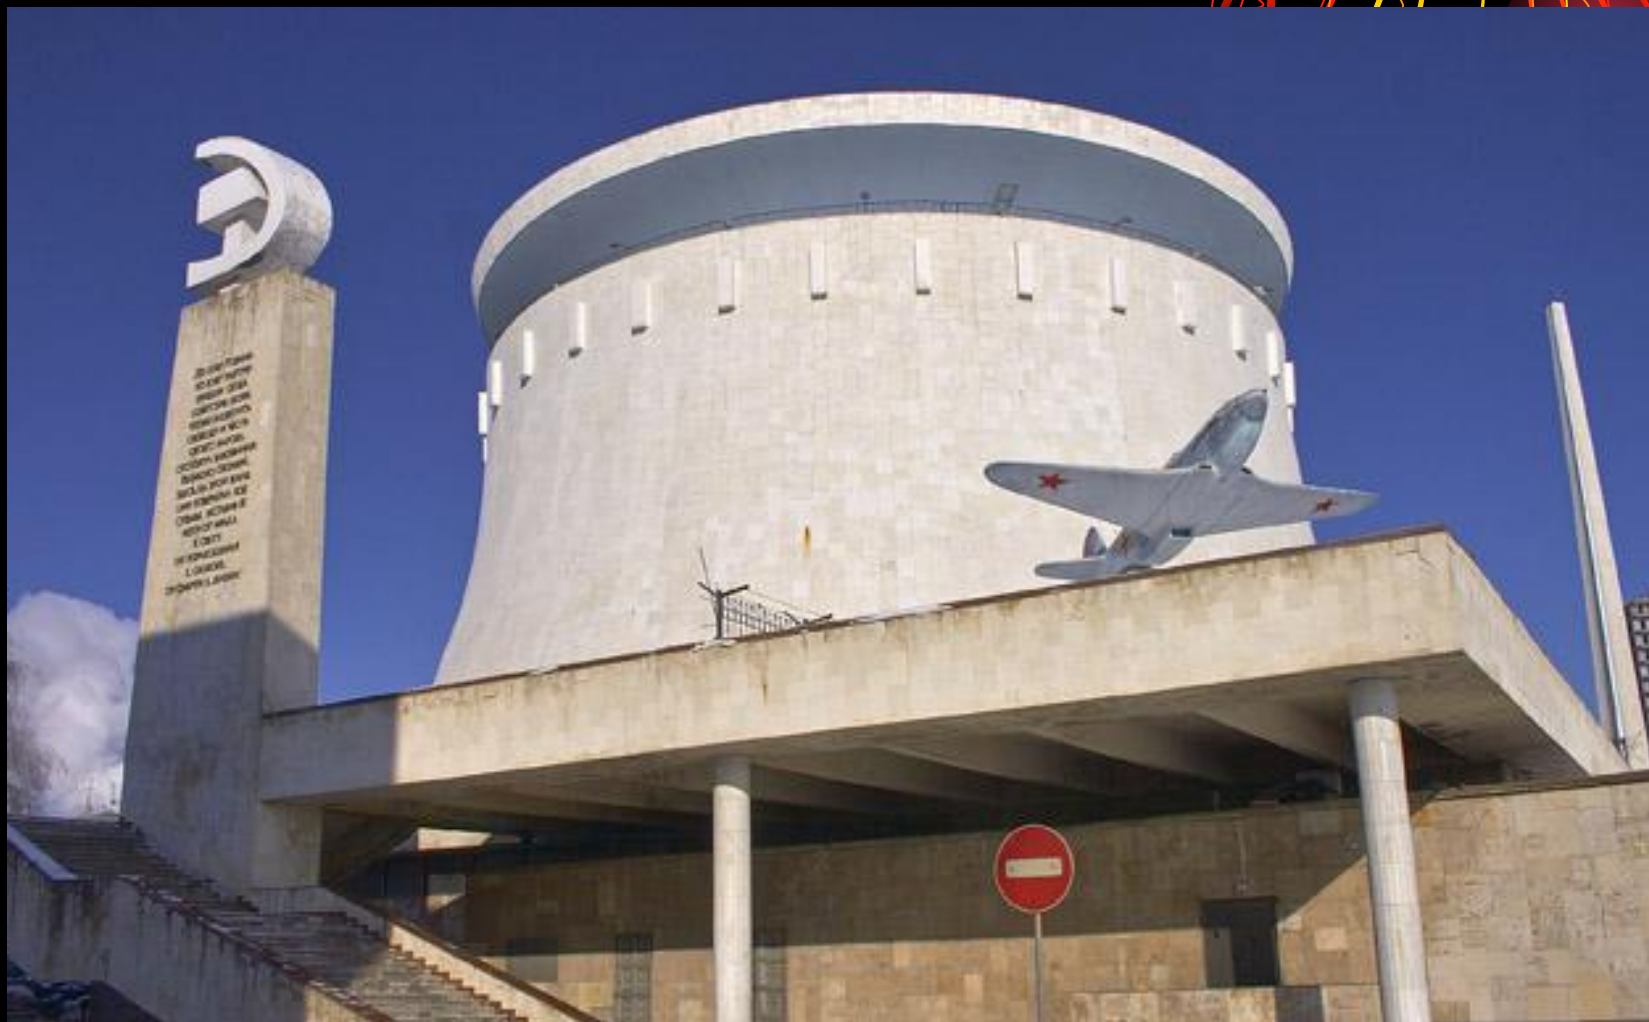

# Дом Павлова.
