

Globalization and economic policy

Kleutina Svetlana, WE-09

GLOBALIZATION-

Is an intensification
relationships,
interactions and
interdependence of
economic, economic
systems around the
world.

Forces driving globalization

Cost factors

Market factors

Technology
factors

Global business
cycle

Company strategy in the face of globalization

Import/
Export

Outsourcing

Foreign direct
investment
(FDI)

Political strategy in the face of globalization

Being in favour of market forces and deregulation.

Being in favour of subsidies and protectionism.

Measuring and analysing global trade

- Balance of trade;
- Balance of payments;
- Exchange rates.

A painting of a globe held by multiple hands of different skin tones against a blue background. The globe is the central focus, showing continents in green and brown and oceans in blue. Several hands of various colors (light, medium, and dark brown) are reaching up from the bottom, supporting the globe. The background is a deep blue with a textured, wavy pattern, suggesting water or a sky. The overall mood is one of global unity and care.
