Cynology

Performed by
Mikhail Tyurnin Andreevich

Outline

1. Difficult vocabulary
2. Main body
 - 2.1. The Science of Dogs. Cynology
 - 2.2. Specializations
 - 2.3. Directions of dog training
 - 2.4. Service cynology
 - 2.5. Hunting cynology
 - 2.6. Decorative cynology
3. Conclusion

Difficult vocabulary

Cynology – кинология

Exhibitions - выставки

Maintenance – обслуживание

Feeding – кормление

Breeding – разведение

Nutritionist – диетолог

Dog training - дрессировка собак

The Science of Dogs

Cynology

Cynology is the science of dogs, studying the structure and functions of the dog's body, breeding, feeding and maintenance, training and use for various types of services, as well as for decorative purposes.

Specializations

- Handlers
- Groomers
- Trainers
- Nutritionists

Directions of dog training

Training is divided into three large groups: service, hunting, decorative.

Service cynology

Specialists prepare animals to work in the military, border guard service and to participate in search operations.

Hunting cynology

Dogs are taught hunting skills together with humans.

Decorative cynology

The specialist prepares dogs for competitions and exhibitions.

Task for the group

Answer the questions.

1. How many specializations does a dog handler have?
2. How many directions in dog training?
