

Google has emerged relatively recently, in 1998, but has already achieved outstanding results. During this time the number of our users and customers around the world has grown to several million.

Company founders Larry and Sergey named the search engine "Google" system. This name is created based on the mathematical term "googol", indicating the number, expressed as a unit followed by 100 zeros. The date of birth of Google Inc. 1998 is considered as one of the founders of Sun Andy Bechtolsheim wrote a check for the amount of 100 thousand. USD for the name is not an existing organization.

Larry Page, who served as chief executive officer since 2001, was re-elected to the post in April 2011. The position of Chairman of the Board of Directors remained for Eric Schmidt, who served her previous 10 years.

After the release of active rumors guglofona we released an open platform for Android mobile devices and announced the signing of partnership agreements with other companies as part of the Open Handset Alliance in 2007.

In June 2011, we introduced the Google+ project, which allows to share interesting information and communicate with your friends online.

Create stunning product only by really talented people. For the usual tools for you, ranging from search and ending with the Chrome browser, lies the hard work of more than 40,000 Google employees. Learn more about how, where and under whose guidance we operate.

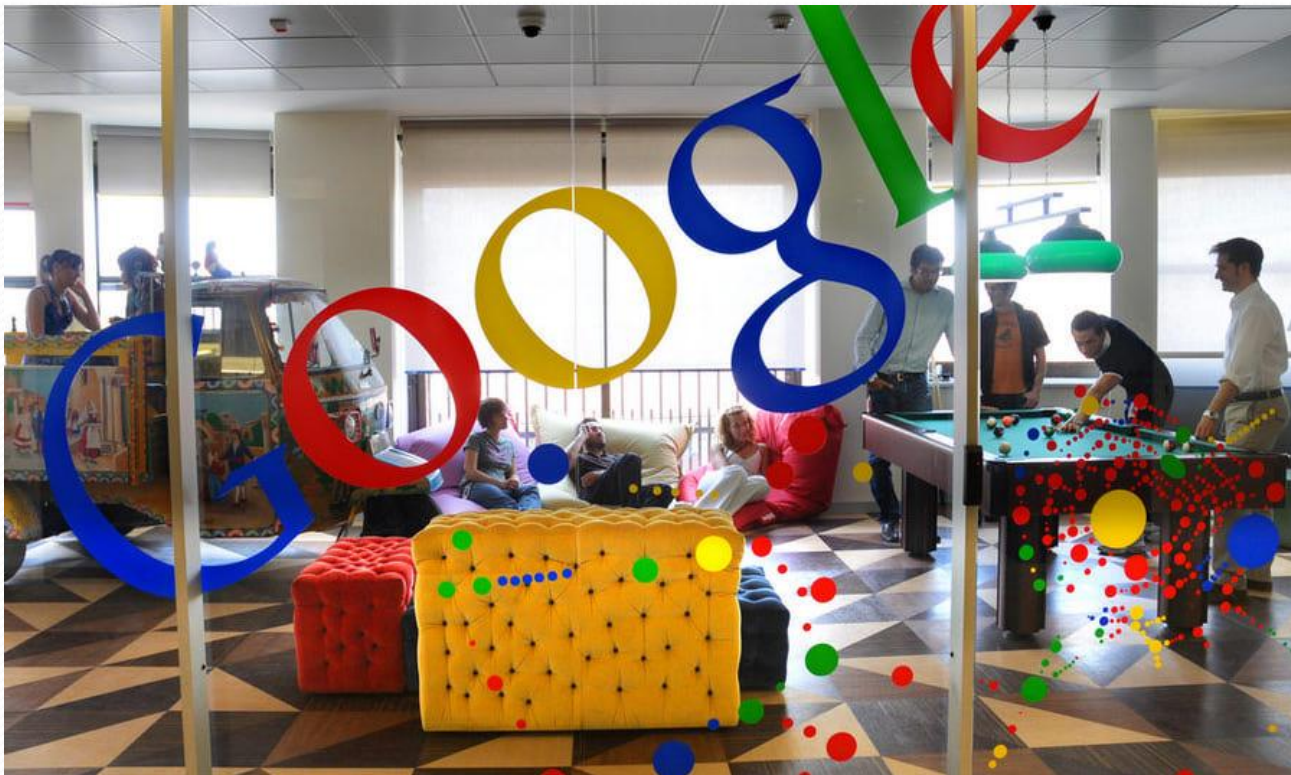

Google Offices

Our business began in a student dorm room in the garage. And today Google's more than 70 offices in 40 countries and headquarters in Mountain View in Silicon Valley, better known as the Googleplex, where we moved in 2004

For employees we organized a café with adequate nutrition and mikrokuhni with snacks and drinks. In Google like table football, tennis, billiards, volleyball, ping pong, as well as play video games and play music on the piano.

Thank you for your attention!
