CR
O

NIVIRON
cancer immunotherapy

Main services

TLO/TTO outsourced

- search for the legal successor of technology
- legal support of the transaction
- marketing activities to promote technology (at own expense)
- preparation of technology for transfer (packaging, legal issues. Format)

Promotion of university services

- contract research
- clinical trials
- joint development

Finding funding for research activities

Search for a sponsor among:

- state funds and corporations (preparation of documents for filing an application)
- charitable trust funds
- private sponsors
- private and corporate investors

Additional services

Market research and analytics

- competitor analysis
- market volume analysis
- determining the potential future value and value of the technology
- determination of the budget for bringing the technology to the market

Protection of intellectual property *

- literary property
- licensing and strategic alliances
- patent
- privacy and data security
- trademark

* we use third-party contactors - professionals in their field

Our opportunities

We have direct access:*

- > 1.500 managers of biotech companies (oncology) (your target audience) including Bayer AG, etc.
- > 1.000 investors in the biotech industry

We have indirect access:**

- > 60.000 CEOs of other tech companies
- > 15.000 biotech investors and sponsors

We can send up to 200 requests per day to the target audience

* already established contact

** there are all contacts in the database, but we did not have a precedent to refer to them earlier
!!! We do not declare that we have partnerships with all our contractors, but we can directly contact the key persons of the company

Oncology (main focus)

Endocrine diseases

Cardiovascular diseases

Autoimmune diseases

Infectious diseases

Aging

Diseases of the central nervous system

Tissue Engineering / Transplantology

Connect with us if you need our help. Let's speed up the process of bringing technologies to practical use together

Business model

Technology licensing

- intellectual property protection
- registration of the company's rights to the technology
- selection of necessary team members
- search for an investor of the series A financing

Series A Financing

technology development

- preclinical trials
- submission of clinical trials application
- search for an investor of the series B financing

Series B Financing

phase I clinical trials

**Sale of
technology
/ company
(! +
royalties
from sales)**

Series C Financing

phase II clinical trials

**Sale of
technology
/ company
(! +
royalties
from sales)**

Profit

!!! This is an optimistic plan for the company's development. We understand there is a high probability that the technology will not be able to reach the market for many reasons.

We are ready for such a development of events. We are ready to start the process again and again until we achieve the main goal that we have set for our company - to increase the duration and quality of human life by promoting technologies aimed at solving the problems facing modern oncology.

The process of collecting a contact base

Market analysis

Creation of a list of companies promoting similar technology, the search is carried out in the patent database, the catalog of clinical trials and the database of companies (crunch base, biotech gate)

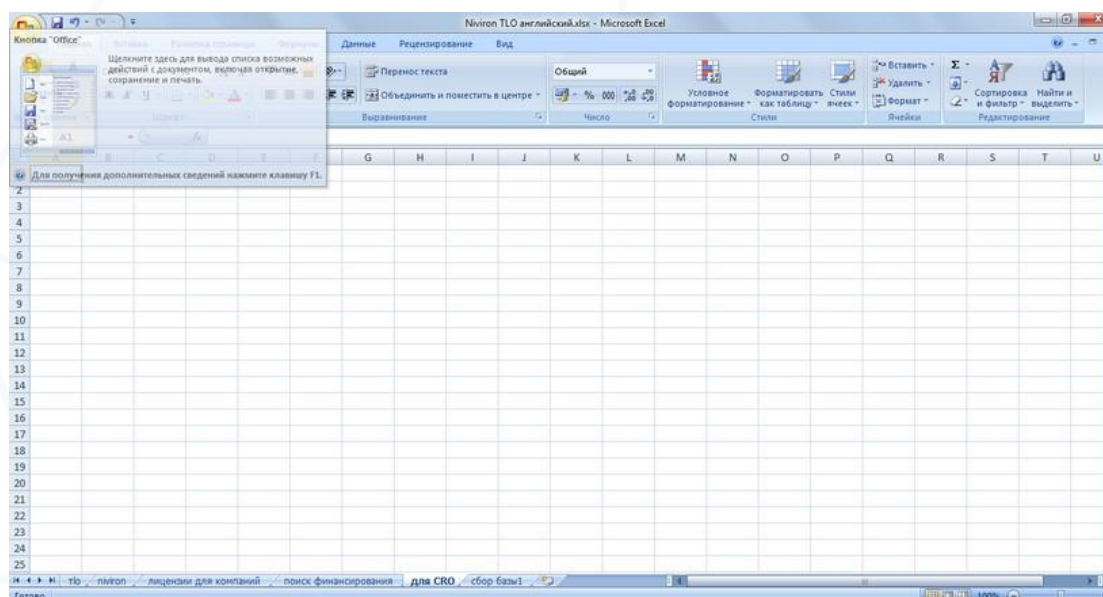

- screen
- patent base

- clinical trials

biotech

- base

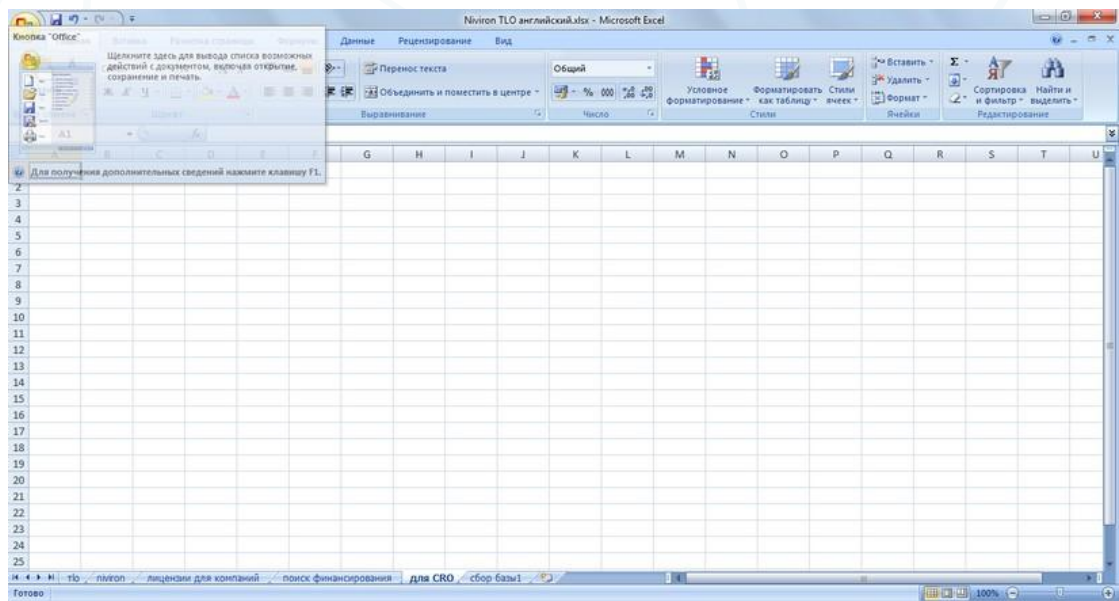

crunch base

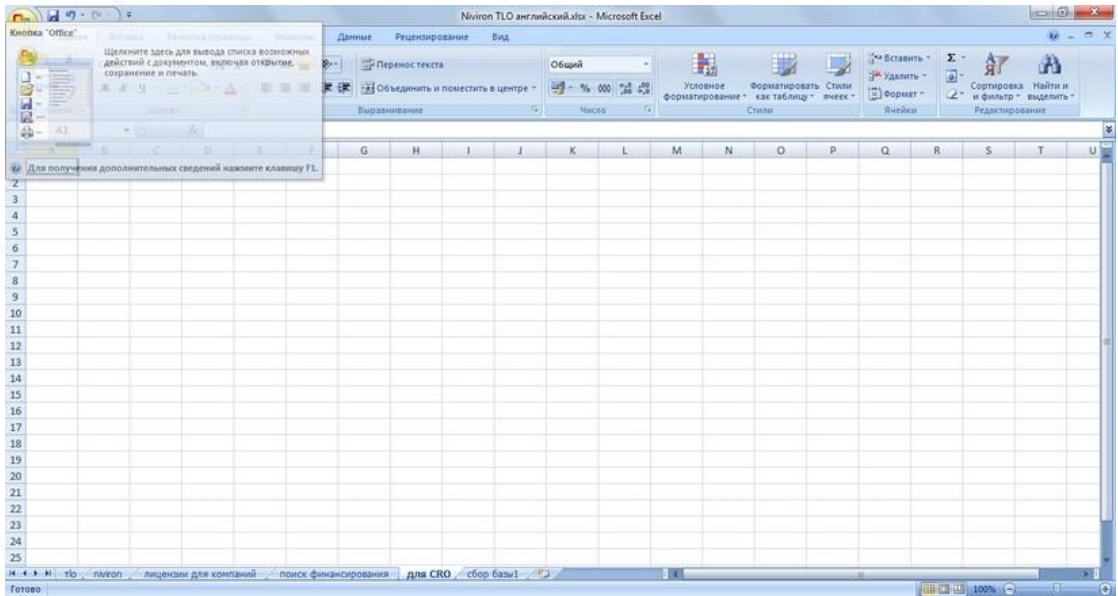

We go to the profiles of each company and find information about the investors who financed this company

Finding contacts of key employees and collecting them into a final file

Creating a list of investors

Sending a database of contacts to the client
