

I am a school  
leaver

My name is Kotkov Bogdan. I would like to tell you a little about my school life. School is your lesson for life, which you will always remember. It was both pleasant and not very pleasant, but it became your home for 11 years, where there were tears of joy and grief. Many thanks to the teachers for their knowledge, patience and motherly attitude to the students.

This is my senior year. But there is one sad thing this exam because it is important to consolidate all the studied material for 11 years. This is scary because there is excitement, although this is the second time when I pass exams, but still there is no confidence. But there is one joy to go free, I know that it will not be easy, but I will cope.

English is a great subject. After all, the teacher conducts various interesting competitions, one of them was a debate. The most difficult part was translating the text, because my English is weak. In General, English is the world language, it is necessary for communication, for the exchange of experience.

The funniest thing that happened was when my classmate threw the keys is not clear where, but then when they searched for it was in a pot from under a flower, and another when the wardrobe fell, but okay there was no one there. As a child, it was funny.

I would like to recommend to the younger generation that they learn, because everyone needs knowledge, but not everyone understands it, and that they do not hesitate to ask questions. After all, teachers will always understand and come to the rescue.

School is a workshop where the thought of the younger generation is formed. you must hold it firmly in your hands if you do not want to let go of the future.
