

Energy from the Sun

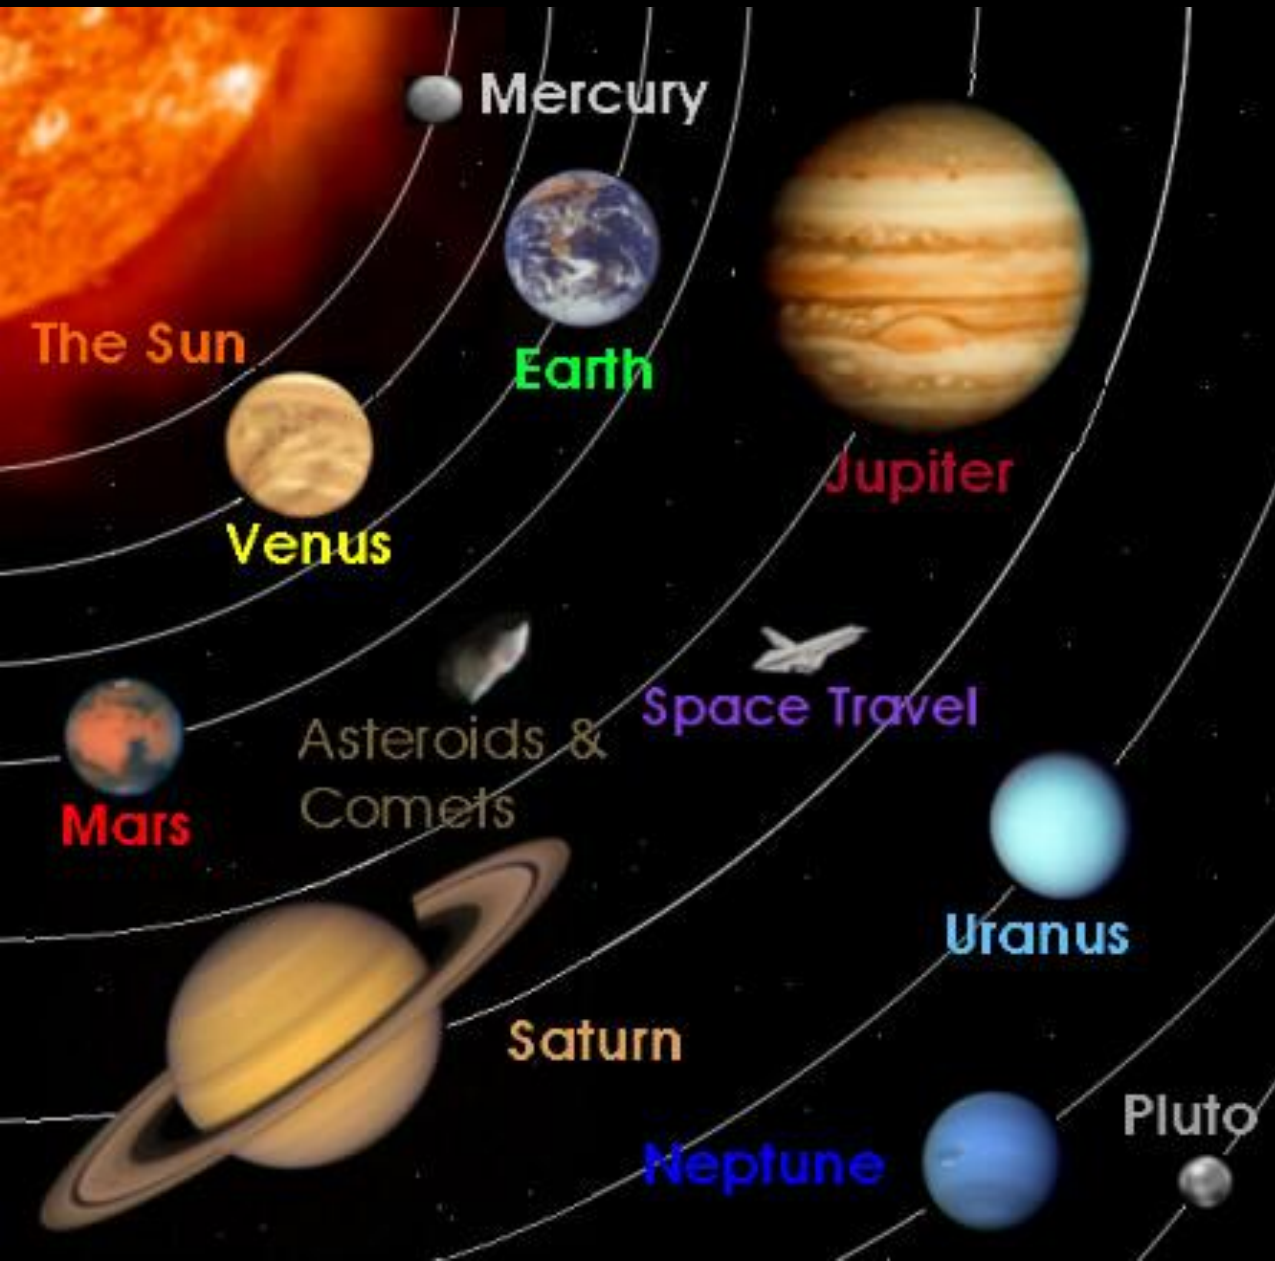

Project made by
Paulina Yefimova

What Do We Want To Know about the Sun?

- What is the Sun as an astronomical object?
 - What is solar energy?
 - Why is solar energy good for our planet?
 - How can people use solar energy?
- 

Solar system

Milky Way Galaxy

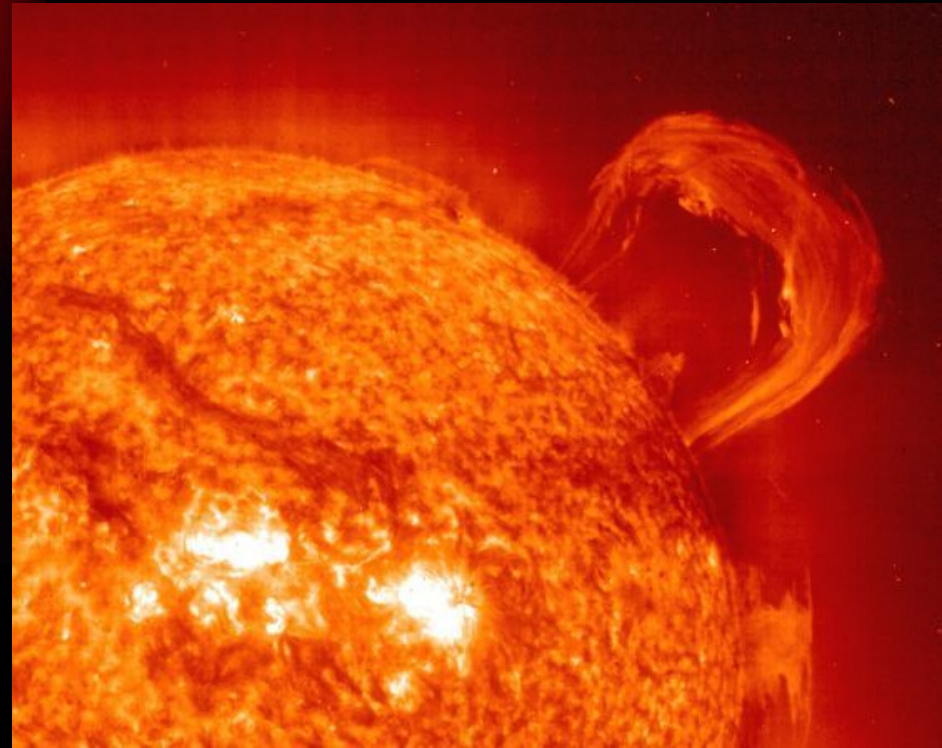

The Sun is a yellow dwarf. It is brighter than 85% of stars in the Milky Way galaxy

Great Ball of Fire

The sun is 92 % hydrogen
and 8%helium

Solar prominences

Powerful Source of Natural Energy on the Earth

Available

Renewable

Free

Using of Solar Energy

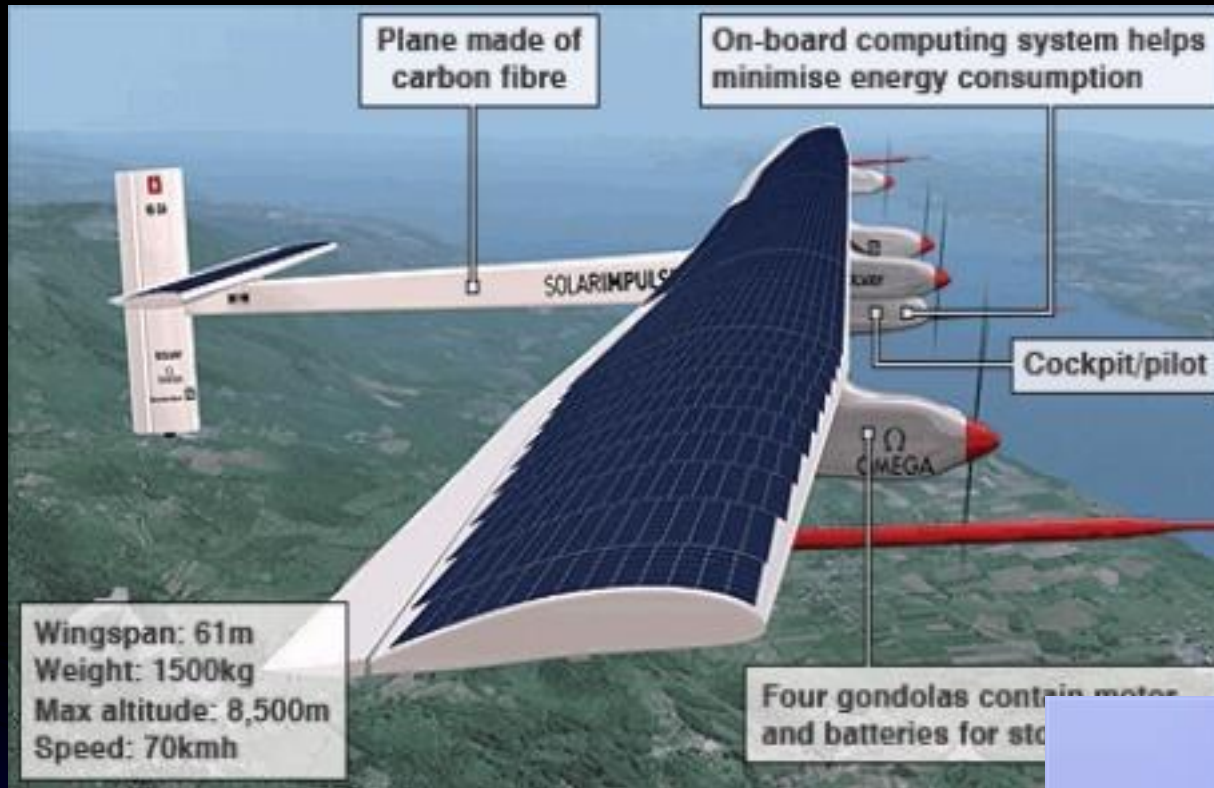

The largest solar power station in Spain

Solar-powered Devices

Solar-powered Planes

Solar-powered Transports

Big Plans for Solar Power

House of future

A huge solar farm in the Sahara Desert

Conclusion

- The Sun is a star, a yellow dwarf.
- The Sun is the center of the Solar system.
- The Sun is a natural source of energy on the Earth.
- Solar energy is ecologically clean and free.
- Solar energy can be converted into heat and electricity.
- Solar Power is one of important energy sources in the nearest future.

Thank you for your attention!
