The basic DPSIR framework

Aral Sea as an example

VUCA factors:

V: Volatility or Variability

U: Uncertainty

C: Complexity

A: Ambiguity

RETURN FROM SHORT- AND LONG-TERM ACTIONS OVER TIME

VUCA factors:

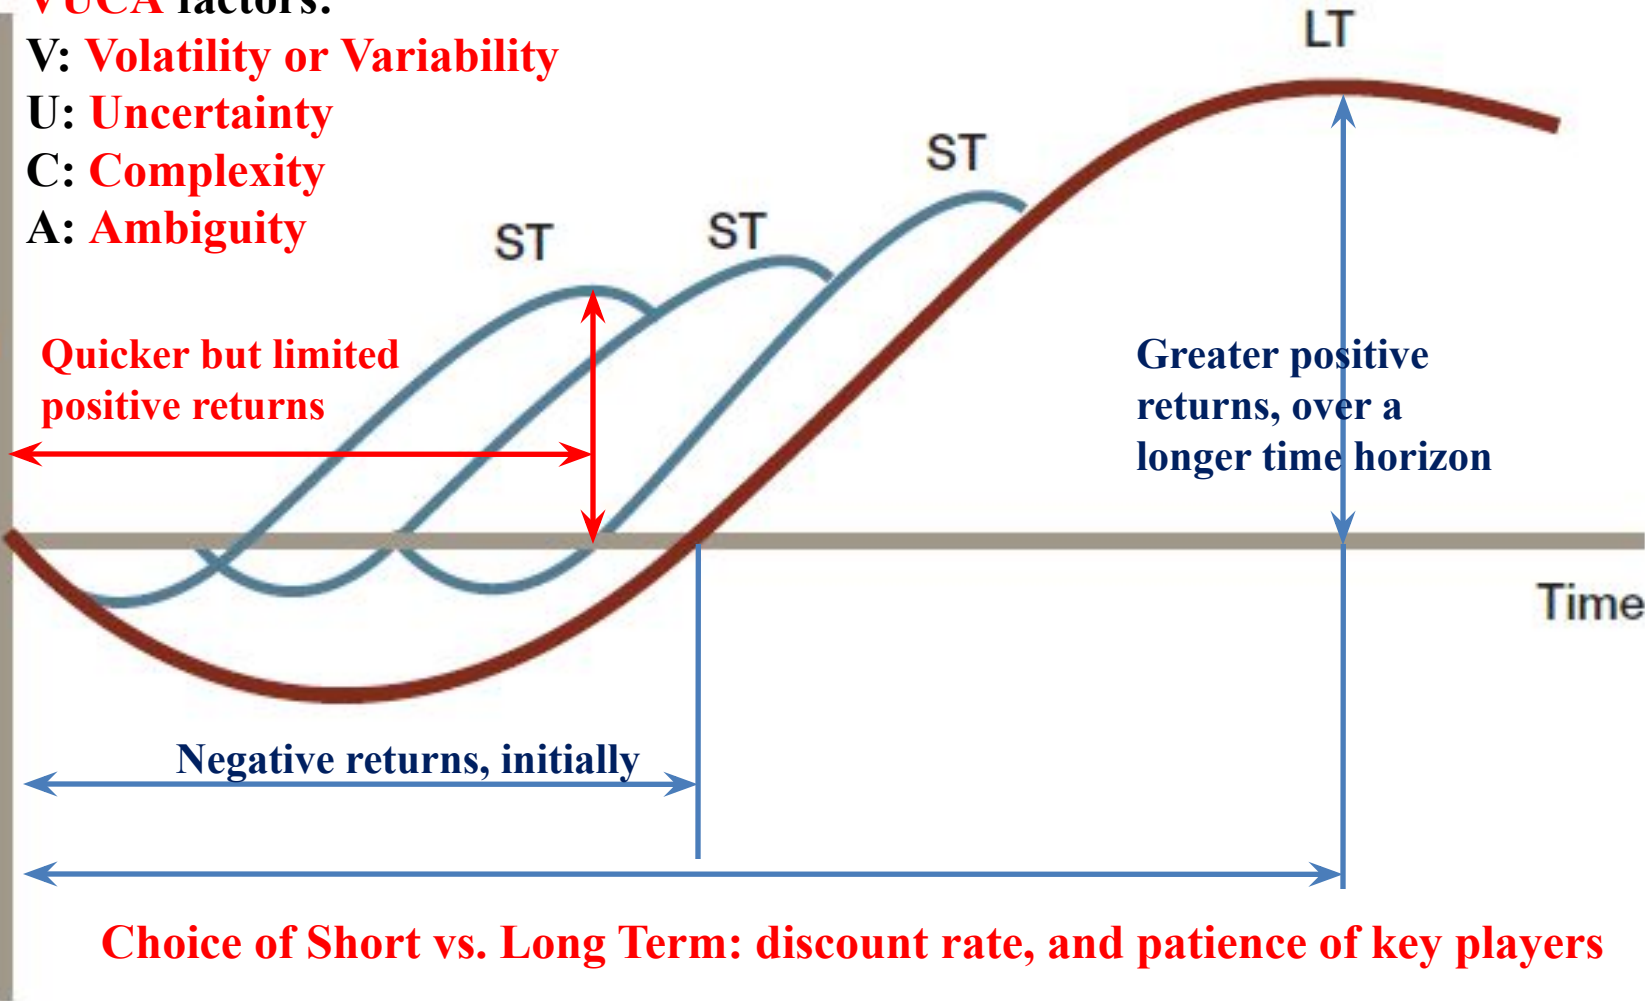

V: Volatility or Variability

U: Uncertainty

C: Complexity

A: Ambiguity

Net Return

Adapted from Laverty, K. J. 1996. Economic “short-termism”: The debate, the unresolved issues, and the implications for management practice and research. *Academy of Management Review*, 21(3): 825–860.

Vozrozhdeniya Island

In the 1990s, word of the island's danger was spread by Soviet defectors, including Ken Alibek, the former head of the Soviet Union's bioweapons program. It was here, according to recently released documents, that anthrax spores and bubonic plague bacilli were made into weapons and stored. The main town on the island was Kantubek, which lies in ruins today, but once had approximately 1,500 inhabitants.

Urban Water Cycle (UWC). Adapted from [Wagner, I.; Breil, P. The role of ecohydrology in creating more resilient cities. *Ecohydrol. Hydrobiol.* 2013, 13, 113–134.]

Water Footprint of Major Commodities

Water Intensity (L / Kg Product)

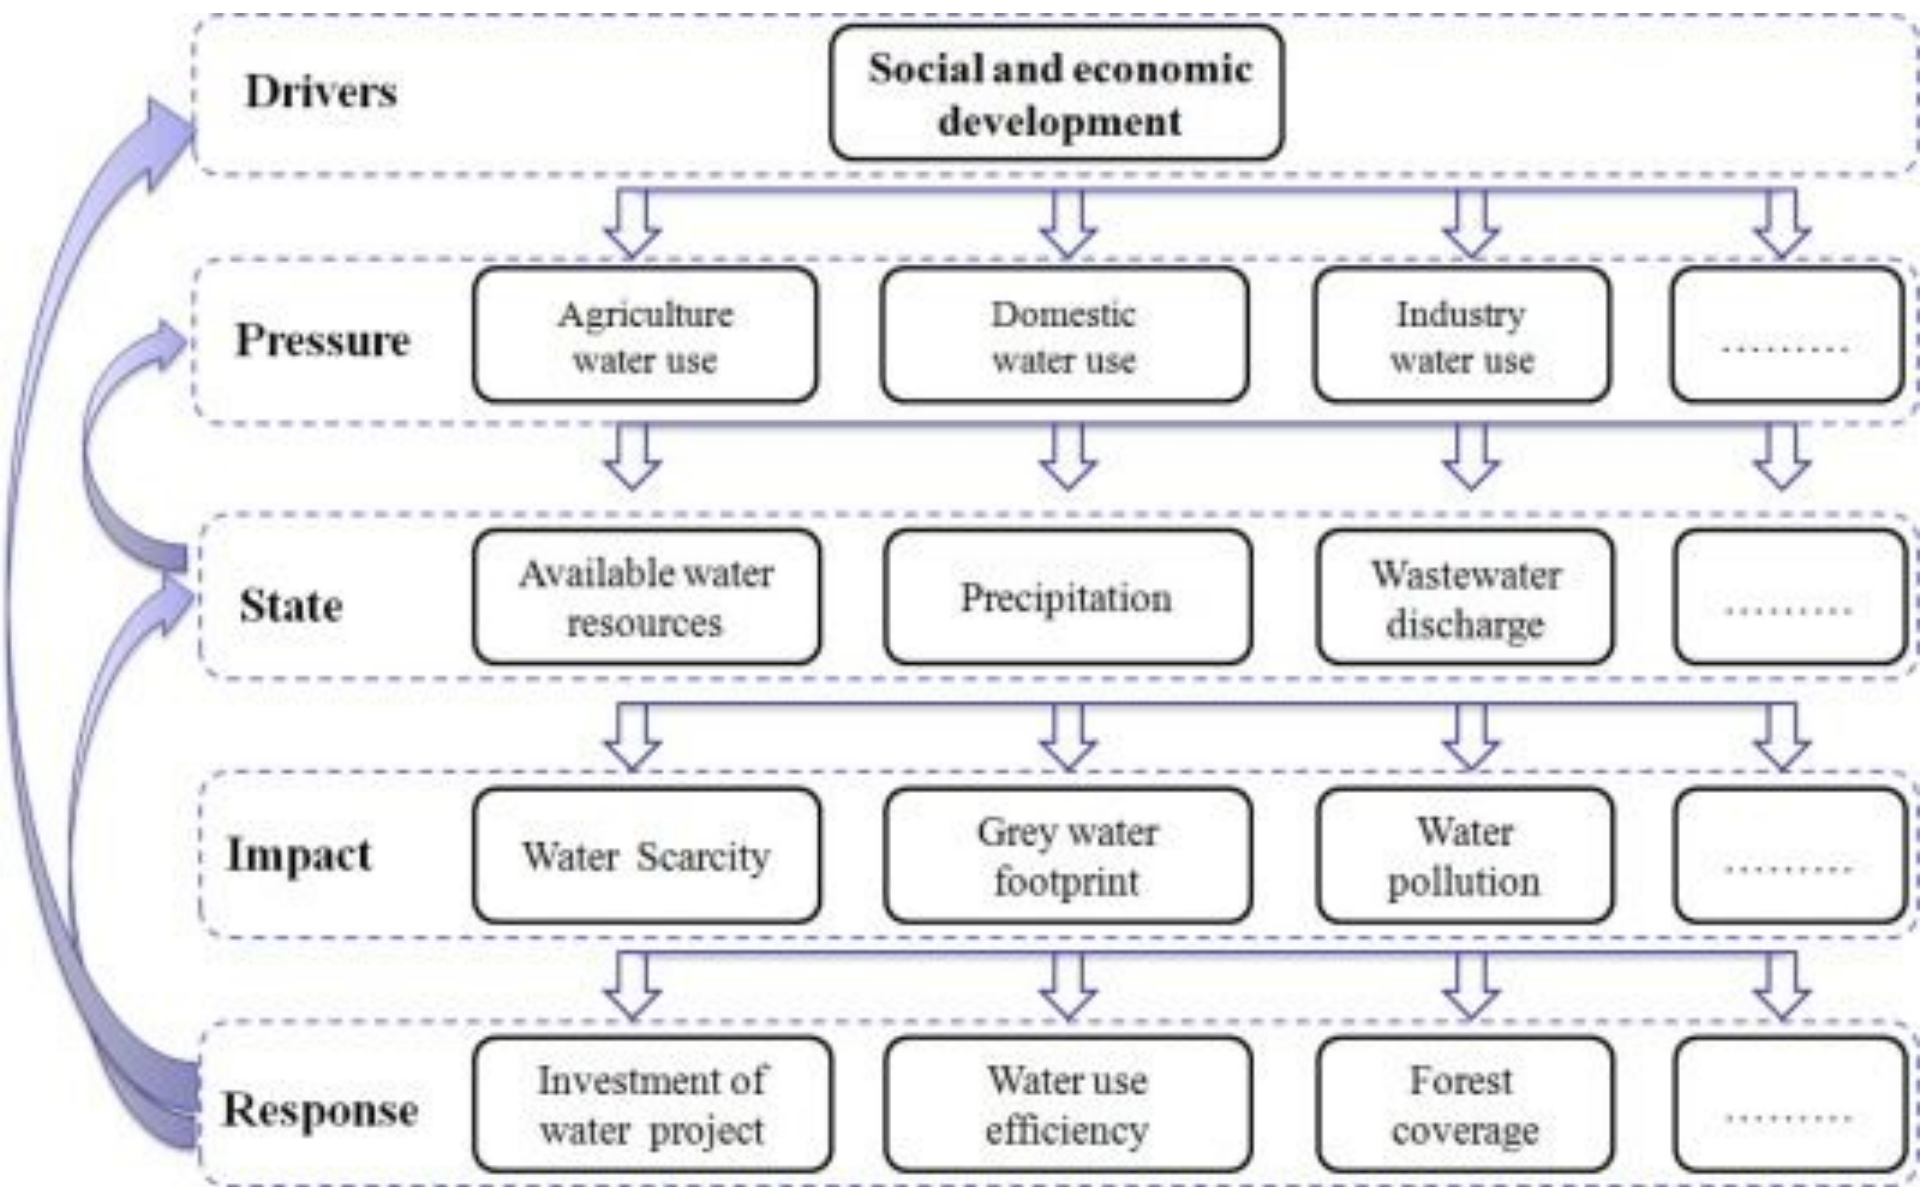

Should we pay more attention to what is being grown or raised and where?

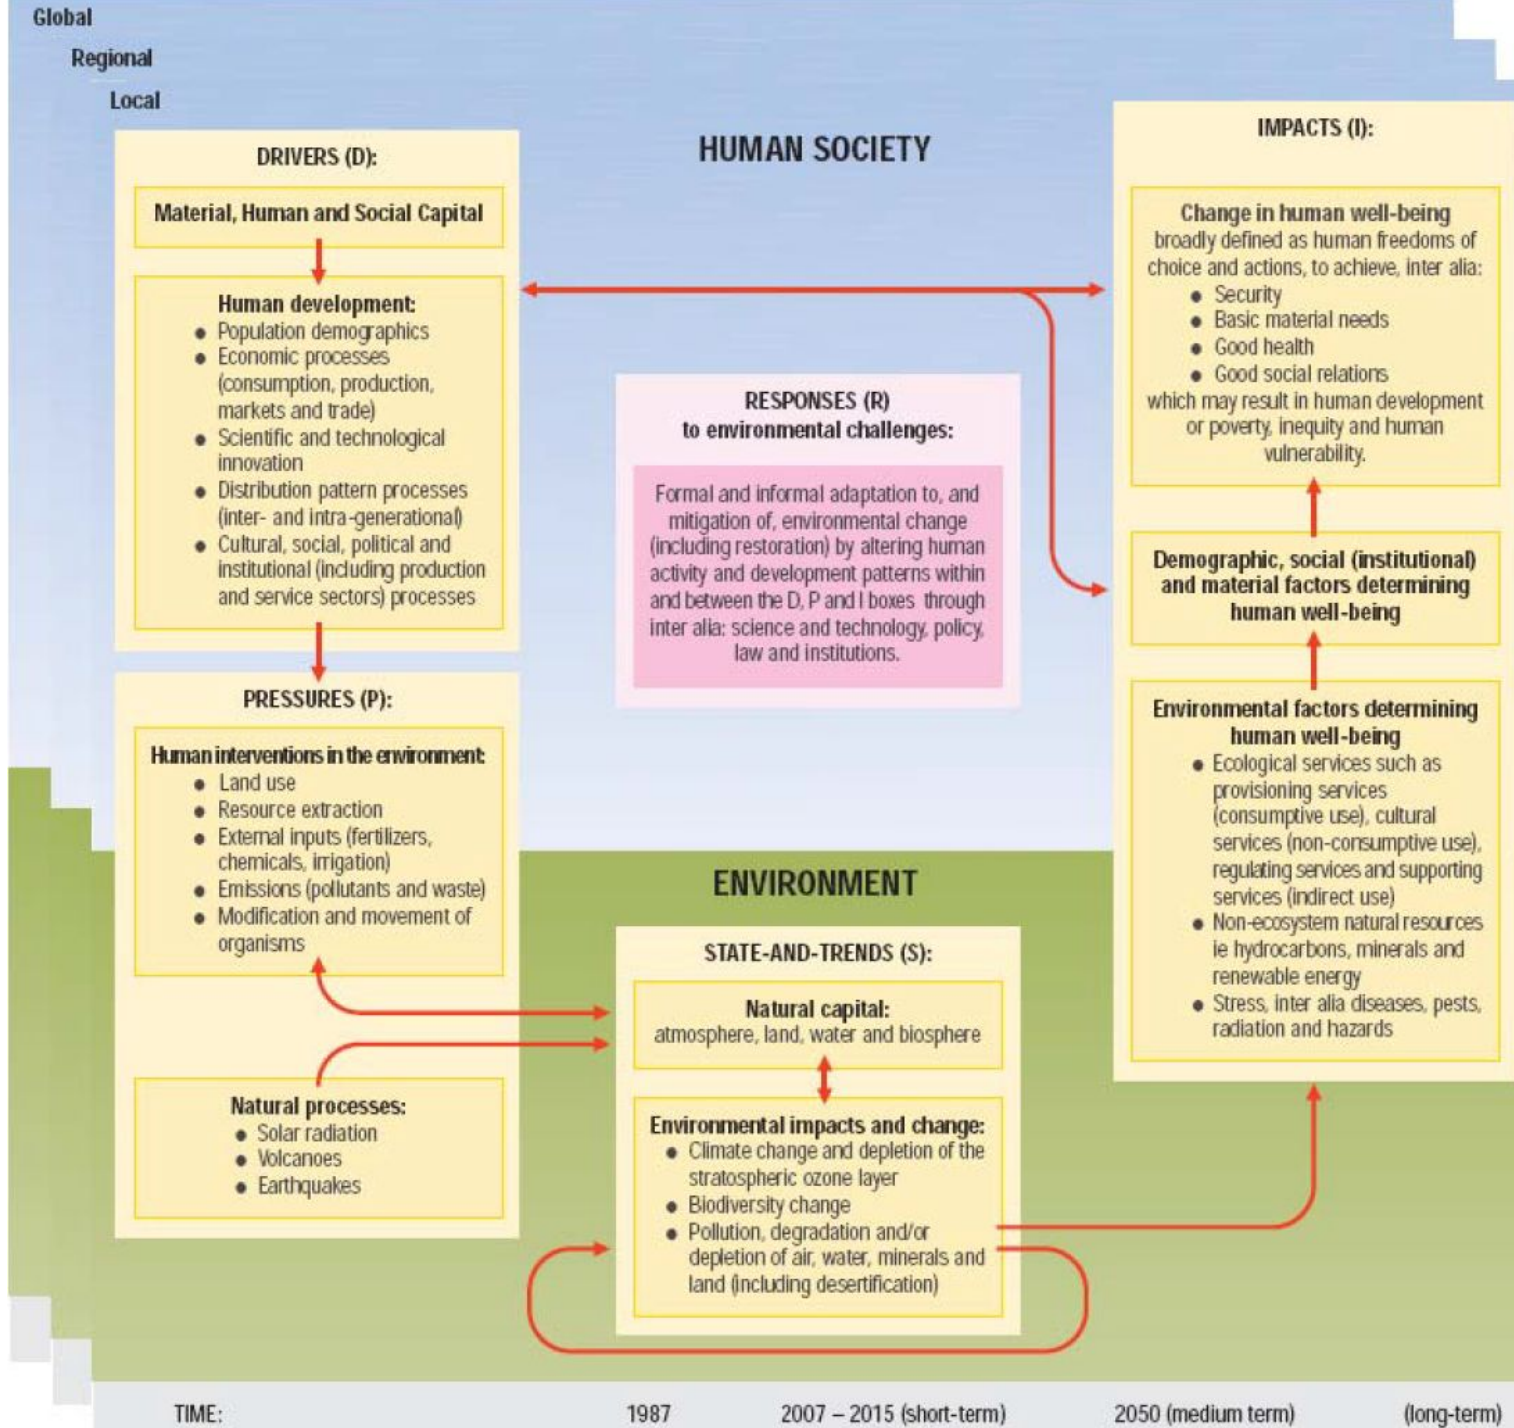

If beef is so water-intensive, should we become more vegetarian?

What is cotton doing to Central Asia?
