

# Melting of glaciers

- 
- A polar bear is walking across a dark, rocky shoreline. In the background, there are large, melting chunks of white ice floating in the water. The sky is overcast and grey. The text is overlaid on the left side of the image.
- Melting of glaciers this most serious threat our existence on the planet.
  - Because of the melting of glaciers in the arctic, many animals die.
  - Because of the melting of glaciers in the arctic, the water level in the ocean rises

- Ice in arctic served to reflrct the rays of the sun.This means that it does not heat up.If the entire arctic grows then there will be many extreme weather on the earth.

- If we do not fight it then million of people can die. This means that the melting of glaciers is very dangerous even for us.
